Program Procedural Guidance  
(2) National Stock Numbers/Management Control Numbers to be Reported

Report Required: Small Arms/Light Weapons Serial Inventory (Report Control  
Symbol MC-8300-01), encl (1), par. 5.a.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is  
unlimited.

1. Situation. To provide guidance and reporting instructions for the Marine Corps Serialized Control of Small Arms/Light Weapons System, per references (a) through (v). The guidance cited herein will ensure Marine Corps compliance with government regulations and Department of Defense (DOD) requirements.

2. Cancellation. MCO 8300.1C and MCBul 4440.

3. Mission. Ensure accurate accountability of small arms/light weapons is maintained within Marine Corps accountable and custodial records, by serial number, and mirrored in the Marine Corps Registry maintained by NSWC Crane.

4. Execution

a. Commander's Intent and Concept of Operations

(1) Commander's Intent

(a) The MCSSAAP meets DoD serialized small arms/light weapons reporting and property accounting requirements, provides the means for timely and accurate tracking of each small arm's status, and augments established security procedures in accordance with the references.

(b) The objectives are supported through organizational level reporting on all transactions that change the accountability status of reportable small arms/light weapons.

(c) Collection and management of such data is performed by a central registry, hereafter referred to as the "Marine Corps Registry." Additionally, MCSSAAP reports, commonly referred to as "Crane Reports," shall be submitted within the time frames prescribed within this directive, in all cases of small arms/light weapons accounting changes (e.g., receipts, issues, transfers, loss/recovery, or verified destruction).

(d) There is a continuing requirement by the Marine Corps to improve control of serialized small arms/light weapons.

(e) The MCSSAAP does not reduce the requirement for strict adherence to the demands for adequate security measures as expressed specifically in reference (d), or generally referred to in other Marine Corps directives, nor is it intended that the requirements for quantitative reporting of controlled items be ignored, but rather that MCSSAAP act as an adjunct to the overall small arms/light weapons security and controls required by Federal law, DOD, and the Commandant of the Marine Corps (CMC).

(f) It is the intent of this Order that reportable small arms/light weapons, as listed in enclosure (2), not be carried as collateral equipment, in order to permit an accurate accounting of all reportable weapons.

(g) Authorized acquisition objectives (AAO), tables of equipment (T/E's), and SL-3's shall reflect this policy.

(h) Questions concerning small arms/light weapons in relation to collateral equipment shall be referred to the Commanding General (ATTN: WSMC), MCLB, Albany, Georgia 31704.

(2) Concept of Operations

(a) Commanders will report the movement of small arms/light weapons by serial number to Naval Surface Warfare Center (NSWC), Crane Division, whenever there is a change in the accountable unit against which small arms/light weapons are being reported, from one DOD Activity Address Code (DODAAC) to another DODAAC, (ex., M20361 to M20460), in accordance with the references.

(b) For the purpose of this directive and as identified in appendix one of reference (c), small arms/light weapons with a sensitive items category code of II are identified as: weapons in serviceable, unserviceable, or demilitarized condition including the following: rifles; pistols; revolvers; line throwing guns; shotguns; machineguns; sub-machineguns; pyrotechnic pistols; flamethrowers; cannons up to and including 30mm; all grenade launchers; single, multi-shot, or portable rocket launchers; individually operated weapons which are portable and/or can be fired without special mounts or firing devices, and which have potential use in civil disturbances and are vulnerable to theft; and all other hand or shoulder-fired firearms, up to and including .60 caliber.

(c) Weapon components such as silencers, mufflers, and noise suppression devices have a sensitive items code of Category II, as defined in reference (d) and shall be accounted for, per the references.

(d) The following are reportable small arms/light weapons, whether, serviceable, unserviceable, relic, or partially demilitarized condition, and shall be registered in the MCSSAAP:

1. Match weapons
2. Rifles, pistols, revolvers,
3. Line throwing guns
4. Shotguns
5. Machineguns, submachine guns
6. Pyrotechnic pistols,
7. Flamethrowers,
8. Cannons up to and including 30mm,
9. All grenade launchers,
10. Single, multi-shot or man-portable rocket launchers
11. Mortars
12. Training devices
13. Silencers, suppressors and mufflers
14. Recoilless rifles

15. Individually operated weapons which are portable and/or can be fired without special mounts or firing devices, and which have potential use in civil disturbances and are vulnerable to theft, and all other hand or shoulder-fired firearms, up to and including .60 caliber.

16. Any enemy weapons (captured or gifted).

Note: All reportable small arms/light weapons shall be registered in the MCSSAAP, whether or not they currently have a National Stock Number (NSN)/Management Control Number assigned, per reference (c).

b. Subordinate Element Missions

(1) Deputy Commandant, Installations & Logistics (DC, I&L) shall:

(a) Provide oversight of the MCSSAAP and establish supporting policy. Provide direction and clarification to current policy as required.

(b) Coordinate serialized small arms/light weapons initiatives with other military services.

(c) Ensure compliance with this policy through the Field Supply and Maintenance Analysis Office (FSMAO) Team inspection program and provide assistance as necessary.

(d) Provide Marine Corps representation to the DOD Joint Small Arms/Light Weapons Coordinating Group (JSA/LWCG).

(2) Commander, Marine Corps Logistics Command (COMMARCORLOGCOM) shall:

(a) Serve as the Small Arms/Light Weapons Executive Agent (SAEA) for all serialized small arms/light weapons reporting and provide primary liaison with NSWC Crane.

(b) Coordinate with NSWC Crane to ensure a thorough search of all USMC inventories is executed upon receipt of a Missing, Lost, Stolen, or Recovered (MLSR) report; and facilitate corrections to property records accordingly.

(c) Resolve any discrepancies/issues of concern between the Marine Corps Registry and Marine Corps organizations participating in the MCSSAAP and ensure Marine Corps wide implementation of the NSWC Crane web-portal for reporting all weapons movements.

(d) Provide Marine Corps representation to the DoD Joint Small Arms/Light Weapons Coordinating Group (JSA/LWCG).

(e) Submit shipment transaction(s) to the Marine Corps Registry when small arms/light weapons are shipped by the Fleet Support Division to Anniston, Alabama for demilitarization. These transactions place the shipment in an in-transit status.

(f) Facilitate storage and control over small arms/light weapons affected by DEMIL moratoriums (a situation where designated weapons are no longer being destroyed for a set period of time), mandated by the U.S. Congress pursuant to the Defense Appropriation Acts issued each fiscal year.

(g) Ensure remote storage activities are conducting Quality Assurance (QA) sampling to ensure accuracy of serialized weapons reporting, proper preservation of packaged materials, and submission of Supply Discrepancy Reports (SDRs), as required.

(h) Monitor reporting of MLSRs to NCIS in order to ensure that Marine Corps units are notifying NCIS timely of any reportable MLSR incidents (e.g., missing, lost, or stolen, recovered small arms/light weapons).

(i) Ensure that Department of Defense Activity Address Directory (DoDAAD) is reconciled annually against the NSWC small arms/light weapons Registry DoDAAC directory for accuracy.

(3) Commander, Marine Corps Systems Command (COMMARCORSSYSCOM) shall:

(a) Ensure Original Equipment Manufacturers (OEM) are contractually obligated to ship weapons only to MCLC, and to provide advanced shipping notices, with weapon serial numbers, to both the Marine Corps Registry and MARCORLOGCOM prior to shipping.

(b) Ensure newly procured/new fielding project weapons are shipped directly from manufacturer(s) to MARCORLOGCOM's remote storage activities.

(c) Ensure all small arms/light weapons requirements are registered in Total Force Structure Management System (TFSMS) per reference (v).

(4) Commanders, Marine Corps Forces (MARFORS) and Supporting Establishments (SE) shall:

(a) Develop internal controls and procedures to ensure compliance with this directive.

(b) Ensure Commanding Officers/Officers in Charge of Marine Corps organizations possessing small arms/light weapons designate responsibilities for management of the MCSSAAP within their organizations.

(c) Require periodic reviews of the MCSSAAP to ensure that the provisions of this policy are met.

(d) Ensure transfers, to include redistributions of serialized small arms/light weapons, are directed by the Major Subordinate Command/Marine Expeditionary Force/Marine Forces Reserve (MSC/MEF/MFR) via Naval message.

(5) Unit Commanders. Commanders who possess small arms/light weapons on their accountable records, shall ensure the following are conducted in support of the MCSSAAP.

(a) Ensure property records, (GCSS-MC/SASSY or DPAS) accurately identify the on-hand balance of serialized small arms/light weapons at 100 percent accuracy levels, whether forward deployed or in garrison.

(b) Ensure transfers, to include redistributions of serialized small arms/light weapons, as directed by the Major Subordinate Command/Marine

Expeditionary Force/Marine Forces Reserve (MSC/MEF/MFR) via Naval message, are coordinated between gaining and providing units.

(c) Ensure copies of all transfer documents (signed DD Form 1348), along with a copy of the signed cover letter, are forwarded within 48 hours of receipt, to NSWC Crane and a copy is maintained in the Supply activity's voucher file, per reference (e).

1. Units shall submit a transfer transaction to the Marine Corps Registry and an advance copy of the transfer transaction, sequentially listing all serial numbers by shipping container, to the receiving unit.

2. Sequential serial number listings will be attached to the outside of each shipping container and over-packed inside the shipping container.

3. Actual ship date is defined as the "exact date the shipment leaves the supporting Distribution Management Office (DMO)."

(d) Ensure that initial MLSRs are submitted within 48 hours of determining that reportable small arms/light weapons are missing, per reference (d).

1. Provide supplemental reports at 45, 90, 150, 180 days and every 30 days thereafter or until MLSR is finalized.

2. Reference the initial report and any other associated reports submitted on the same incident by report number, date time group (DTG), or correspondence identification.

(e) Ensure the nearest Provost Marshal or NCIS office is notified, within 24 hours, in all instances where small arms/light weapons have been discovered missing, lost, stolen, or recovered. When a situation exists where there is no Provost Marshal or NCIS representation available, ensure COMMARCORLOGCOM (SAEA) is notified for coordination with these agencies.

(f) Commanding Officers of shipping activities are responsible for notifying the Provost Marshal or NCIS, within 24 hours of MLSR actions, when a small arm/light weapon, ammunition, and explosives MLSR report, provides no conclusive cause determined for the incident.

(g) Ensure the Provost Marshal reports missing arms, ammunition, and explosives to the NCIS, within five working days, when there is no conclusive cause determined for the missing arms, ammunition, and explosives incident.

(h) Ensure that action is initiated to follow up on any in-transit weapon shipments that are five days overdue from their expected delivery date and immediately address all shipments of small arms/light weapons listed as Delinquent In-Transit.

(i) Contact Major Subordinate Command (MSC), the SAEA, or NSWC, Crane to request assistance for those instances where a response to follow-up action is not received within 10 calendar days.

Feb 16, 2012

(j) Maintain access to the Crane Registry website. Access is restricted to users with PKI capability. Request for access can be initiated by sending an email to: [CRAN\\_MARINECORPS@NAVY.MIL](mailto:CRAN_MARINECORPS@NAVY.MIL) or at the following website:

<https://apps.crane.nmci.navy.mil/permisexternal/userregistration/userregistration.aspx>

(k) Once access has been granted, the User will receive an email which includes notification of the approval, the Crane Registry Website address and basic instructions for utilizing the Crane Registry website to:

1. Monitor current asset data (on-hand assets)
2. Monitor in-bound and out-bound shipments, MLSR status, delinquent in-transit status, and Annual Verification status
3. Query by serial number and NSN/MCN

(l) Conduct a complete, monthly serial number inventory, by a disinterested third party, on all serialized small arms/light weapons, utilizing the current Crane Asset on-hand Data and ATLASS/GCSS-MC/DPAS CMR data.

1. Discrepancies shall be forwarded to the Commanding Officer, via the Supply Officer. The Supply Officer shall then conduct causative research on all noted discrepancies, compare total on hand quantities to the Mechanized Allowance List (MAL), the Crane Asset on-hand data, and Consolidated Memorandum Receipts (CMR). Compare serial numbers to the Crane Asset on-hand Data and Consolidated Memorandum Receipts (CMR), explain action(s) taken or recommended, and forward endorsement to the Commanding Officer within five working days of receipt. Actual gains or losses (vice "administrative") will be researched and reported to NSWC Crane within 48 hours of discovery.

(m) Conduct a complete, annual serial number inventory, of all serialized small arms/light weapons, utilizing the current Crane Annual Verification Report and CMR.

(n) Physically count, daily, upon opening and closing of any armory, all weapons not boxed, banded, and sealed with tamper-proof devices (long term storage). Records shall be retained for three years.

1. Weapons in long term storage (boxed, banded, and sealed with tamper-proof devices) shall be counted and inventoried by the number of items listed on the boxes.

2. Weapons will only be placed in long term storage after they have been inventoried by serial number.

(o) Open and inspect any box that shows evidence of tampering and conduct an inventory by serial number.

(p) Retain results of monthly serialized inventories conducted, for a minimum of three years, per reference (d). Files retained include:

1. Inventory Officer letter of assignment.

FEB 16 2012

2. Crane asset on-hand data and CMR utilized for inventory.
3. Written results of inventories, to include verification of the seals on packed weapons, adequate supporting documentation for weapons not on hand (e.g., receipt copy of EROs, NAVMCs 10520 and 10359).
4. Commanding Officer's endorsement, containing instructions for resolution of discrepancies or initiation of investigation, as well as, Supply Officer's endorsement, indicating action taken/recommended on any discrepancies noted by the inventory officer.
  - (q) Retain documentation of Annual Verification of serialized Small Arms/Light Weapons inventories, for a period of two years.
  - (r) Refer questions to the Marine Corps Registry at: Commander, NSWC Crane (JXNP), 300 Highway 361, Bldg 3422, Crane, IN 47522-5001.

5. Administration and Logistics

- a. Recommendations and questions concerning the contents of this Order may be forwarded to DC, I&L (LPC).
- b. Developers, owners and users of all Marine Corps information systems have the responsibility to establish and implement adequate operation and information technology controls including records management requirements to ensure the proper maintenance and use of records, regardless of format or medium, to promote accessibility and authorized retention per the approved records schedule and reference (h).

6. Command and Signal

- a. Command. This Order is applicable to the Marine Corps Total Force.
- b. Signal. This Order is effective the date signed.

F. PANTER  
Deputy Commandant for  
Installations & Logistics

DISTRIBUTION: PCN 10210615000

Marine Corps Serialized Small Arms/Light Weapons Accountability  
Program Procedural Guidance

1. General. This enclosure provides detailed information on the policy, definitions, authorities, responsibilities, and procedures associated with serialized small arms/light weapons reporting. The Marine Corps Serialized Control of Small Arms/Light Weapons System does not reduce the requirement for strict adherence to the demands for adequate security measures as expressed specifically in references (a) and (d). This system acts as an adjunct to the overall security and allowance controls required by Federal law, the DoD, and the Commandant of the Marine Corps (CMC).

2. Background. The objective of the Marine Corps Serialized Control of Small Arms/Light Weapons System is to augment security control by maintaining permanent serial number records of all small arms/light weapons with the Marine Corps and to interface with DoD central registry on matters pertaining to serial number control of Marine Corps-owned small arms/light weapons. The Department of Defense (DoD) has directed that each of the services establish life-cycle control of all small arms/light weapons, by serial number and/or Unique Item Identifier (UII). This system utilizes, at a minimum, the following standards:

a. A central activity for reporting and accounting data.

b. Transaction reports, by Department of Defense Activity Address Code (DoDAAC), submitted by all military service organizations which have small arms/light weapons defined by the Department of Defense (DoD).

c. Submission of transaction reports covering such events as movement from the vendor, receipt from procurement, issues, transfers to and from repair/rework, and transfer to disposal. Note: Small arms/light weapons transferred from one DoDAAC to another DoDAAC is considered a movement event and shall be reported in accordance with this directive.

d. Minimum data elements reported throughout the life cycle: National Stock Number/Management Control Number (NSN/MCN), nomenclature, serial number, and location (valid DoDAAC).

3. Definitions. The following definitions are applicable to this system:

a. Accountability. The obligation imposed by law or lawful order or regulation on an officer or other person for keeping accurate records of property, documents, or funds. Accountability is concerned primarily with records, while responsibility is concerned primarily with custody, care, and safekeeping.

b. Reporting Unit. Any unit having an allowance, either permanent or temporary, of small arms/light weapons (including team-shooting small arms/light weapons), and/or having firearms in its possession, such as Regular and Reserve units, Marine Corps Junior Reserve Officer Training Corps (MCJROTC) units, museums, special services activities, or research, development, test, and evaluation (RDT&E) activities.

(1) Reporting and validating requirements for MCJROTC units shall be accomplished by the Marine Corps District Headquarters, which has cognizance over each MCJROTC unit concerned.

c. Small Arms/Light Weapons. Weapons in serviceable, unserviceable, or demilitarized condition including the following: rifles; pistols; revolvers; line throwing guns; shotguns; machineguns; sub-machineguns; pyrotechnic pistols; flamethrowers; cannons up to and including 30mm; all grenade launchers; single, multi-shot, or portable rocket launchers; individually operated weapons which are portable and/or can be fired without special mounts or firing devices, and which have potential use in civil disturbances and are vulnerable to theft; and all other hand or shoulder-fired firearms, up to and including .60 caliber.

(1) All reportable small arms/light weapons will be reported and registered in the MCSSAAP, whether or not they have an NSN/MCN.

Note: If an NSN/MCN cannot be located in the enclosure for a specific type of weapon, contact NSWC, Crane personnel for assistance.

#### 4. Higher, Adjacent, and Supporting Commands

##### a. Naval Surface Warfare Center (NSWC)

(1) Manage the Marine Corps Registry, via the Management Support and Data Analysis (MSADA) system, and maintain a permanent historical database which tracks the status of all Marine Corps small arms/light weapons.

(2) Per reference (c), track the changes of on-hand quantities of small arms/light weapons between activities to include; receipts from procurement, shipments from vendors, movement of small arms/light weapons between Marine Corps organizations, Foreign Military Sales, and issues/receipts to and from MARCORLOGCOM Fleet Support Division warehouses and Marine Corps Multi-Commodity Maintenance Centers located in Albany, GA and Barstow, CA.

(3) Working with the MARCORLOGCOM, Small Arms/Light Weapons Executive Agent (SAEA), provide notification to shipping and receiving unit of required follow-up action for in-transit weapons after 30 calendar days for CONUS shipments or 90 calendar days for OCONUS shipments. NSWC also manages:

(a) Captured/recovered weapons.

(b) Inter-Service transfers.

(c) Perform small arms/light weapons status reporting to the DOD Small Arms/Light Weapons Central Registry.

(d) Produce and distribute small arms/light weapons inventory reports for Marine Corps organizations on an annual or as required basis.

(e) Request assignment of Marine Corps Stock Number(s) (MCSN), from MCLC for reportable small arms/light weapons without assigned National Stock Numbers (NSN).

(f) Coordinate serial number requests for small arms/light weapons, with the SAEA, Marine Corps Product Group Directive (PGD/PM) and the DOD Central Registry for the following cases:

1. When small arms/light weapons do not have a manufacturer's serial number affixed to them.

2. The small arm/light weapon has an obliterated or unverifiable serial number.

3. Small arms/light weapons serial numbers contain non-english letters or non-numerical characters.

(g) Report all serialized small arms/light weapons discrepancies to MARCORLOGCOM SAEA for assistance with Missing Lost, Stolen, or Recovered (MLSR) report submissions.

(h) Coordinate with MARCORLOGCOM SAEA to ensure reporting Marine Corps DODAACs are accurately registered in the DOD Activity Address Directory (DODAAD).

(i) Calculate the estimated time of arrival (ETA) for manually processed shipping transactions (i.e. for transactions that are not entered into the WEB-based Registry by Supply Activities and FSD's electronic reporting system) based on the shipment notification cover letter date.

b. Defense Logistics Agency (DLA)

(1) The DLA Disposition Services, formerly known as Defense Reutilization and Marketing Service (DRMS), in Battle Creek, Michigan serves as the DLA program manager for the DLA Central Registry, which employs an agency-wide Small Arms/Light Weapons Serialization Program (SASP) to facilitate the control and accountability of small arms/light weapons by:

(a) Serving as the intermediary for all small arms/light weapons matters involving the control and accountability of small arms/light weapons, by serial number, shipped to the DLA Disposition Services installation for final disposition.

(b) Maintaining a Master Inventory File (MIF). The MIF contains all pertinent data from transactions that reflect small arms/light weapons in an active, inactive, or in-transit status.

(c) Maintaining a Transaction History File (THF) in order to provide an audit trail for all transactions processed through the Registry.

(d) Performing the demilitarization of small arms/light weapons at the DLA Disposition Services, located in Anniston, Alabama, for the Marine Corps.

(e) Submit receipt transactions within ten working days, into the DLA Central Registry to update the Small Arms/Light Weapons Serialization Program (SASP). Shipment and receipt transactions will be processed by DLA Disposition Services within ten calendar days of the physical receipt/transfer taking place. Note: Small arms/light weapons reflected as in-transit remain the owning unit's responsibility until DLA Disposition Services formally acknowledges receipt, hence, timely processing of receipt transactions is imperative.

Feb 16, 2012

(2) The DLA Marine Corps team (J-3/4) will serve as the intermediary between HQMC and DLA Disposition Services for any small arms/light weapons issues.

#### 5. Reporting Requirements

a. All Marine Corps activities possessing reportable small arms/light weapons, regardless of authorized allowance, are required to report the serial numbers to the Marine Corps Registry. Serial numbers will be reported exactly as they appear on the small arms/light weapons (i.e. characters, spaces, dashes, dots, etc) along with the nomenclature, and NSN/MCN of those reportable small arms/light weapons to Commander, BLDG 3422 CODE JXNP, NSWC CRANE, 300 Highway 361, Crane, IN, 47522-5001. Report Control Symbol MC-8300-01 has been assigned to this reporting requirement.

b. MCSSAAP reporting shall be performed within forty eight hours of the relevant action. Newly activated units and units assigned to the Unit Deployment Program (UDP) shall report to the Marine Corps Registry within thirty days of activation. This report will include the DoDAAC, document number, serial number, nomenclature, and NSN.

c. Small arms/light weapons that are the property of Marine Corps Community Services (MCCS) activities and have been acquired with non-appropriated funds are also subject to MCSSAAP reporting requirements. Replica weapons capable of firing or that can be modified to a firing condition are also subject to MCSSAAP reporting requirements. These small arms/light weapons will be accounted for in the Defense Property Accountability System (DPAS).

d. Small arms/light weapons which have been acquired and held by an organization through means other than routine systems acquisition and fielding are also subject to MCSSAAP reporting requirements. These small arms/light weapons will be accounted for in the Defense Property Accountability System (DPAS). Items included in this category are:

- (1) Research and Development (Permanent Property Only)
- (2) Prototype
- (3) Museum

(a) Per reference (k), historical small arms/light weapons with ownership retained by the National Museum of the Marine Corps (NMMC), as established by a conditional loan agreement, will be accounted for by the NMMC separately in the DON Heritage Asset Management System (DONHAMS), with the responsibility for NSWC Crane Division reporting resting with the NMMC.

(b) Historical small arms/light weapons with ownership retained by the possessing command/activity, as established by an approval of request for historical property, will be accounted for in DPAS with the responsibility for NSWC Crane Division reporting resting with the owning installation commander.

(c) Physical security requirements as directed in reference (d), will remain the responsibility of the Historical/Inert small arms/light weapons possessing commander. Limited demil will be performed per reference (d). All units shall retain on file, the limited demilitarization certificates. The certificate shall be required as long as the weapon is maintained aboard the installation.

(4) Captured small arms/light weapons used as training aid or historical momentos.

e. MCSSAAP reports will include the following information:

(1) DoDAAC

(2) Unit Name

(3) Country of origin for the weapon, if known

(4) Serial number

(5) Plain language item description, (i.e., make and model number), such as "AK-47", "Kentucky Long Rifle", "Nambu Machine-gun", etc. Future editions of the Crane Registry website will include a picture and description of foreign weapons to assist units in identification of non-standard weapons. Instructions on how to navigate the new website will be published in separate correspondence.

(6) NSN/MCN assigned per references (c) and (f).

(7) Demilitarization codes assigned per Volume II of reference (s).

(8) Clear text description of demil process used for display purposes. Furnish copy of demil certification in accordance with references (d), (k), and (s).

(9) Location and security measures employed in display of item.

(10) Copy of the following U. S. Customs Declaration, if requested by the Bureau of U.S. Customs, Department of the Treasury:

"This artifact is the property of the U.S. Government having been acquired as captured enemy equipment in (name of war, action, operation, conflict, etc.) and will be maintained by the U.S. Marine Corps for historical and display purposes."

## 6. Acceptable Reporting Methods

a. Wholesale (Fleet Support Division (FSD) warehouses at MCLC Albany, GA and Barstow, CA) and Retail (Initial Issuing Provisioning (IIP)) and using unit organizations will report, via the NSWC Crane web-portal, within 48 hours, inventory adjustments to the Crane Registry. If connectivity is not possible, submit via traditional means (scanned electronic format (.pdf document), faxed, or by registered mail), with supporting documentation, to include DD 1348-1. Enhancements to the Crane website have provided the capability to place in-transit/receipt for weapons and download Annual

Verifications on-line, eliminating the forwarding of documentation to the Crane Registry. The requirement for valid signatures, via crane web-portal, will be satisfied by the capture of the PKI certificate information from each user's Common Access Card (CAC) and registered in the Crane Registry for each transaction made.

7. Reporting Shipments from Procurement

a. Contractual instruments for small arms/light weapons will specify that OEM shipments of small arms/light weapons to Marine Corps activities must provide an advanced shipping notice to include a sequential serialized listing to the receiving unit of all small arms/light weapons shipped, per reference (r). Suppliers will also be required to provide either a sequential serialized listing or electronic equivalent, to the Marine Corps Registry, of small arms/light weapons shipped to the receiving unit, per reference (c).

b. Once the Marine Corps Registry receives notification of a small arms/light weapons shipment from a supplier, the serial numbers will be loaded into the registry database and considered "In-transit" until Receipt Confirmation is received from the receiving unit. Incoming shipments that are in-transit for 30 days or more require immediate action. Receiving units will contact the manufacturer and the Marine Corps Registry at NSWC, Crane by telephone and via email if the shipment is not received within 5 days from the expected delivery date of shipment.

c. The serialized listing received from the manufacturer will be used by the receiving unit as a source document for verification of serial numbers and quantities included in the shipment. Upon verification that all small arms/light weapons included on the serialized listing are accounted for, the receiving unit will submit a copy of the serialized listing provided by the manufacturer to the Marine Corps Registry to include a statement by the receiving unit certifying that the shipment was/was not intact. This will constitute Receipt Confirmation for purposes of the Marine Corps Registry. Hardcopy documentation will be maintained by the receiving unit for three years. Future enhancements to the Crane website will provide the capability to submit MLSRs, eliminating the forwarding of documentation to the Crane Registry.

d. In addition to the above reporting requirements, the manufacturer is required to provide two complete serialized listings of all small arms/light weapons in each shipping container. One copy of the listing will be attached to the outside of each container as part of the packing list and one copy will be inside each container.

e. Newly procured weapons, which are Level A packed, shipped directly from manufacturer(s) to MARCORLOGCOM's depot level storage activities, will not require physical site verification of each weapon serial number during the receipt process. Serial number verification will be accomplished through the use of the serialized listings provided by the manufacturer and Crane reporting source documentation. The depot level storage activities will conduct Quality Assurance (QA) sampling to ensure accuracy of serialized weapons reporting and proper preservation of packaged materials and submit Supply Discrepancy Reports (SDRs) as required.

f. All movement/shipment of small arms/light weapons will be in accordance with reference (r). There will be no exception or modification to the small arms/light weapons shipment notification requirement.

#### 8. Inter-Service Transactions Involving Small Arms/Light Weapons

a. When a Marine Corps unit is directed to transfer accountability of small arms/light weapons shipment to another DoD component service outside the Marine Corps, the Marine Corps unit will report the transaction as follows;

(1) The shipping unit will forward an Issue Transaction to the Marine Corps Registry placing the weapon(s) in-transit. The shipping unit will forward issue transaction documentation to the Crane Registry no later than 48 hours after the actual shipment occurs. Actual shipment is defined as the exact day the shipment leaves the supporting Distribution Management Office (DMO).

(2) Periodically check the Crane website, shipping unit's outgoing shipments page, to verify status of shipment.

(3) If the shipment has not been receipted for within 5 days of expected arrival, contact the intended receiving unit to verify the status of the shipment. If the shipment has not arrived, the shipping unit will immediately conduct tracer action. If within 5 days, the shipment cannot be located, the shipping unit will release an initial MLSR within 48 hours. If the shipping unit verifies that the shipment has arrived, the receiving unit will immediately submit Receipt Confirmation to the Marine Corps Registry. If assistance is needed by the shipping unit to reconcile the shipment, contact the SAEA, at [SMBLOGCOMSMCSAEA@usmc.mil](mailto:SMBLOGCOMSMCSAEA@usmc.mil), for assistance.

b. Pursuant to reference (b), in instances where small arms/light weapons are shipped to another DoD component service for repair and return, requires that weapon shipments from one DoD Component to another for maintenance purposes be reported to the appropriate DoD Component Registries. If a replacement item is provided with a different serial number, then the shipping organization will complete the Issue Transaction for the weapon sent for repair and the receipting organization will provide the Receipt Certification for the replacement weapon to the small arms/light weapons registry.

#### 9. Routine Reporting Procedures

##### a. Routine Change of Accountability

(1) A routine change of accountability occurs when a small arm/light weapon is dropped from the accounting records of one accountable Marine Corps organization and picked up on the accounting records of another. Changes in physical custody such as evacuation of small arms/light weapons from one accountable organization to a supporting maintenance organization or temporary loans (not to exceed 30 days) between organizations do not constitute a change in accountability and, therefore, are not subject to "MCSSAAP Reporting" rules.

(2) Upon the transfer of small arms/light weapons, the shipping unit will submit an Issue Transaction to the Marine Corps Registry no later than

48 hours after the transfer. In instances where a DD 1348-1 has to be submitted, a separate list including serial numbers will be attached and must include the document number assigned to the original DD1348-1, along with the signed cover letter.

(3) The receiving unit will submit a Receipt Confirmation to the Marine Corps Registry within 48 hours after physical receipt of the item(s).

(4) The Marine Corps Registry, upon receipt of the Issue Transaction, will place the small arm/light weapon(s) in an "In-transit" status and consider the small arm/light weapon(s) in-transit until a Receipt Confirmation is received and reported to the Marine Corps Registry by the recipient. For incoming and outgoing shipments that are in-transit for 30 days (CONUS) and 90 days (OCONUS), a delinquent in-transit report (by DoDAAC) will be forwarded by Crane to the SAEA at MARCORLOGCOM for follow-up reconciliation action for those shipments.

b. Maintenance "Wash-Outs" of Small Arms/Light Weapons. Maintenance wash-outs of small arms/light weapons occur when such small arms/light weapons are deemed non-repairable at the supporting maintenance activity.

(1) Once a small arm is determined to be non-repairable by the supporting maintenance activity, accountability will remain with the owning organization while the supporting maintenance activity retains physical custody of the respective small arm until such time as disposition instructions have been received and executed. In this case, the supporting maintenance activity acts as the agent for the owning organization to include all preservation, packaging, and packing (PP&P) and Distribution Management Office (DMO) actions.

(2) At the Depot/Wholesale level, once a small arm is determined to be non-repairable, the weapon shall be returned to the Depot Storage Activity. The Depot Storage Activity will then request disposition instructions and coordinate with DLA Disposition Services for final disposition (DEMIL).

(3) All transactions occur between the owning organization and the activity designated as the final disposition destination. Once the washed-out small arm has been delivered to DMO for shipment to the final disposition destination account or to DLA Disposition Services for demilitarization, the supporting maintenance activity shall close all maintenance related documentation and provide relevant documentation (within 24 hours), in a Letter of Unserviceable Property (LUP) and DD 1348-1, to the owning organization. The owning organization will submit an Issue Transaction to the Marine Corps Registry.

c. All Marine Corps activities, to include the Fleet Support Division warehouses at MARCORLOGCOM Albany, GA and Barstow, CA and deployed units, in possession of small arms/light weapons shall conduct "MCSSAAP Reporting", as occurring, to the Marine Corps Registry.

Note: The signed DD 1348-1 shall be scanned and attached to the corresponding service request in GCSS-MC.

10. Using Unit Requirements for Small Arm Shipment

a. When small arms/light weapons are shipped from one accountable organization to another (to include inter-service shipment) the shipping unit will submit an issue transaction to the Marine Corps Registry and an advance copy of the issue transaction, sequentially listing all serial numbers by shipping container, to the receiving unit. Sequential serial number listings will be attached to the outside of each shipping container and inside the shipping container. The shipping unit will forward issue transaction documentation to the Crane Registry no later than 48 working hours (72 hours if a weekend or holiday) after actual shipment occurs. Actual shipment is defined as the exact day the shipment leaves the supporting Distribution Management Office (DMO).

b. Once the Marine Corps Registry receives the issue transaction from the shipping unit, the small arms/light weapons contained on the serialized listing will be loaded into the Registry's database and considered "In-transit" until receipt confirmation is received from the receiving unit. Incoming and outgoing shipments that are in-transit for 30 days (CONUS) and 90 days (OCONUS) will be placed in a Delinquent In-Transit status and require immediate action delineated in paragraph "d" below.

c. Once the receiving unit receives the shipment, it will use the advanced copy of the issue transaction provided by the shipping unit as the source document to verify the serial numbers and quantities included in the shipment. Once all serial numbers and quantities have been verified by the receiving unit, a receipt confirmation will be submitted to the Marine Corps Registry. This entire process will be completed within 48 hours (72 hours if a weekend or holiday) of shipment arrival.

d. In the event the shipment is not received within 5 days of the advanced notification expected delivery date, the receiving unit will notify the shipping unit. Once notified that a shipment has not been received, the shipping unit will begin tracer action. If the shipment is not receipted for within 5 days, an initial MLSR property report will be submitted by the shipping unit within 48 working hours. Final MLSR reports will be submitted within 45 days of the initial report if possible. If unable to finalize the MLSR report within 45 days, a supplemental report will be due at 45 days and subsequent updates will be made at 90, 150, 180 days and every 30 days thereafter or until the final MLSR report is released referencing the initial report by report number, date time group (DTG) or correspondence identification. Process the MLSR report per references (d), (e), and (k). Organizations that must be addressed on the To line are: CMC WASHINGTON DC L LPC; CMC WASHINGTON DC PPO PS; CG MARCORLOGCOM ALBANY GA; NAVSURFWARCENDIV CRANE IN/JXNP/.

11. Inventory, Verification, Reconciliation, and System Inquiries

a. All unit level activities and installations (Post, Camp, Base, Station) shall conduct a 100 percent serial number inventory monthly, utilizing a local CMR and current Crane Assets extract. Both inventory documents and inventory officer comments will be retained by the supply officer for a period of three years.

Feb 16, 2012

b. The Marine Corps Registry will provide, at a minimum, an annual, Serialized Small Arms/Light Weapons Inventory Report (commonly referred to as the "Annual Verification Report"), by serial number, of all small arms/light weapons on record as accountable to Marine Corps organizations. Once received, Commanding Officers will appoint, in writing, an inventory officer to conduct a 100 percent serial number inventory of accountable small arms/light weapons and verify/reconcile the results of the inventory against the listing provided by the Marine Corps Registry and the CMR. In instances where a small arm/light weapon(s) is not available for physical sighting during the inventory, such as a small arm/light weapon(s) in a temporary loan status, evacuated for maintenance, issued to a user incident to ongoing operations, etc., the inventory officer will verify the serial number and current status of affected small arm/light weapon(s) by sighting, reviewing, and verifying the validity of documentation supporting its absence. Organizations which possess bulk quantities of small arms/light weapons or organizations which have all or a portion of their small arms/light weapons in level "A" packaging need not physically sight the serial number of each small arm. Instead, packing lists or subsidiary records may be used for verification/validation of the annual Serialized Small Arms/Light Weapons Report provided by the Marine Corps Registry, as long as the original seal has not been broken or show any sign of being tampered with.

c. Annual Verification Reports will be validated and returned to the Marine Corps Registry within 45 calendar days of the date of the listing. The certification statement provided with the listing will be signed and dated by the Commanding Officer. Any discrepancy between the Annual Verification Report and the results of the physical inventory will be identified and must be supported by valid issue, receipt, and/or adjustment documentation. All supporting documentation will be attached to the certification statement page and returned with the Annual Verification Report. Confirmation of receipt of in-transit weapons during the annual verification is acceptable in lieu of separate receipt confirmation documentation and should be reported whenever applicable. A second copy of the Annual Verification Report along with any supporting documentation will be retained by the reporting organization for a period of three years.

d. In instances where discrepancies between the Annual Verification Report and the results of the physical inventory cannot be supported by existing documentation, the organization will submit an initial MLSR report within 48 hours (72 hours if a weekend or holiday) of completion of the inventory in accordance with references (d), (e) and (k). A copy of the initial MLSR report will be attached to the certification statement page and returned to the Marine Corps Registry with the validated Annual Verification Report. Subsequent supplemental reports will be made at 90, 150, 180 days and every 30 days thereafter or until the final MLSR report is released. Each supplemental report will reference the initial report by report number, date time group (DTG) or correspondence identification.

e. If an Annual Verification Report is not posted on the Crane website or received from the Marine Corps Registry for validation within one year of the last annual validation, Marine Corps organizations may contact the Marine Corps Registry and request that one be provided.

f. The Marine Corps Registry may provide information pertaining to small arms/light weapons serial numbers or accountable Marine Corps organizations of record, and the like, to authorized law enforcement agencies pursuing legitimate investigative activities. Inquiries involving small arms/light weapons that are not registered as being possessed by the Marine Corps will be forwarded to the DoD Registry, by the Marine Corps Registry. All other requests for information or data relevant to the MCSSAAP will be forwarded to the MARCORLOGCOM SAEA for approval of release.

12. Captured Enemy Small Arms/Light Weapons and Gifts

a. All retained captured small arms/light weapons in the custody of Marine Corps units and activities are subject to the "war trophy firearms" provisions of reference (l), controlled items management per reference (i), historical significance reporting per reference (k), and reporting under the MCSSAAP as described herein. Per reference (n), firearms which are accepted by Marine Corps personnel as gifts from a foreign government and retained as personal property may not be possessed, imported, or transported in violation of applicable U.S. or foreign laws and regulations, and responsibility for compliance rests with the recipient. War trophies, war trophy firearms, and gifts of firearms are subject to the provisions of references (m) and (p). In those instances where approval is granted for Marine Corps organizations to retain captured enemy small arms/light weapons as Marine Corps property, the following procedures will be followed:

(1) Captured enemy small arms/light weapons authorized to be held as Marine Corps property will be reported on the Installation Commander's accountable records on an "as occurring" basis per references (k), (n) and (o).

(2) Assign a Marine Corps Stock Number (MCSN) per reference (f) beginning with "1005" as the federal supply class. The Crane website provides currently assigned MCSNs for various types of nonstandard small arms/light weapons. Units will use the appropriate MCSN appearing on the Crane website in lieu of assigning interim MCSNs whenever a weapon description match is positively found. If a MCSN is not available on the Crane website, units will contact the Crane Registry and request one be assigned.

(3) Per instructions contained in change five of reference (c), assign a serial number and/or Unique Item Identification in cases where the serial number of the captured enemy weapon contains non-English letters, non-Arabic numbers, is indistinguishable, or no serial number can be found. Assigned serial number and/or Unique Item Identification will be clearly and permanently affixed to the receiver.

(4) Additive to the MCN and serial number, record and generate the following information for reporting purposes:

(a) Nomenclature (complete description including caliber)

(b) Photographs (8 x 10-1/2) of front view, rear and back view, side views, top view, and bottom view; drawing and/or schematics (if available), detailed operating instructions to the Registrar, National Museum of the Marine Corps (NMMC).

(c) Manufacturer's Name (if known or identified on the weapon)

(d) Country of Origin (if known or identified on the weapon)

(e) Details of Capture (location, date circumstances, etc.)

(f) Demilitarization (DEMIL) Code. For ultimate disposal purposes, assign DEMIL Code "D" in accordance with U.S. Munitions List and Volume II of reference (s).

(5) Simultaneously report the data as follows:

(a) Per references (e), (l) and (m), report to the NMMC, the unit's custody or possession of captured enemy small arms/light weapons and request applicable disposition authority. The report must state whether the captured enemy small arms/light weapons are to be DEMIL for display purposes and held as organizational "war trophy firearms". No DEMIL action of any kind should be taken until the authority to retain captured enemy small arms/light weapon is authorized by the National Museum of the Marine Corps (NMMC). Note: The NMMC reserves the right to require relinquishment of a captured item for the Marine Corps Museum collection.

(b) Submit a Receipt Confirmation to the Marine Corps Registry at NSWC, Crane, IN. Follow up by submitting a copy to the NMMC for authorization as to whether the unit will retain custody of the weapon or be required to report transfer to the NMMC.

(6) When a unit is authorized to retain a captured small arm/light weapon by the NMMC, evacuate the captured enemy small arm/light weapon to the supporting Field Level Maintenance Activity (FLMA) for limited DEMIL, if it is to be retained as an organizational "trophy." NMMC shall authorize minimum DEMIL of such items be accomplished to render them unserviceable in the interest of public health and safety. This limited or minimum DEMIL will be performed in such a manner so as to preserve the intrinsic, historical, or display value of the property. The Marine Corps Registry will consider the captured enemy weapon being held as a fully functional small arm/light weapon until a copy of the limited DEMIL certification is provided by the accountable organization. Note: Complete DEMIL must always be accomplished on partially DEMIL and modified items prior to final disposal.

(7) If the Marine Corps Registry provides the MCN and serial number, update unit property accounting records accordingly to reflect the Marine Corps Registry-assigned MCN and serial number.

### 13. Foreign Small Arms/Light Weapons utilized for training

a. The following procedures will be followed for fully functional captured enemy small arms/light weapons retained by Marine Corps organizations:

(a) Prior to any consideration and authorization for disassembly of unserviceable weapons for the purpose of establishing repair part blocks for foreign weapons, all captured small arm/light weapons authorized for retention at the unit level must first be reported to the Marine Corps Registry as individual weapons.

(b) Fully functional captured enemy small arms/light weapons will be safety certified by personnel who have completed a foreign weapons maintenance training course utilizing appropriate tools and gauges prior to being fired. If qualified personnel are not available, safety certification may be requested through CG, Marine Corps Systems Command.

**\*\*Note:** A Marine possessing the MOS of 2111, 2112, 2181, or 2120 does not make him/her a foreign weapons expert. An MOS designator alone does not validate that the individual is capable of safety certifying any foreign weapon prior to being fired.

(c) Physical security provisions for Arms Ammunition and Explosives (AA&E) contained in references (d), (e), and (f), apply to both fully functional captured enemy small arms/light weapons or those held as organizational "trophies" on display.

#### 14. Disposition of Captured Property

a. Controlled Item Management. When captured enemy small arms/light weapons are no longer required or desired as organizational property, disposition instructions will initially be sought from the NMMC. If NMMC releases the captured enemy small arms/light weapons, final disposition instructions will be sought, in accordance with references (i) and (u), from COMMARCORLOGCOM, a copy of the release document from the NMMC shall also be submitted.

b. DLA Disposition Services Turn-In. The DD Form 1348-1, Disposal Turn-In Document (DTID), must be clearly marked "Captured Property" and approved by both the NMMC and SAEA, COMMARCORLOGCOM for release. All DTID will be certified by a technically qualified individual, verifying that the captured property is inert. Note: There are no exceptions to this certification requirement (references (d), (g), and (o) apply).

c. Qualified Recycling Program (QRPs). Captured small arms/light weapons are considered Category I Munitions List Items (MLI) and therefore, are not eligible for recycling through installation QRPs, per reference (o).

15. Recovered Confiscated or Abandoned Small Arms/Light Weapons. When small arms/light weapons (U.S. Government or Privately owned) are recovered incident to confiscation by civilian, federal, or military law enforcement agencies, or are found and subsequently turned in to a Marine Corps organization for safe keeping, the following procedures will be followed:

a. Submit a recovered MLSR report within 48 hours in accordance with references (d), (e) and (i). Include the following statement in the remarks block of the recovered MLSR: "U.S. Government reportable/Private owned small arm/light weapon confiscated/recovered/found (whichever is applicable) by (name of recovering agency i.e., FBI, CID, NCIS, etc.) on (date)." The Marine Corps Registry will also be requested to query the DoD Registry to determine the last known accountable holder of the recovered small arm/light weapon(s).

b. Once any and all investigative actions are completed by the recovering agency and authority is granted from the investigating agency to dispose of the recovered small arm/light weapon, request disposition instructions from COMMARCORLOGCOM. The request for disposition instructions

will indicate that the small arm/light weapon is recovered and include the DoDAAC of the last known accountable organization, provided by the Marine Corps Registry. In cases where a last known accountable organization cannot be determined, a statement reflecting that the last known accountable organization could not be determined will be included in the request for disposition.

c. Once disposition instructions are received from COMMARCORLOGCOM, execute the disposition instructions and submit an issue transaction to the Marine Corps Registry and include the following statement: "U.S. Government reportable small arm/light weapon(s) confiscated/recovered/found (whichever is applicable) by (name of recovering agency i.e., FBI, CID, NCIS, etc.) on (date)."

16. Disposition of Domestic or U.S. Origin Small Arms/Light Weapons. Refer to references (c), (i), and (u).

17. File Retention. All documentation pertaining to the MCSSAAP, to include electronic and/or hardcopy receipt certification, issue transaction, and certified annual serialized small arms/light weapons inventory reports with supporting documentation, will be retained for for a period of three years in accordance with reference (d).

18. Special Instructions. It is not possible to anticipate all situations that may arise relevant to the MCSSAAP. Any situation that arises which is not covered by the provisions of this order will be referred to HQMC (LPC) for guidance/resolution by the SAEA.

19. Special Coordinating Instructions

a. Reporting recovery of small arms/light weapons. When an individual becomes separated from his/her weapon and the weapon is recovered, the following guidance applies:

(1) Weapon belongs to member of recovering unit: Turn weapon into the unit armory and validate that weapon is accounted for on unit property records. Ensure a "recovered" MLSR is submitted, thus finalizing the previously submitted MLSR.

(2) Weapon does not belong to the member of recovering unit: Turn the weapon into the recovering unit's armory and notify the supply officer. Execute a Recovered MLSR report in accordance with reference (d). Add the weapon to the appropriate armory SASSY or GCSS-MC CMR account. NSWC, Crane will review the MLSR report submission to determine the last reported owning unit for the weapon and initiate notification to the MARCORLOGCOM SAEA. The SAEA shall coordinate with the unit and facilitate corrections to property records. The recovering unit will maintain ownership of the weapon or request disposition instructions from higher headquarters.

b. Letters of Transmittal will not be used as supporting documents to authorize a change to Marine Corps Registry at NSWC, Crane or SASSY/GCSS-MC files.

c. Correspondence with NSWC, Crane. All correspondence with NSWC, Crane will contain the unit's name, DoDAAC and current unit point of contact information. Serial numbers will be typed, legible, and without error, per

reference (g). All documentation must illustrate a clear/legible serialized list, in order to reduce the possibility of processing errors at NSWC, Crane.

d. Annual NSWC, Crane Small Arms/Light Weapons Verification Reports. Per reference (e), units will reconcile and submit annual NSWC, Crane Small Arms/Light Weapons Verification reports within 45 days of the NSWC, Crane cover letter date. A signed verification report, along with all supporting documents and attachments, will be sent by e-mail (scanned doc) to: [cran\\_annual@navy.mil](mailto:cran_annual@navy.mil), U.S. Mail (FEDEX/DHL) to: Commander, NSWC CRANE, Code JXNP, 300 Highway 361, Bldg 3422, Crane, IN 47522-5001, or facsimile to NSWC, Crane at (Comm: (812) 854-1221 or DSN 482-1221). NSWC, Crane will notify MARCORLOGCOM when any Marine Corps unit is in a delinquent status. Delinquent units will also be identified on the Crane website under the "Annual Verification" tab. All units in possession of reportable small arms/light weapons are required to submit an Annual Small Arms/Light Weapons Verification Reports regardless of status (eg: deployed, home station, etc).

e. Temporary Loans. Temporary loan of small arms/light weapons is highly discouraged. As Commanders deem necessary, temporary loans may be executed for periods not to exceed 30 days. Requirements that are known to exceed 30 days will be processed as equipment redistributions to include the appointment of responsible officers and the establishment of a SASSY or GCSS-MC CMR account. Under no circumstances will small arms/light weapons be temporarily loaned to support a deploying Marine Air-Ground Task Force (MAGTF).

f. Monthly Serialized Inventories. Historically, NSWC, Crane files have not been used, nor required, to conduct monthly inventories. However, use of unit asset information from NSWC, Crane during monthly inventories is critical to reconciling reporting errors to the National Registry. Access to the NSWC, Crane on-line registry is restricted to users with PKI capability. Supply officers/chiefs shall request access to enable them to search/query weapons serial numbers throughout the Marine Corps' registered inventory.

g. Missing, Lost, Stolen, Recovery (MLSR). Prior to submitting a MLSR report, units should access available tools to research loss or recovery, but in no case should submission of the initial report exceed 48 hours. If ownership cannot be identified within 48 hours, the weapon will be added to the recovering unit's MAL and the serial number accounted for on the appropriate CMR. The NSWC, Crane website provides the ability to query the registry by weapon serial number to determine the current or last known holder of the weapon. This research option may negate the necessity for a MLSR report submission if possession/accountability can be determined and unit representatives confer and are able to verify information in NSWC, Crane repository. Due to circumstances that may be out of the unit's control (NCIS investigations, etc) that would preclude the timely finalization of MLSRs, the initiating unit in these cases, shall provide a 45, 90, 150 and 180 days supplemental MLSR in order to maintain visibility of the current circumstances regarding that MLSR. On all supplemental MLSRs, the unit shall reference the initial MLSR and any other associated reports submitted on the same incident by report number, date time group (DTG), or correspondence identification.

20. Coordinating Instructions

a. Commanders deployed in support of Overseas Contingency Operations (OCO), who shall be separated from their Remain-Behind Equipment (RBE), shall be formally relieved of their accountable officer responsibilities for RBE. Regulations for succession to command are established in paragraph 1007 of the Marine Corps Manual. Accountable officer responsibilities are inherent to command and require an additional level of authority as follows and will adhere to the small arms/light weapons reporting time standards identified previously.

(1) The MSC or next higher authority will ensure accountable officer responsibilities are properly assigned for the management of the RBE account.

(2) The outgoing accountable officer will issue a letter of certification of relief reporting the status of supply operations to the interim accountable officer. The interim accountable officer will be empowered to execute equipment accountability procedures for the RBE Department of Defense Activity Address Code (DoDAAC).

b. Units deployed in support of OCO, prior to Relief in Place/Transfer of Authority (RIP/TOA), must ensure actions are taken to clear the Supply and NSWC Crane records of all deploying/redeploying serialized small arms/light weapons (excluding crew-served weapons, which do not rotate with individual Marines).

(1) When a unit is deployed or redeployed and not replaced, actions will be taken to ensure all Supply and NSWC Crane records are cleared.

(2) Ensure that transferred serialized small arms/light weapons are removed from the home station Mechanized Allowance List (MAL), serial numbers removed from the Consolidated Memorandum Receipt (CMR), removed from the home station DoDAAC in the small arms/light weapons registry and accounted for on the gaining command's deployed DoDAAC MAL, CMR(s), and DoDAAC small arms/light weapons registry account. Deploying units will complete and document a serialized small arms/light weapons reconciliation between their MAL, CMR(s), and the Marine Corps Registry, 45 days prior to deployment, and establish the home station RBE account and accountable officer at this time.

c. Attachments. Attachments include all individual augmentees (IA) or any unit attachments, whether active or reserve (i.e., platoon, battery, company, squadron, etc.). Under normal circumstances, attachments shall report to gaining units with individual weapons, rifle combat optics, night vision goggles, etc. In the event the parent command cannot provide individual weapons, the gaining command's MSC shall coordinate sourcing.

d. Accompanying a Unit Deployment. Individual weapons will be provided by the gaining command when an IA joins the deploying unit prior to deployment to Theater. IAs shall not bring weapons from their parent command. The gaining unit will source equipment (i.e. weapons) requirements internally and identify shortfalls to their respective MARFOR Headquarters. The MARFOR Headquarters will identify shortfalls to MARCORLOGCOM and MARCORSYSCOM for action/global sourcing. In the event the gaining unit cannot source all required individual weapons (e.g.: a large attachment), a transfer/redistribution of required weapons will be coordinated between the

gaining and providing units. Weapons will be transferred to the gaining unit using a redistribution transaction and the shipment will be reported to NSWC, Crane as an issue transaction placing that weapon into an in-transit status. Deploying units will receipt for weapons under the home station Activity Address Code (AAC) via a SASSY or GCSS-MC Document Identifier Code (DIC) D6A and submit the receipt confirmation within 48 hours of receiving the weapon to NSWC, Crane in order to close the transaction. Upon deployment into theater, the IA weapons will be transferred in SASSY or GCSS-MC by the home station AAC to the deployed AAC. The home station AAC will submit an issue transaction to NSWC, Crane effectively putting that weapon into an in-transit status. Upon arrival at the deployed AAC, the deployed AAC will receipt for the weapon and will forward receipt confirmation to NSWC, Crane which will close the transaction and place that weapon on the accountable records of the deployed AAC for Crane reporting purposes. Upon return to CONUS, a like number of weapons provided to the gaining unit to support their IA detachments will be returned to the parent command using the same procedures listed above. Command adjustments of HQMC allowances will not be utilized (this policy exempts units from requisitioning deficiencies as small arms/light weapons will be returned to the unit post deployment).

e. Joining a Forward-Deployed Unit. IAs will travel without a weapon when first reporting to the gaining command's Remain Behind Equipment (RBE) custodian at home station. Prior to moving forward, IAs will obtain a weapon by one of two means:

(1) The RBE custodian will coordinate the redistribution of the weapon to the deployed unit DODAAC. An issue transaction will be forwarded to the Crane Registry placing that weapon in an in-transit status. When the IA arrives at the deployed unit, the deployed unit will receipt for the weapon and will forward receipt confirmation to NSWC, Crane which will close the transaction and place that weapon on the accountable records of the deployed AAC for Crane reporting purposes.

(2) In the event RBE custodian cannot source weapon(s), the IA parent command will source the weapon(s). The parent command will transfer the weapon to the gaining command RBE account and submit the issue transaction to the Crane Registry. The gaining command RBE custodian will receipt for weapon(s), and then transfer weapon to gaining commands deployed AAC. The gaining command RBE custodian will report receipt of IA weapon from the parent command and the issue of the weapon to the deployed AAC to NSWC, CRANE. A copy of the transfer request will be provided to the IA parent command. When the weapon arrives at the deployed AAC, receipt confirmation will be forwarded to the Crane Registry and will be maintained on the deployed unit's account until the IA re-deploys to parent command at which time the chain of custody will be documented to include Crane reporting. Command adjustments of HQMC allowances will not be utilized.

(3) IAs assigned to Theater of Operations. Individual weapons will be provided by in-theater joint deployment/distribution operations centers using a Memorandum Receipt For Individual Weapons and Accessories (NAVMC 10576), and Weapons Custody Card (NAVMC 10520). When departing theater of operations, IAs will return their weapons to the In-theater joint deployment/distribution operations centers. SASSY or GCSS-MC/NSWC, MCSSAAP Reporting for weapons maintained by the In-theater joint

deployment/distribution operations centers is a Combatant Commander's responsibility.

(4) Transition Teams. Transition Teams include Afghanistan National Army Embedded Training Teams (ANA ETT), and smaller miscellaneous OEF detachments deploying to locations where there is no major Regional Command to attach to (i.e. OEF Philippines, EOD Team assignments, etc.). Executing unit will appoint a Responsible Officer (RO) and will sub-custody all serialized small arms/light weapons via CMR. Deployed CMRs will be signed by the RO at least 10 days prior to departure. The RO will provide situation reports (SITREPS) to MEF forward and executing unit (via SIPR email) anytime there is a change in equipment/personnel status, i.e. loss, exchange, Recoverable Item Report (WIR), personnel cross-deck/extension, etc. SITREPS will provide sufficient information to justify status change.

f. Combat Loss. Guidance provided in this directive for small arms/light weapons supercedes guidance provided for small arms/light weapons in MARADMIN 264/04.

(1) Loss of small arms/light weapons which occur during Combat operations shall be processed per references (d), (e) and (i). In order to drop a weapon designated as a combat loss from unit Crane accounts, a copy of the WIR request and response, MLSR (if required), along with picture(s) and copy of investigation, if available, and the (SASSY/GCSS-MC) signed DD1348-1, shall be provided to NSWC, Crane.

g. Combat Loss Adjustments. Combat losses, wherein the weapon serial number could not be physically sighted due to weapon being unrecoverable (IED explosion, etc.), shall be dropped from the property accounting records utilizing a (D9Z) Miscellaneous Loss transaction, (referencing the MLSR). If disposition instructions required the unit to ship the weapon back to MCLC, Albany or Barstow, appropriate (D7P) transaction shall be inducted.

National Stock Numbers to be Reported

<u>NSN</u>	<u>Nomenclature</u>
1005-00-000-1122	RIFLE 30CAL SPRINGFIELD M1903
