1. Purpose. To cancel the Fiscal Year 2015 Marine Corps Bulletin (MCBul) 3000 and publish the FY16 MCBul 3000 policy with Table of Readiness Reportable Ground Equipment, per references (a) through (e).

2. Summary of Revision. Input for the FY16 MCBul 3000 was received from the Marine Forces (MARFORs), Supporting Commands, Marine Corps Combat Development Command, Combat Development and Integration (CD&I), Marine Corps Logistics Command (MARCORLOGCOM), Marine Corps Systems Command (MCSC), as well as the Operational Advisory Groups (OAGs). This year's MCBul 3000 consists of 221 Principal End Items (PEI), with 80 items designated as Mission Essential Equipment (MEE).

3. Background

a. The intent of the MCBul 3000 is to capture the best sampling of equipment that represents the Marine Corps' ability to perform its mission. References (b) and (c) establish the criteria for reporting the level and condition of unit equipment. Reference (b) provides the procedures for nominating and reporting Marine Corps ground equipment. This Bulletin identifies the readiness reportable PEI and MEE selected for reporting equipment status within the Marine Corps. In accordance with reference (c), readiness reporting will be accomplished in the Defense Readiness Reporting System - Marine Corps (DRRS-MC).

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

b. Definitions

(1) Principal End Items (PEI). "Those items that have been nominated by the MARFORs, Supporting Commands (CD&I, MCSC, MARCORLOGCOM), the applicable Headquarters Marine Corps advocates and the Operational Advisory Groups (OAGs). The designated Total Force Structure Management System (TFSMS) data element for PEI Readiness Reportable is 'R'. The items selected are of sufficient range to provide an adequate measure of overall equipment status and/or capability for the MARFORs. To preclude gross distortions of equipment status, items whose serviceability/operational capability undergo frequent inspection or which can be readily replaced by the unit's first source of supply are not included in this list (e.g., rifles, pistols). Non-reparable items are also excluded from readiness reporting per paragraph 4a(2)(b)1 of reference (b)."

(2) Mission Essential Equipment (MEE). "A subgroup of PEI... MEE are items of equipment whose availability is essential and indispensable for the execution of the Mission Essential Tasks (METs) of the unit in support of a Combatant Commander. The designated TFSMS data element for MEE Readiness Reportable is 'M'. Items designated as MEE are of such importance that they are subject to continuous monitoring throughout the Department of Defense per paragraph 4a(2)(b)2 of reference (b)."

c. Enclosure (1) is the updated Table of Readiness Reportable Ground Equipment.

d. Enclosure (1) also contains the revised assignments of the Weapon System Group Codes. Per reference (d), the Defense Logistics Agency's (DLA) Weapon System Support Program's (WSSP) was established to enable the services to identify DLA managed parts required to ensure adequate supply posture in support of organizational readiness objectives.

e. Enclosure (2) summarizes the additions, deletions, and changes to the FY16 list of readiness reportable equipment.

f. Enclosure (3) is a current table of Weapon System Management telephone numbers by Functional Area (FA) Code, and Weapon System Codes (WSC). Commanding General, Marine Corps Logistics Command (CG MARCORLOGCOM) and Commander, Marine Corps Systems Command use these codes to facilitate total life-cycle management of items contained in this Bulletin, and to assist with the management/evaluation of materiel readiness trends.

4. Action

a. All Marine units, to include Operating Forces (Active and Reserve), Supporting Establishments (i.e., MARCORLOGCOM, bases, posts, and stations, Blount Island Command) and Strategic Programs (i.e., Maritime Prepositioning Force, Marine Corps Prepositioning Program - Norway) will report the status of ground equipment listed in enclosure (1) of this Bulletin.

b. All of the readiness reportable equipment listed in enclosure (1) will be tracked and reported within an approved Accountable Property System of Record, to include: Global Combat Support System - Marine Corps (GCSS-MC), Stock Control System and Defense Property Accounting System. Units identified by Deputy Commandant for Plans, Policies and Operations (DC PP&O) as readiness reportable units will report this equipment per references (b) and (c) in DRRS-MC.

c. Task-organized units/Marine Air-Ground Task Forces (MAGTFs), e.g., Marine Expeditionary Units, will use reporting procedures per references (b) and (c). Equipment that is listed as MEE for joining attachments will be reported by the task-organized unit/MAGTF as MEE. For example, Howitzers and Medium Tactical Vehicle Replacements for an artillery battery and Light Armored Vehicles (LAVs) for a Light Armored Reconnaissance Company are to be reported by the gaining task-organized unit/MAGTF as MEE items.

d. Reserve units activated and joined to a like active unit will report per references (b) and (c). Equipment listed as MEE for the gaining active unit will be listed as MEE for the activated reserve unit.

e. DC I&L will update the readiness reportable flag indicators resident in the TFSMS Item Data File, as reflected in enclosures (1) and (2). Additionally, this Bulletin will be reviewed semiannually and changes published accordingly. The intent is that major reviews be conducted biannually in accordance with Marine Requirements Oversight Council (MROC) guidance.

f. Commander MCSC shall ensure all data within TFSMS is updated so that a WSC can be automatically generated for those weapon systems which meet the criteria as stated in reference (d), and establish formal equipment WSC and FA Code validation and reconciliation processes and procedures to support OAG and MAGTF MET List capability reviews.

g. CG MARCORLOGCOM will update the GCSS-MC Table of Authorized Materiel and ID Standards File, as required or directed in support of enclosures (1) and (2).

h. CG MARCORLOGCOM shall ensure all weapon systems listed in enclosure (1) are properly registered in both the Item Application System and the DLA WSSP. Once the weapon systems are registered, MARCORLOGCOM shall provide DLA Weapon Item Data Transactions (i.e., WS1 or WS3) to the appropriate DLA Defense Supply Centers as required.

i. CG MARCORLOGCOM will establish formal arrangements for the periodic validation and reconciliation of weapon systems applications files for DLA managed items.

j. CG MARCORLOGCOM will ensure that a semiannual review of Weapons System Support Codes is performed and that the current status of weapons systems is reflected in the DLA Weapons Systems Support Program Database.

k. Commander MCSC (C4IIS) will ensure the next MAGTF Data Library and GCSS-MC maintenance release reflect the proper readiness flag indicators and Table of Authorized Materiel Control Number (TAMCN) allowances for the Using Units.

l. DC CD&I will ensure TAMCNs designated in TFSMS as readiness reportable shall not be zeroed out without DC I&L and DC PP&O approval.

5. Administration & Logistics

a. Electronic copies of this Bulletin can be found on the official Marine Corps Publications Electronic Library
<http://www.marines.mil/News/Publications/ELECTRONICLIBRARY.aspx>.

b. Records created as a result of this Bulletin shall be managed according to National Archives and Records Administration approved dispositions per reference (e) to ensure proper maintenance, use, accessibility and preservation, regardless of format or medium.

c. The generation, collection or distribution of personally identifiable information (PII) and management of privacy sensitive information shall be in accordance with the Privacy Act of 1974, as amended, per reference (f). Any unauthorized review, use, disclosure or distribution is prohibited.

6. Reserve Applicability. The Bulletin is applicable to Marine Forces Reserve.

M. G. DANA
Deputy Commandant for
Installations and Logistics
