MCCS T&R MANUAL

CHAPTER 6

BASIC MARINE OFFICER

**6000. PURPOSE.** This chapter provides standardized training and education events required to train newly commissioned Marine Officers. In training junior Marine Officers, particular emphasis is placed on the duties, responsibilities, leadership and warfighting skills required of a provisional Rifle Platoon Commander and company grade officer in the operating forces. The universal concept that effective leaders must be able to assess situations, determine the pros and cons of various decisions, make a decisive plan that is communicated effectively, and supervise the plans execution is emphasized and exercised throughout the course. Newly commissioned officers are expected to embrace our core values and embody the Marine Attributes in every facet of their personal life and professional duties.

Although these events are utilized to develop programs of instructions for entry level training, the majority of the skills are required to be sustained by all Marines per reference (b).

**6001. EVENT CODING.** Events in the T&R Manual are depicted with a 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

a. Field one - Each event in this chapter begins with "MCCS, TBS, or 0300." Events beginning with MCCS indicate that the event pertains to Marine Corps Common Skills. The "TBS" prefix means that the event applies directly to the TBS environment. Events beginning with "0300" are "imported," without any changes, directly from the Infantry T&R Manual. The purpose of this is to use events from other T&R Manuals which were created by the occupational field's subject matter experts.

b. Field two - This field is alpha characters indicating a functional area. The Functional Areas for this chapter are:

ATFP - Anti-Terrorism/Force Protection  
CBRN - Chemical Biological Radiological Nuclear Defense  
CMBH - Combat Hunter  
COMM - Communications  
CSW - Crew Served Weapons  
DEF - Defensive Measures  
DEMO - Demolitions, Munitions and Specialized Munitions  
IED - Improvised Explosive Device Defeat  
IND - Individual Actions  
JOPS - Joint Operations  
LDR - Marine Corps Leadership  
LMG - Light Machinegun  
M16 - M16 Series 5.56mm Service Rifle  
M203 - M203 Grenade Launcher  
MAGT - Marine Air Ground Task Force Organizational Knowledge  
MED - Medical  
MOUT - Military Operations on Urban Terrain

OPER - Operate Equipment and Systems  
 OPS - Operations  
 OPTS - Optics  
 PAT - Scouting and Patrolling  
 TAN - Tan Belt Requirements  
 UCMJ - Uniform Code of Military Justice  
 UNIF - Marine Corps Uniforms, Clothing and Equipment  
 VALU - Value Subjects  
 WPNS - Weapons

c. Field three - This field is created by the FLC to provide numerical sequencing.

**6002. ADMINISTRATIVE NOTES.** Each Event may contain a paragraph that describes internal and external Support Requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the Event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those Events that cannot be accomplished at a certain location due to lack of ranges. There are several simulations available across the Marine Corps that are focused on training at the small unit tactical level. Those tasks that can be trained through the use of simulation are identified in this chapter. See Appendix D for more detail on availability and use of specific simulations.

**6003. INDOOR SIMULATED MARKSMANSHIP TRAINER.** ISMT's are found across the entire Marine Corps and have been shown to successfully improve live fire weapons training. It is recommended that before any live fire event, the ISMT is utilized in order to familiarize Marines with the weapons and conduct of the range.

APPENDIX A

GLOSSARY

Terms in this glossary are subject to change as applicable orders and directives are revised. Terms established by Marine Corps orders or directives take precedence after definitions found in Joint Pub 1-02, DOD Dictionary of Military and Associated Terms.

**A**

**After Action Review (AAR).** An AAR is a professional discussion of training events conducted after all training to promote learning among training participants. The formality and scope increase with the command level and size of the training evolution. For longer exercises, they should be planned for at predetermined times during an exercise. The results of the AAR shall be recorded on an after action report and forwarded to higher headquarters. The commander and higher headquarters use the results of an AAR to reallocate resources, reprioritize their training plan, and plan for future training.

**B**

**Basic Marine.** A Basic Marine is one who has embraced our core values and is transformed by our Corps' shared legacy. A basic Marine represents the epitome of personal character, selflessness, and military virtue.

**C**

**Common Competencies.** A common competency is a specific range of knowledge, skills, attitudes (KSA) expected of a given grade that are directly supported by and aligned to Marine Corps Common Skills. The service level Common Competency for each grade represents intangible ideals with little or no conditional environment. They are broad, intuitive and universally accepted for all Marines of a particular grade regardless of MOS. The Common Competencies are supported by service level education standards (Outcomes) and service level MCCS training and readiness events.

**Competency.** A competency is a specific range of KSAs expected of a Marine. The Competency is acquired through the blending of training, education and experience.

**D**

**Department of Defense Identification Code (DODIC).** The DODIC is the four-digit code assigned by the Defense Logistics Services Center (DLSC) and it identifies ammunition and explosive items.

**E**

**Educational Objective.** An educational objective is a concise statement that describes what students are expected to learn as a result of an individual class or lesson within a program or course of instruction. Educational

10 May 2012

objectives are the subordinate elements that must collectively be learned to accomplish the broader expectations of a Learning Outcome.

**Enabling Learning Objective.** An ELO is a subordinate learning objective which describes the behavior of prerequisite knowledge and skills necessary for a student to perform a Terminal Learning Objective or steps of an individual training [event].

#### F

**Functional Areas.** Functional areas provide the organization of tasks on a task list into groups of interrelated skills. Functional areas in T&R development are expressed in terms of easily recognizable acronyms i.e., COMM - Communications.

#### I

**Individual Training Readiness.** The individual training readiness of each Marine is measured by the number of individual events required and completed for the rank or billet currently held.

#### L

**Learning Objective.** A learning objective is a statement of the behavior or performance expected of a student as a result of a learning experience, expressed in terms of the behavior, the conditions under which it is to be exhibited, and the standard to which it will be performed or demonstrated.

**Learning Outcomes.** A learning outcome is a concise statement that describes what students are expected to learn as a result of completing a program or course of instruction. The statement begins with an action verb that indicates the desired level of learning (in accordance with accepted educational taxonomies) and corresponding type of assessment. The action verb is followed by an explanation of the specific subject matter to be learned.

#### M

**Marine Attributes.** Marine Attributes are the manifestation of competencies and traits required of all Marines to meet the challenges of the present and future operational environments. The five attributes are:

- **Exemplary Character.** He/she has a clear understanding that being a Marine brings with it a "special trust and confidence," and the highest expectations of the American people. He/she is devoted to the Corps values of honor, courage, and commitment, and possesses a moral compass that unerringly points to "do the right thing" as an ethical warrior.
- **Physically/Mentally Tough.** Imbued with a warrior spirit and able to thrive in a complex and chaotic environment; able to persevere despite the obstacles to mission accomplishment. Possesses the self-discipline and will to push past preconceived limits
- **Warfighter.** A competent combat leader that is grounded in basic infantry skills, and characterized by sound judgment and aggressiveness in execution. Educated in the fundamentals of maneuver warfare,

10 May 2012

tactics, combined arms, and time-tested principles of battle. Maintains an offensive mindset throughout; proactive not reactive.

- **Decide/Act/Communicate.** Can think critically and arrive at an acceptable decision based on sound tactical thinking within their commander's intent. Communicates effectively orally and in writing in tactical and administrative situations with an emphasis on issuing clear, meaningful orders and guidance. Has a bias for action; seizes the initiative and acts with boldness and determination on available information.
- **Leadership.** Embraces the "exceptional and unremitting" responsibility to one's Marines and their families. Inspires and instills confidence in his/her Marines during times of adversity; sets the example in all things and at all times. Adheres to, and enforces standards regardless of time of day, location, or duty status, and treats all Marines and Sailors with dignity and respect. Dedicated to a lifetime of study and learning about the profession of arms.

**Marine Corps Training and Readiness (T&R) Programs.** The Marine Corps T&R Program is the Marine Corps' primary tool for planning and conducting training, for planning and conducting training evaluation, and for assessing training readiness. The purpose of the T&R Program is to provide the commander the appropriate/relevant tasks for all occupational fields within all aviation and ground communities. The T&R Program provides the focus and standardization that enable commanders to train their units in accordance with the training principles more efficiently and effectively. T&R events serve as the central components of the program and are developed by Subject Matter Experts (SME) from the operating forces, supporting establishment, and other stakeholders.

**Marine Rifleman.** A Marine Rifleman is a physically fit, mentally hardened, and offensively minded warrior, skilled in the disciplined application of force and possessing the moral courage to make sound decisions and withstand the rigors of combat.

**Marine Unit Leader.** A Marine unit leader is a physically fit, tactically and technically proficient warrior of high moral character with a bias for action possessing the courage to make ethically sound decisions and capable of properly preparing and leading Marines to successfully accomplish the unit's mission in combat.

**Military Occupational Specialty (MOS) Competency.** A MOS competency is a specific range of the KSAs expected of an individual by grade within an MOS. The MOS Competency should focus on MOS foundational KSAs universally accepted as a core responsibility within the Occupational Field.

**Mission Essential Task (MET).** A MET is a collective event in which a unit or organization must be proficient to be capable of accomplishing an appropriate portion of its wartime mission.

**Mission Essential Task List (METL).** The METL is a list of mission tasks selected by a commander that are deemed essential to mission accomplishment and defined using the common language of the Universal Joint Task List (UJTL), Universal Naval Task List (UNTL), Marine Corps Task List (MCTL) and T&R Manuals in terms of task, condition and standard. The METL is the

10 May 2012

commander's tool for maintaining focus on mission accomplishment and forms the foundation upon which readiness reporting is made.

## O

**Operational Risk Management (ORM).** ORM is the process of dealing with risks associated with military operations and training. It includes risk assessment, risk decision-making, and implementation of risk controls. Marines at all levels will incorporate ORM in their planning and execution of training to ensure that training provides the realism needed to fulfill Marine Corps requirements while minimizing the inherent risks.

**Outcome.** An outcome is the service level educational standard that defines the specific manifestation of higher order knowledge, skills, attitudes and leadership traits that support a Competency. Outcomes are intangible with context (being a Marine), and are not singularly observable and require subjective evaluation over time.

## P

**Performance Step.** Performance steps are included in the components of an Individual T&R Event. They are the major procedures (i.e., actions) a Marine unit must accomplish to perform an individual event to standard. They describe the procedure the task performer must take to perform the task under operational conditions and provide sufficient information for a task performer to perform the procedure (may necessitate identification of supporting steps, procedures, or actions in outline form). Performance steps follow a logical progression and should be followed sequentially, unless otherwise stated. Normally, performance steps are listed only for 1000-level individual events (those that are taught in the entry-level MOS school). Listing performance steps is optional if the steps are already specified in a published reference.

**Pre-requisite Event.** Pre-requisites events are the academic training and/or T&R events that must be completed prior to attempting a higher level T&R event or before embarking to a training center (e.g., MAGTTC 29 Palms) for advanced collective training.

**Professional Military Education (PME).** PME is the lifelong study of the military profession. PME is designed to equip Marines with the skills, knowledge, confidence, understanding, and vision to exercise sound military judgment and decision-making in battle.

## S

**Systems Approach to Training (SAT).** SAT is an orderly process for analyzing, designing, developing, implementing, and evaluating a unit training program that ensures the unit acquires the knowledge and skills essential for the successful conduct of its wartime mission.

## T

**Terminal Learning Objective (TLO).** A TLO is a statement of the behavior or performance expected of a student as a result of a learning experience, expressed in terms of the behavior, the conditions under which it is to be exhibited, and the standard to which it will be performed or demonstrated.

10 May 2012

**Training Plan.** A training plan is a training document that outlines the general plan for the conduct of individual and collective training in an organization for specified periods of time. The three types of training plans are long-range, mid-range, and short-range plans.

**Training and Readiness (T&R) Event.** A T&R event defines a [performance driven] training/education requirement in terms of a task, condition (under which the task must be performed), and standard (measure of success).

U

**Unit Training Management (UTM).** Unit training management is the use of the systems approach to training (SAT) and Marine Corps training principles in a manner that ensures commanders make the most efficient use of limited training time and resources by focusing training priorities of the unit on skills required to accomplish its wartime mission. UTM governs the major training activity of the Marine Corps and applies to all echelons of the Total Force.

SIMULATION

Listed in this appendix are applicable simulations available to improve training for both individual Marines and unit training under the Marine Corps Common Skills Program.

1. **Deployable Virtual Training Environment (DVTE)**: DVTE is a first person skills sustainment trainer that can be used to train Marines from the individual to the battalion staff by using a simulation network with reconfigurable workstations capable of emulating a vast array of training scenarios. DVTE is made up of two components; the first is the Infantry Tool Kit (ITK) which contains several Tactical Decision-making Simulations (TDS). The other half of DVTE is the Combined Arms Network (CAN). DVTE is currently being fielding down to the regimental and MEU level. These suites will be maintained at the regimental level for use by subordinate units. Support for the training and hardware for DVTE will be accomplished locally at each MEF by a DVTE team from the MEF Sim Center. Below is a list of the DVTE applications that support the identified T&R standards.
  - a. **Close Combat Marines (CCM)**: CCM is a real-time strategy TDS that teaches tactics at the squad, platoon, and company levels. The target audience is non-commissioned officers (NCOs), staff NCOs, and junior officers. It is designed to supplement field exercises, allowing instructors to create their own scenarios. Available for download at:  
<https://205.110.216.207/mtsd/default.aspx>
  - b. **Virtual Battlefield System 1 (VBS1)**: VBS1 is designed as an interactive, three-dimensional synthetic environment in which small unit tactics may be practiced among team members. Photo-realistic terrain, user-definable mission scenarios, and variable environmental conditions enhance the team training experience. VBS1 provides the ability to operate a myriad of land, sea, and air vehicles across large outdoor terrains and allows free-play within scenario based training missions.
  - c. **Recognition of Combatants - Improvised Explosive Device (ROC - IED)**: ROC - IED is a computer-based training tool designed to improve awareness and recognition of IEDs.
2. **Indoor Simulated Marksmanship Trainer (ISMT)**: is an interactive weapons simulator that provides enhanced marksmanship, weapons employment, and tactical decision-making training for a variety of small arms and crew-served weapons. It consists of demilitarized infantry weapons that are instrumented with lasers to enable engagement in various video and computer generated scenarios. The ISMT has the capability of training with actual optics being fielded currently by the Marine Corps.
3. **Combat Convoy Simulator (CCS)**: CCS, formerly known as VCCT (Virtual Combat Convoy Trainer), is a mobile simulation system where six manned M1114 high mobility multi-purpose wheeled vehicle (HMMWV)/MTRV virtual

simulators are networked for real-time, fully interactive collective training at the convoy level while embedded into a computer-generated environment. A CCS suite provides training to individual, crew, and platoon personnel (up to 30 individuals at a time) covering the skills and knowledge of crew through platoon-level doctrine for the implementation of combat convoy operations. Each HMMWV/MTVR crew is required to communicate, maintain situational awareness, and acquire targets while moving at realistic highway speeds in the convoy's virtual environment. Additionally, a CCS suite provides Marines with the capability to identify, engage, and destroy the enemy "on the move" in an ambush scenario, while reinforcing the driver disciplines required for successful convoy operations. For more information on scheduling training with CCS, please contact your local Sim Center.

APPENDIX D

CLASS V AMMUNITION REQUIRED FOR MCCS EVENTS

1. The Class V listed in this appendix is required to support the training of personnel attending Entry Level Training (ELT) at the Formal Learning Centers (FLC) located at MCRD, OCS, SOI and TBS. The below charts depict the total ammunition requirement for an individual to train to standard on events contained in this T&R Manual. Ammunition totals were calculated utilizing individual training events contained in this manual, unless otherwise specified.

a. MCRD (Basic Marine). Certain DODICs are calculated by determining a "per recruit" usage factor based on past expenditures, current allocations, and the total optimum number of recruits that can be trained each year. The "per recruit" usage factors for the following DODIC are as follows:

A060: .007 rounds/recruit  
K765: .12 units/recruit  
L312: .09 units/recruit  
L495: .14 units/recruit  
L598: .18 units/recruit

2. Table A is a comprehensive listing the Class V used by the ELT FLCs (Ammunition prices are derived from the FY 11 Total Munitions Requirement).
