

U. S. Office of Personnel Management Data Breach Mitigation Timeline and Resources

OPM has begun notifying affected current and former federal employees on Monday, June 8. The notifications will continue through June 19, 2015 (or until complete). For current Federal employees, notifications will be sent via email, and for former Federal employees or retirees, they will be sent First Class mail by U.S. Postal Service.

The email being sent by OPM contains active links to various resources. Unfortunately, OPM did not provide the vendor with digital signature certificates to ensure content and source integrity of the email. As a result, and in order to assist the USMC personnel in identifying potential phishing attacks, HQMC C4 Cybersecurity (CY) division is providing a copy of the actual letter being sent by the [OPM](#). In the meanwhile, all USMC personnel should also become familiar with the fact sheet issued by the Office of Civilian Human Resources ([OCHR](#)) which provides detailed information regarding the OPM data breach as well as guidelines in responding to potential risks reflected in the incident.

For up-to-date information released by the OPM, please visit the OPM website for additional information and resources - [U.S. Office of Personnel Management Website](#)

For additional questions or concerns regarding the incident, please contact the POC's provided by the OPM to obtain direct answers and support. For questions or concerns regarding USMC roles and course of actions, please contact HQMC C4 CY at C4_CY_Privacy@usmc.mil.
