DDRS B Trial Balance - FY08 Q1**

Title:	FY08 Q1 DDRS-B Trial Balance
Purpose:	To document the DDRS-B trial balances used for the production of the USMC FY08 Q1 Financial Statements and provide the input files for compilation testing.
Source:	Defense Department Reporting System - Budgetary (DDRS-B)
Scope:	FY08 Q1 DDRS-B Trial Balances for Marine Corps Stand Alone General Fund Financial Statement Appropriations
Methodology:	See Methodology Tab
Summary:	<p>NOTE: All fields in green in this work book were created for analysis purposes.</p> <p>FY08 Q1 TB Full All of the Marine Corps DDRS - B trial balances combined.</p>

**U.S Marine Corps
Financial Statement Compilation
DDRS B Trial Balance FY08 Q1**

Methodology:

All trial balance files were extracted from DDRS per DFAS-KC and DDRS SOP guidance.

The DDRS-B trial balance is only available for extraction one appropriation at a time (0735, 1105, 1106, 1107, 1108, 1109, 1319, 1508, 5095). The DDRS-B trial balance is available in DDRS through the following procedures:

1. Log into DDRS-B and select RWA and Role. The RWA must be the appropriation type, not the general fund.
2. Select the "Reports" menu on the left side of the screen.
3. Select "View/Drill-Down Reports"
4. Select the "Accounting Period" at the top of the screen
5. Select desired appropriation.
6. Select the latest version of the report.
7. Select Trial Balance and run the report.
8. Output options are PDF, Excel, or CV file format. Note: by selecting the account balance on the PDF output format, you can drill down to see the SABRS general ledger accounts behind the amounts.

**U.S Marine Corps
Financial Statement Compilation
DDRS - B Journal Vouchers FY08 Q1**

Title:	FY08 Q1 DDRS - B Journal Vouchers
Purpose:	To document the DDRS - B Journal Vouchers used for the production of the USMC FY08 Q1 Financial Statements and provide the input files for compilation testing.
Source:	Defense Department Reporting System - Budgetary (DDRS-B)
Scope:	FY08 Q1 DDRS - B Journal Vouchers and Undistributed Adjustments (DDRS-B automated FBWT adj) for Marine Corps Stand Alone General Fund Financial Statement Appropriations
Methodology:	See Methodology Tab
Summary:	<p>The following journal voucher files were used to prepare the FY08 Q1 USMC General Fund financial statements:</p> <p>(Note:All fields in green were added for analysis purposes.)</p> <p>DDRS-B JV This Tab contains all DDRS-B journal vouchers (combined shared and nonshared files)</p> <p>DDRS-B Undistributed Adjustments This tab contains all DDRS-B undistributed journal vouches. These journal vouchers are used to offset the SABRS DCAS account balance thereby creating a net adjustment to treasury.</p>

**U.S Marine Corps
Financial Statement Compilation
Journal Vouchers FY08 Q1**

Methodology:

All journal voucher files were extracted from DDRS per DFAS-KC and DDRS SOP guidance.

DDRS - B JVs:

This journal voucher file was combined from individual appropriation files. The data must be filtered for the current fiscal year.

The DDRS-B journal voucher adjustment logs are available in DDRS through the following procedures:

1. Log into DDRS-B
2. Select the proper RWA (ex. 1105 & 1108 is "Kansas City-GF-Mil-Pers").
3. Select the role. You can use either "Basic" or "View Generated Reports."
4. Select Data Entry.
5. Select Consolidated Approved Journal Voucher Log
6. Select the appropriate accounting period.

DDRS - B Undistributed:

The DDRS-B undistributed adjustments logs are available in DDRS through the following procedures:

1. Log into DDRS-B
2. Select the proper RWA (ex. 1105 & 1108 is "Kansas City-GF-Mil-Pers").
3. Select the role. You can use either "Basic" or "View Generated Reports."
4. Select Data Entry
5. Select Undistributed Adjustment Log Consolidated
6. Select the appropriate accounting period.

DDRS - B Adjustment Log Consolidated for: MARINE CORPS - Combined

Accounting Period: 200803

Date: 02/15/2008

**U.S Marine Corps
Financial Statement Compilation
DDRS AFS - FY08 Q1**

Title:	FY08 Q1 DDRS-AFS Trial Balance
Purpose:	To document the DDRS-AFS trial balances used for the production of the USMC FY08 Q1 Financial Statements and provide the input files for compilation testing.
Source:	Defense Department Reporting System - Audit Financial Statements (DDRS-AFS)
Scope:	FY08 Q1 DDRS-AFS Trial Balances for Marine Corps Stand Alone General Fund Financial Statement Appropriations
Methodology:	See Methodology Tab
Summary:	FY08 Q1 TB Full All of the DDRS - AFS Marine Corps trial balances combined.

**U.S Marine Corps
Financial Statement Compilation
DDRS AFS Trial Balance - FY08 Q1**

Methodology:

All journal voucher files were extracted from DDRS per DFAS-KC and DDRS SOP guidance.

The DDRS-AFS trial balance is only available for extraction one appropriation at a time. The DDRS-AFS trial balance is available in DDRS through the following procedures:

1. Log into DDRS-AFS
2. From the main menu, select Input.
3. Select Data Reports.
4. Select the Entity, Sub-Entity, Program Group, and Program Note: There is no option available to run a combined General Fund Trial Balance (Non-shared & Shared). Therefore, to obtain the amounts supporting the MC Statements & Footnotes, the Non-shared & Shared Trial Balances must be combined.
5. For Combined Report of all Non-Shared Appropriations, select:
 - Entity: AT17-Navy General Fund
 - Sub-Entity: Marine Corps
 - Click Level 2 button.
 - Click the Trial Balance button.
 - Click the Run button.
6. For Combined Report of all Shared Appropriations, select
 - Entity: AT17- Marine Corps Stand Alone Import View
 - Sub-Entity: MCS_SA_IV
 - Click Level 2 button
 - Click the Trial Balance button.
 - Click the Run button.

NOTE 1: Once the trial balance is run, certain accounts must be “pulled forward” into the ending balance column. General Ledger accounts 3100, 3310, and 4201 do not show an ending balance. This is due to DDRS-AFS system restrictions. DDRS-AFS restricts changes to these general ledgers accounts, and thus does not report these in the ending balance on the trial balance. These general ledger accounts are beginning balance accounts, meaning that they do not (and aren't allowed to) change during the fiscal year. They only change during the post closing process and have updated amounts during 1st quarter.

NOTE 3: The FY08Q1 TB - Full (combined trial balances) filters out general ledger accounts starting with "F" to show only those that affect the financial statements.

**U.S Marine Corps
Financial Statement Compilation
DDRS - AFS Journal Vouchers FY08 Q1**

Title:	FY08 Q1 DDRS - AFS Journal Vouchers
Purpose:	To document the DDRS - AFS Journal Vouchers used for the production of the USMC FY08 Q1 Financial Statements and provide the input files for compilation testing.
Source:	Defense Department Reporting System - Audit Financial Statements (DDRS-AFS)
Scope:	FY08 Q1 DDRS - AFS Journal Vouchers and DDRS-AFS Beginning Balance Adjustments (data calls) for Marine Corps Stand Alone General Fund Financial Statement Appropriations
Methodology:	See Methodology Tab
Summary:	<p>The following journal voucher files were used to prepare the FY08 Q1 USMC General Fund financial statements:</p> <p>DDRS-AFS JV</p> <p>This tab contains all of the DDRS-AFS journal vouchers (combined shared and nonshared files)</p> <p>DDRS-AFS BB Adjustments</p> <p>This tab contains the DDRS-AFS adjustments Beginning Balances. These adjustments are need to carry forward the prior period beginning balance, adjust the prior period beginning balance, and account for current period adjustments.</p>

**U.S Marine Corps
Financial Statement Compilation
DDRS - AFS Journal Vouchers FY08 Q1**

Methodology:

All journal voucher files were extracted from DDRS per DFAS-KC and DDRS SOP guidance.

Note: Journal Vouchers with the status code of "C" must be removed. These are cancelled JVs and therefore are not included in the financial statements.

DDRS - AFS JVs:

The DDRS-AFS journal voucher adjustment log is available in DDRS through the following procedures:

1. Log into DDRS-AFS
2. Select JV and Adjustments.
3. Select JV Process.
4. Select the Entity, Sub-Entity, Program Group, and Program. Note: There is no option available to run Combined General Fund JV Log (Non-shared & Shared)
5. For Non-Shared Appropriations
 - Entity: AT17- Navy General Fund
 - Sub-Entity: Marine Corps
 - Click the Level 2 button
 - Click on the JV Log box.
 - Click the Run button.
6. For Shared Appropriations
 - Entity: AT17- Marine Corps Stand Alone Import View
 - Sub-Entity: MCS_SA_IV
 - Click Level 2 button
 - Click on the JV Log box
 - Click the Run button

DDRS - AFS Beginning Balance:

Extraction Method

The DDRS-AFS beginning balance import log is available in DDRS through the following procedures:

1. Log into DDRS-AFS
2. Select Input
3. Select Online Input
4. Select Trial Balance Adjustment Log
5. For Non-Shared Appropriations

Approach - DDRS - AFS Beginning Balance

For our processing purposes, we altered the DDRS-AFS Beginning Balance adjustment file as follows:

- Calculated Beginning Balance Field changed to Beginning Balance (BB)
- Imported Beginning Field changed to Beginning Balance (BB)
- Ending Balance Field changed to Beginning Balance (BB)
- Amounts moved to DR/CR fields based on +/- and normal balance.
 - If DR normal balance "+" = Debit, "-" = Credit.
 - If CR normal balance "+" = Credit, "-" = Debit

Other Information about DDRS - AFS Beginning Balance JVs

The DDRS - AFS Beginning Balance Journal Voucher file requires extra fields to be created before input into the SAS program used for financial statement compilation testing. The process uses fields showing "Beginning Balance," "Year to Date (YTD)," and "Ending Balance."

These fields are necessary for processing the financial statements and to show relationships between current year activity and beginning balance. However, the format of the DDRS-B Beginning Balance Journal Vouchers does not display this break out. Further, the DDRS format does not show the credit/debit amounts in the same format as the other files.

Note: Because of the above formatting issues, it was necessary to create the debit/credit fields and the beginning balance/YTD/Ending Balance Fields. All of the other journal voucher files were taken at year to date (normal current year activity).

The Imported Beginning field is used to adjust the beginning balance imported from DDRS-B. The Calculated Beginning Balance is used to adjust the beginning balance that is in DDRS-AFS (prior year ending balance in DDRS-AFS--this is more for beginning balance adjustments rather than carry forward datacall information not included in SABRS). The Ending Balance is used to adjust the ending balance imported from DDRS-B.

Additional information on the DDRS-AFS Trial Balance Adjustment from the DDRS-AFS Manual (https://ddrs.csd.disa.mil/united/html/dr_wp_ip_manual.html#top_of_afs):

-Data may only be recorded in the corresponding columns as indicated by the normal balance indicator. A user cannot record a credit balance for 1010 Fund Balance with Treasury US SGL account since it has a normal debit balance. If there is an abnormal balance in such an account, the user has to use a (-) sign to properly record this transaction.

-If the US SGL account is listed as a B (Beginning Balance) account, then only the debit or credit amount for the Beginning Balance can be changed.

-If the US SGL account is listed as an E (Ending Balance), then only the debit or credit amount for the Ending Balance can be changed.

-If the US SGL account is listed as an E-B (Ending or Beginning Balance), then both the debit and credit amount for the ending balance or beginning balance can be changed.

DDRS - AFS Adjustment Log Consolidated for: MARINE CORPS - Combined

Accounting Period: 200803

**U.S Marine Corps
Financial Statement Compilation
SABRS TB to DDRS B TB Crosswalks - FY08 Q1**

Methodology:

All crosswalk files were extracted from DDRS per DFAS-KC and DDRS SOP guidance.

The SABRS trial balance to DDRS - B trial balance crosswalks are available in DDRS through the following procedures:

1. Select Crosswalk Maintenance
2. Select Feeder Account Crosswalk Report
3. Select Format (Excel or PDF)
4. Select Accounting Period
5. Select Feeder Crosswalk
6. Select the Current Year Indicator
7. Select the Reimbursement/Undistributed Code
8. Click on the Display Report button

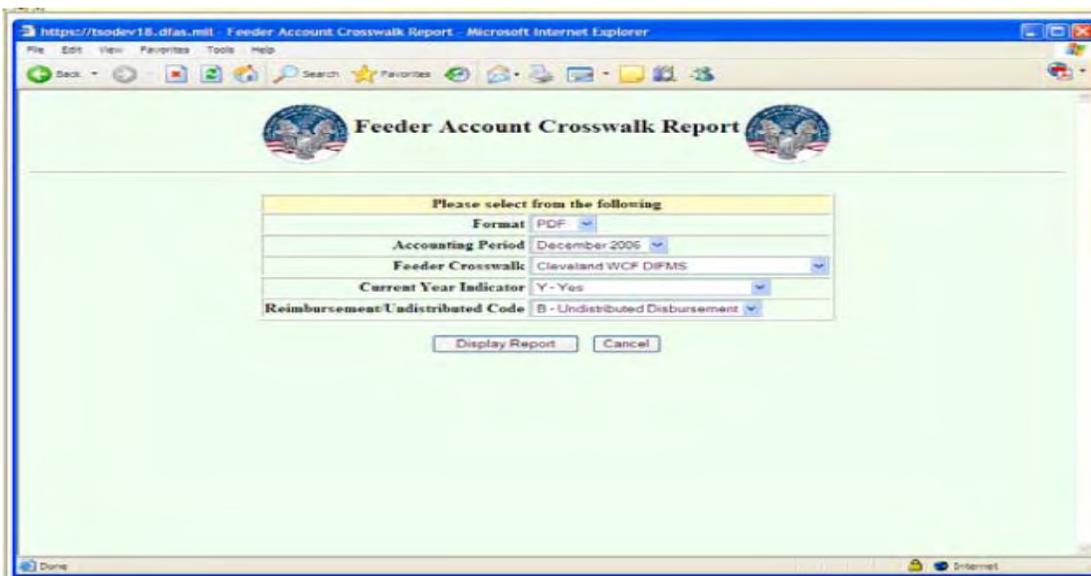

The following current year indicators are available (assume current year is 2005):

- Y = Current year (example, XXXXXXXX or 2005/2005)
- M = Unexpired Multi year that includes the current year (example, 2001/2005, 2003/2007, 2004/2005)
- N = Prior year or Expired (example, 2004/2004, 2000/2004)

The following reimbursement/undistributed indicators are available:

- C = Clearing Accounts (used for all current year not 5095)
- E = Earmarked Funds (for BSYM 5095 only)
- S = Standard (used for all non current year not 5095)

The feeder Crosswalk can be either SABRS or SABRSDCAS. The SABRS crosswalks are all regular trial balance accounts. The SABRSDCAS crosswalks are for DCAS (SABRS "x") accounts.

Feeder Account Crosswalk

RWA: Kansas City-GF
 Feeder Crosswalk: SABRS Individual
 Current Year Indicator: M - Multiple year but not first year
 Reimbursement/Undistributed: C - Clearing Accounts

DDRS Financial Statement Crosswalks - FY08 Q1**

Title:	FY08 Q1 DDRS Financial Statement Crosswalks
Purpose:	To document the crosswalks used to create the FY08 Q1 Financial Statements and provide the input files for compilation testing.
Source:	Defense Department Reporting System - Budgetary (DDRS-B) & Defense Department Reporting System - Audited Financial Statements (AFS)
Scope:	FY08 Q1 Financial Statement Crosswalks for Marine Corps Stand Alone General Fund
Methodology:	See Methodology Tab
Summary:	<p>1.DDRS B to DDRS AFS Crosswalk This worksheet shows the crosswalk from DDRS-B to DDRS-AFS used in FY08 Q1 financial reporting.</p> <p>2.SF - 133 Crosswalk This worksheet shows the SF-133 crosswalk used in FY08 Q1 financial reporting.</p> <p>3.BS Crosswalk This worksheet shows the Balance Sheet crosswalk used in FY08 Q1 financial reporting.</p> <p>4.SBR Crosswalk This worksheet shows the Statement of Budgetary Resources crosswalk used in FY08 Q1 financial reporting.</p> <p>5.SNC Crosswalk This worksheet shows the Statement of Net Cost crosswalk used in FY08 Q1 financial reporting.</p> <p>6.SCNP Crosswalk This worksheet shows the Statement of Changes in Net Position crosswalk used in FY08 Q1 financial reporting.</p>

**U.S Marine Corps
Financial Statement Compilation
DDRS Financial Statement Crosswalks - FY08 Q1**

Methodology:

All crosswalk files were extracted from DDRS per DFAS-KC and DDRS SOP guidance.

The DDRS - B to DDRS - AFS Crosswalk was obtained from DDRS - B through the following procedures:

1. Login to DDRS-B
2. Click the Report Maintenance Folder
3. Click Report Mapping Report
4. Click the DDRS – B to DDRS – AFS Crosswalk Report

The SF -133 Crosswalk was obtained from DDRS - B through the following procedures:

1. Login to DDRS-B
2. Click the Report Maintenance Folder
3. Click Report Mapping Report
4. Click the SF – 133 crosswalk report

The Balance Sheet, Statement of Budgetary Resources, Statement of Net Costs, and Statement of Changes in Net Position Crosswalks were obtained from DDRS - AFS through the following procedures:

1. Login to DDRS-AFS
2. Choose the appropriate accounting period and accounting office (ex. 4/2007 and KC)
3. Choose "Query" from the title bar
4. Choose "Referential Data" from the drop down
5. Choose the appropriate report map and output format (Excel in this case)

Introduction to Tab E

Purpose: Documents the systems that impact the defined segment, the description of the system, to include functionality, users, and point of contact information. This tab also documents any third party assessments conducted on the systems.

Requirement: The Office of the Undersecretary of Defense (Comptroller) (OUSD(C)) Business Rules.

System Summary

Standard Accounting Budgeting and Reporting System (SABRS)

SABRS is designed to standardize accounting, budgeting, and reporting procedures for all general funds accounted for by the Marine Corps (which include Marine Forces, Posts and Stations, Reserves units, Marine Corps Districts, and elements), Defense Finance and Accounting Service, Kansas City (DFAS-KC), DFAS-Japan, and DFAS-Pacific. SABRS provides a direct automated link between the User and the financial system allowing the User to receive on-line real-time update and inquiry capabilities and batch update reports within twenty-four (24) hours. SABRS processes approximately five million transactions annually at a total dollar value near \$400 billion from approximately 7,500 end users at 54 locations.

The DFAS-KC, Accounting Systems Branch, located in Kansas City, Missouri, owns and manages SABRS. The DFAS-KC, Accounting System Branch reviews and maintains the SABRS Security policy. The Headquarters United States Marine Corps (USMC) Fiscal Director is the SABRS functional sponsor. The DFAS-KC, Technology Service Organization (DFAS-KC/TSO), located in Kansas City, MO, is the developer and system maintainer of SABRS. The System Management Center (SMC), located in Mechanicsburg, Pennsylvania, provides SABRS processing support and the SMC, located in St. Louis, Missouri, provides SABRS hardware support. The USMC Accounting and Financial Systems Branch (RFA), located in Arlington, VA, maintain the SABRS user manuals and training lessons.

The SABRS mainframe resides at the SMC located in St. Louis, Missouri. SABRS is accessed using Personal Computers (PC's) that operate in either a standalone or a Local Area Network (LAN) environment. Data is input in SABRS by users from PC's and by external systems through interfaces with SABRS. The SABRS System Security Authorization Agreement was last updated and approved on May 19, 2006. SABRS was last granted approval to operate on June 9, 2006.

<p>Hardware/Software, and Interfaces</p>	<p><u>Hardware:</u> Connection to SABRS is accomplished utilizing 3270 emulation RUMBA or IBM Host on Demand (USMC) software to connect to a Premise Router. The router links to the NIPRNET (Government Communications Network) which in turn connects to the AMDAHL mainframe employing the MVS/Z/oS1.4 operating system, located at the SMC Mechanicsburg. Data is stored on both fixed and removable media.</p> <p><u>Software:</u> SABRS application software is composed of approximately 31,262 Function Points of which the majority is written in Natural 4.1.2 SP3. Primary utilities supporting the SABRS Major Application are:</p> <ul style="list-style-type: none"> a) ADABAS 7 (Adaptable DataBase Management System) b) Computer Associates Top Secret (CATS / TSS) c) Customer Information Control System (CICS) d) NATURAL 3.1.4.5 e) NATURAL Security (Access Control for NATURAL 3.1.4.5) f) INFOPAC-RDS g) PREDICT (ADABAS Dictionary) h) Data Manager i) Control-M j) Remote Operating System Command operating Environment (ROSCOE) k) Time Sharing Option (TSO)

<p>Telecom/Network Information</p>	<p><u>Network</u> SABRS is accessed using Personal Computers (PC's) that operate in either a standalone or a Local Area Network environment. To ensure adequate protection of data during File Transfer Protocol (FTP) processes, SABRS incorporates a Virtual Private Network (VPN) or Secure File Transfer Protocol (SFTP) when required. Connections between the client and server are on the local service network. Communication from the server to the mainframe passes through a firewall. <i>Network Connection Rule Compliance Analysis</i> evaluates system connections to other systems and/or networks to ensure that a secure posture is maintained.</p> <p><u>Telecom:</u> Wireless computing and networking capabilities from workstations, laptops,</p>
------------------------------------	---

	<p>personal digital assistants (PDAs), handheld computers, cellular phones, or other portable electronic devices are implemented in accordance with DoD wireless policy, as issued. Unused wireless computing capabilities internally embedded in interconnected DoD information technology assets are normally disabled by changing factory defaults, settings or configurations prior to issue to end users. Wireless computing and networking capabilities are not independently configured by end users.</p>

System Summary

Defense Departmental Reporting System (DDRS)

DDRS is a web-based system which provides tools used by DoD accountants to produce the DoD Audited Financial Statements, unaudited interim Financial Statements, and budgetary reports. The DoD Comptroller posts the Financial Statements produced by DDRS on the Office of the Secretary of Defense web site for the benefit of Congress and the public.

DDRS provides the benefits of the elimination of five legacy departmental reporting systems, two major command reporting systems and one headquarters system. It also provides a web-based solution which eliminates need for manual reconciliation, and standardizes the departmental reporting process for all Department of Defense (DoD) Fund Types.

DDRS has two production databases, one for DDRS Budgetary and one shared by DDRS-Audited Financial Statements (AFS) and DDRS-Data Collection Module (DCM). All of the production modules share a common web server and a common database server. The DDRS database is hosted at a single data-center supported by an on-line, real-time data network. All of the DDRS production database and web servers are located at DISA Defense Enterprise Computing Center (DECC) Ogden.

DDRS produces reports required by the Department of the Treasury, Office of Management and Budget (OMB) and the Office of the Secretary of Defense (OSD) on the financial status of each Military Department and each DOD Agency. These reports include information on each appropriation issued through the life of the appropriation. The reports are organized by appropriation and fiscal year and are further broken down into Program Element/Line Item for use by line managers in the decision-making and program execution process.

DDRS also provides ad-hoc data query and report generation tools. Specifically, DDRS produces the following reports: Audited Financial Statements, Unaudited Interim Financial Statements, Report on Budget Execution and Budgetary Resources (SF 133), Report on Reimbursements (Supplemental 725), Appropriation Status By Fiscal Year Program And Subaccounts (DD 1002), Accounting Report 1307 (AR 1307), Schedule of Transfers and Reappropriations, and the Report on Receivables.

The general support system supporting DDRS is a mid-tier HP 9000 running the HP/UX operating system and Novell NetWare for DFAS Enterprise Local Area Network (ELAN) connectivity. The DDRS application is designed to operate with Windows NT and the general support system is run by software manufactured by Oracle. DDRS operates in a distributed environment. Remote dial-up capability via the DFAS Internet Service Provider (DISP) or DFAS Virtual Private Network is available to users. Users must have proper authorization in order to gain access.

E.2.8	Navy Data Call LOA	Provides the data call letter of assurance that defines the support that the Office of Financial Operations will provide in support of the USMC FY08 financial statement preparation and audit. Utilized Systems: BEIS, DCAS, DDRS, DTS, SPS, and WAWF.

Introduction to Tab F

Purpose: Documents independent third party assessments applicable to the Financial Statement Compilation defined segment. These audit reports may include assessments on the process, financial statement line, or the financial management systems that impact the segment. Corrective actions addressing findings from the audit reports will be included in Remediation Action Plan.

Overview of Findings:

Department of Defense, Inspector General (DoD IG)

The DDRS-AFS Report Map used to map trial balance data into the FY 2004 DoD financial statements was different than the Department of Treasury guidance for 516 of 3,557 lines. As a result, the DDRS-AFS Report Map was not fully compliant with the U.S. government Standard General Ledger.

DFAS Kansas City did not use SABRS general ledger account balances to prepare monthly and year-end financial reports or utilize other enhancements built into SABRS. DFAS Kansas City used a complex, manual process that increased the potential for errors and did not further the objective of moving toward transaction-based, general ledger driven accounting systems to produce financial reports and statements.

DFAS made uncontrolled or unnecessary adjusting accounting entries when compiling the DoD financial statements for FY 2000.

DoD controls over DPAS security, operations, and data processing did not comply with DoD information assurance requirements.

Naval Audit Service (NAS)

Marine Corps internal controls over vendor payments made were not adequate to ensure full compliance with PPA timeliness requirements.

Audit Reports Summary					
DoD IG					
Report #	Name	Date	Procedures	Results	Current Status
D-2005-102	Defense Departmental Reporting System - Audited Financial Statements Report Map	08/17/05	1) Reviewed the DDRS-AFS Report Map used to prepare the FY 2004 DoD financial statements to determine whether it complied with guidance from the Office of Management and Budget and the Department of Treasury. 2) Compared the Report Map to the Treasury Crosswalks published in the Department of Treasury Financial Manual to identify any differences between them. 3) Discussed the Report Map differences with DFAS personnel to determine the reasons for the differences. 4) Examined the procedures and processes used by DFAS Arlington personnel to control changes to the Report Map and for ensuring the accuracy of the Report Map. 5) Used DDRS-AFS trial balance data to assess the potential financial statement effect of any Report Map differences.	The DDRS-AFS Report Map used to map trial balance data into the FY 2004 DoD financial statements was different than the Department of Treasury guidance for 516 of 3,557 lines. As a result, the DDRS-AFS Report Map was not fully compliant with the U.S. government Standard General Ledger.	
D-2001-097	Preparing Financial Reports for Marine Corps Appropriations	04/12/01	1) Reviewed the existing capabilities of the SABRS accounting system for producing monthly financial reports. However, a detailed analysis of the SABRS capabilities and account balances was not completed because the enhancements, planned to begin in FY 2001, should improve the reporting process. 2) Observed the manual process that DFAS Kansas City used to prepare the monthly financial reports that support year-end financial statement preparation. 3) Reviewed the procedures used by DFAS Kansas City, Financial Reporting Branch, to prepare monthly and year-end financial reports such as the SF 133, the DD 1002, the DD 725, and the FMS 2108 during FY 2000. The scope of the audit was limited, in that the management control program as it pertained to the overall objective was not reviewed.	DFAS Kansas City has spent more than \$21 million on the Standard Accounting, Budgeting and Reporting System (SABRS) modifications, redesign, and enhancements from FY 1997 through FY 2000 to provide full accounting support for the Marine Corps general funds. However, DFAS Kansas City did not use SABRS general ledger account balances to prepare monthly and year-end financial reports or utilize other enhancements built into SABRS. DFAS Kansas City used a complex, manual process that increased the potential for errors and did not further the objective of moving toward transaction-based, general ledger driven accounting systems to produce financial reports and statements. Also, not relying on general ledger account balances resulted in missed opportunities to capitalize on the inherent efficiencies of using a single system.	
D-2001-165	Defense Departmental Reporting Systems - Audited Financial Statements	08/03/01	1) Reviewed the internal controls over the inputting of trial balance data into the AFS module. 2) Reviewed the approval process of journal vouchers to determine whether they were properly approved and the data were fully supported. 3) Reviewed the adjustments that were made in the AFS module to correct crosswalk errors caused by a mapping problem from the U.S. Standard General Ledger accounts to the financial statements. 4) Tested crosswalk data from Air Force General Fund, Air Force Working Capital Fund, Army General Fund, Army Working Capital Fund, Navy General Fund, Navy Working Capital Fund, and the Other Defense Organizations General Fund. 5) Attended AFS module testing in May and October 2000. 6) Conducted meetings with DFAS personnel and reviewed applicable guidance.	The Defense Finance and Accounting Service made uncontrolled or unnecessary adjusting accounting entries when compiling the DoD financial statements for FY 2000. The Defense Finance and Accounting Service made \$219 billion in undocumented changes to the trial balance data before the data were imported into the Audited Financial Statements module. The Defense Finance and Accounting Service also processed 172 accounting entries valued at about \$203 billion without the appropriate levels of supervisory review. In addition, the Defense Finance and Accounting Service made accounting entries valued at \$224.7 billion to correct deficiencies in the crosswalks that place financial data on the correct financial statement line. As a result, the FY 2000 DoD Agency-Wide Financial Statements contained unreliable financial data.	

D-2006-046	Information System Security Technical Report on the Defense Property Accountability System	01/27/06	<ol style="list-style-type: none"> 1) Interviewed personnel at the OUSD (AT&L) in Arlington, Virginia. 2) Interviewed personnel and inspected documented policies and procedures at DECC Ogden, DECC Dayton, and NAVSISA Mechanicsburg. 3) Inspected management and exception reports, SSAAs, and other relevant control documentation located at DECC Ogden, NAVSISA Mechanicsburg, DECC Dayton, DFAS Columbus, and DECC Oklahoma City. 4) Tested specific control activities in place or performed by personnel at DECC Ogden, NAVSISA Mechanicsburg, DFAS Columbus, DECC Dayton. 5) Monitored DPAS network and interface traffic through the use of a network-connected security tool located at DECC Dayton. 6) Reviewed security vulnerability assessments performed at DECC Ogden. 	DoD controls over DPAS security, operations, and data processing did not comply with DoD information assurance requirements. As a result, these controls created potential system and procedural vulnerabilities that threatened the confidentiality, integrity, and availability of the DPAS application and its data. The Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics (OUSD [AT&L]) did not comply with mandatory requirements of FFMIA. DPAS program management and direction related to the use of DPAS at user activities need improvement.	
D-2008-101	General Controls Over the Standard Accounting, Budgeting, and Reporting System (SABRS)	06/06/08	<ol style="list-style-type: none"> 1) Reviewed the general controls over SABRS provided by DFAS Kansas City 2) Analyzed the 2003 and 2006 security plans, intrusion detection, policies, software change request information, and related documentation. 3) Interviewed DFAS Kansas City personnel to determine what general controls were in place over SABRS. 4) Reviewed the FY 2005 FISMA report prepared by DFAS. 5) Used the Government Accountability Office Federal Information System Controls Audit Manual, January 1999, to develop the procedures performed during this audit. 6) At the beginning of the audit provided a list of required audit documentation needed to perform the audit work outlined in the Federal Information Systems Control Audit Manual. 	Controls over SABRS security management and operations are ineffective because the Defense Finance and Accounting Service Chief Information Officer did not assign clear security responsibilities to the SABRS Program Management Office (finding A), the SABRS Program Management Office did not provide assurance that SABRS security was effective because it did not coordinate with all responsible parties (finding B), and Defense Finance and Accounting Service Accounting Services-Marine Corps and Defense Information Systems Agency did not have an approved Service Level Agreement because Defense Finance and Accounting Service did not sufficiently coordinate with the Defense Information Systems Agency to complete the approval process (finding C). See the Findings section of the report for the detailed recommendations.	
NAS					
Report #	Name	Date	Procedures	Results	Current Status
N2006-0026	Marine Corps Implementation of the Prompt Payment Act	05/24/06	<ol style="list-style-type: none"> 1) Reviewed applicable laws, the Federal Acquisition Regulation, the Defense Federal Acquisition Regulation Supplement, Department of Defense (DoD) guidance and Marine Corps guidance concerning the Prompt Payment Act (PPA). 2) Evaluated recent Marine Corps and Defense Finance and Accounting Service (DFAS) initiatives concerning PPA implementation to include determining the scope, methodology, and nature of the efforts; current status; completed actions; planned actions and milestones; and problem areas disclosed by these efforts on which we needed to perform further work or followup. 3) For Vendor Pay, analyzed Fiscal Year (FY) 2004 and October 2004 to August 2005 Marine Corps' and selected activities' actual Dollars Disbursed Under PPA and Interest Paid (for late payments made), and reviewed their actual performance against the key goal for measuring PPA compliance, which is Interest Per Million (IPM) (of Dollars Disbursed Under PPA). Additional analysis of Vendor Pay activities and systems took place. 4) For Contract Pay, analyzed FY 2004 and October to December 2004 Marine Corps' Dollars Disbursed under PPA, Interest Paid, and IPM. No further analysis took place. 	<p>Marine Corps internal controls over vendor payments made were not adequate to ensure full compliance with PPA timeliness requirements.</p> <p>As a result, (1) further Marine Corps improvements in reducing interest paid for late payments are possible; (2) many Marine Corps late payments and associated interest are still due to unrecorded receipts on CAPS(W), a problem that WAWF-RA electronically submitted receiving reports were intended to correct; and (3) the return on the Marine Corps investment in WAWF-RA has not been fully realized because some activities are not fully participating.</p>

SUBJECT: Technical Report on the Defense Property Accountability System
(Report No. D-2006-046)

We are providing this report for review and comment. We considered management comments on a draft of this report in preparing the final report.

DoD Directive 7650.3 requires that all recommendations be resolved promptly. The Director, Acquisition Resources and Analysis, comments on behalf of Director, Acquisition, Technology and Logistics were partially responsive. As a result of management comments, we revised recommendation B and C.7 to the Under Secretary of Defense, Acquisition, Technology, and Logistics. We request that the Director, Acquisition Resources and Analysis provide additional comments on recommendations B, C.3, C.6 and C.7 by February 27, 2006.

If possible, please send management comments in electronic format (Adobe Acrobat file only) to Auddfs@dodig.osd.mil. Copies of the management comments must contain the actual signature of the authorizing official. We cannot accept the / Signed / symbol in place of the actual signature. If you arrange to send classified comments electronically, they must be sent over the SECRET Internet Protocol Router Network (SIPRNET).

FOR OFFICIAL USE ONLY

We appreciate the courtesies extended to the staff. Questions should be directed to Mr. Michael Perkins at 703-325-3557 (DSN 221-3557) or Ms. Yolanda C. Watts at (703) 428-1071 (DSN 221-1071). For the report distribution, see Appendix E. The team members are listed inside the back cover.

By direction of the Deputy Inspector General for Auditing:

for Paul J. Granetto, CPA
Assistant Inspector General

Technical Report on the Defense Property Accountability System

Executive Summary

Who Should Read This Report and Why? DoD personnel who manage and use the Defense Property Accountability System (DPAS) will find this technical report of interest. Persons who supervise any part of the DoD information assurance program may also find the report useful. The technical report describes DPAS compliance with certain general computer and application control objectives, applicable laws and regulations including the DoD Information Technology Security Certification and Accreditation Process, and the Federal Financial Management Improvement Act (FFMIA). The report documents control tests performed, test results, conclusions and recommendations for corrective actions related to identified deficiencies.

Background. The DoD Office of Inspector General is implementing a long-range strategy to conduct audits of DoD financial statements in accordance with the Chief Financial Officers Act of 1990, as amended, which mandates that agencies prepare and conduct audits of financial statements. The reliability of DPAS directly impacts DoD's ability to produce reliable, and ultimately auditable, financial statements.

DoD designated DPAS as a migratory system in FY1995 to bring DoD real and personal property assets under proper accountability and financial control. DoD real and personal property are considered high-risk areas by the audit community. By 2001, DPAS was fully deployed at Army, Navy, Marine Corps, and 23 Defense Agencies. However, the Air Force does not use DPAS as their property accountability system.

Results. DoD controls over DPAS security, operations, and data processing did not comply with DoD information assurance requirements. As a result, these controls created potential system and procedural vulnerabilities that threatened the confidentiality, integrity, and availability of the DPAS application and its data. The Director for Defense Information Systems Agency must address these vulnerabilities as required by DoD criteria outlined in this report. See Finding A of the report for detailed recommendations.

The Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics (OUSD [AT&L]) did not comply with mandatory requirements of FFMIA. Failure to comply with mandatory requirements could result in inaccurate and incomplete financial

FOR OFFICIAL USE ONLY

reported information. OUSD(AT&L) must address the mandatory requirements as required by FFMIA. See Finding B of the report for detailed recommendations.

DPAS program management and direction related to the use of DPAS at user activities need improvement. Inadequate application controls at user activities increased the risk that DPAS will produce inaccurate information concerning related property, plant, and equipment financial data to the standard general ledger. The inadequate controls also increased the risk of undetected errors, noncompliance with policies and procedures, and lack of access controls. OUSD(AT&L) must take corrective action to improve identified control deficiencies. See Finding C of the report for detailed recommendations.

Management Comments and Audit Response. The Director, Acquisition Resources and Analysis, responding for the Director, OUSD(AT&L) partially concurred with all of the findings, concurred with six recommendations, partially concurred with two recommendations, and nonconcurred with two recommendations. The Director nonconcurred with the recommendation to capture and amortize environmental clean up costs in DPAS. The Director stated that DoD is working on a Process Model that will address the liabilities associated with equipment and real property. Components will design a data system or determine if an existing data system, such as DPAS can be used to capture and calculate clean-up costs. Management comments were partially responsive and require specific detail indicating the timeframe needed to determine what system or systems will be used. As a result of management comments, we revised the recommendation. The Director concurred with the recommendation regarding user activities notifying the Defense Enterprise Computing Center Ogden of terminated and transferred employees. Management comments were partially responsive and require more detail on specific actions taken to report changes to authorized users. The Director partially concurred with the recommendation regarding user activities retaining source documentation. Management comments were partially responsive but require a specific plan for retaining source documentation with a target completion date. The Director nonconcurred with the recommendation regarding the annual inventory of accountable assets using Automated Identification Technology and stated that physical inventories of Military equipment shall be inventoried annually while personal property must be inventoried at least every three years. The Director also stated that DoD criteria only require use of Automated Identification Technology when it is practical and cost effective. Management comments were partially responsive and require more detail on action taken to ensure inventories are conducted and documented. As a result of management comments, we revised the recommendation. We request that the Director, Acquisition Resources and Analysis comment on these issues by February 27, 2006.

The Director for Computing Services, responding for the Director, Defense Information Systems Agency, concurred with all recommendations. We consider management comments to be partially responsive and require more detail. We request additional comments identifying specific actions Defense Information Systems Agency will take to ensure that system batch processing errors are documented. See the Finding section of the report for a discussion of management comments and the Management Comments section for the complete text of comments.

Background

The Under Secretary of Defense (Comptroller) and the Assistant Secretary of Defense for Command, Control, Communication, and Intelligence designated the Defense Property Accountability System (DPAS) as a migratory system in FY 1995 to bring DoD real and personal property assets under proper accountability and financial control. DoD real and personal property are considered high-risk areas by the audit community. DoD activities began migrating data to DPAS in 1995 in order to support financial reporting, accountability and asset management. By 2001, DPAS was fully deployed at the Army, Navy, Marine Corps, and 23 Defense Agencies. Additionally, there are 329 relational databases that support multiple agencies and commands that have a worldwide geographical dispersion. However, the Air Force does not use DPAS as their property accountability system. DPAS is a centrally funded and managed program.

DPAS provides financial reporting capability for more than 10.6 million property assets valued at approximately \$48.3 billion as of February 2005. DPAS provides standard general ledger accounting in conformance with the United States Government Standard General Ledger at the transaction level and subsidiary reporting for capital assets. DPAS tracks accountability for various types of property, including personal property, real property, and heritage assets. DPAS has security features that provide asset visibility at many levels based on user's roles and responsibilities.

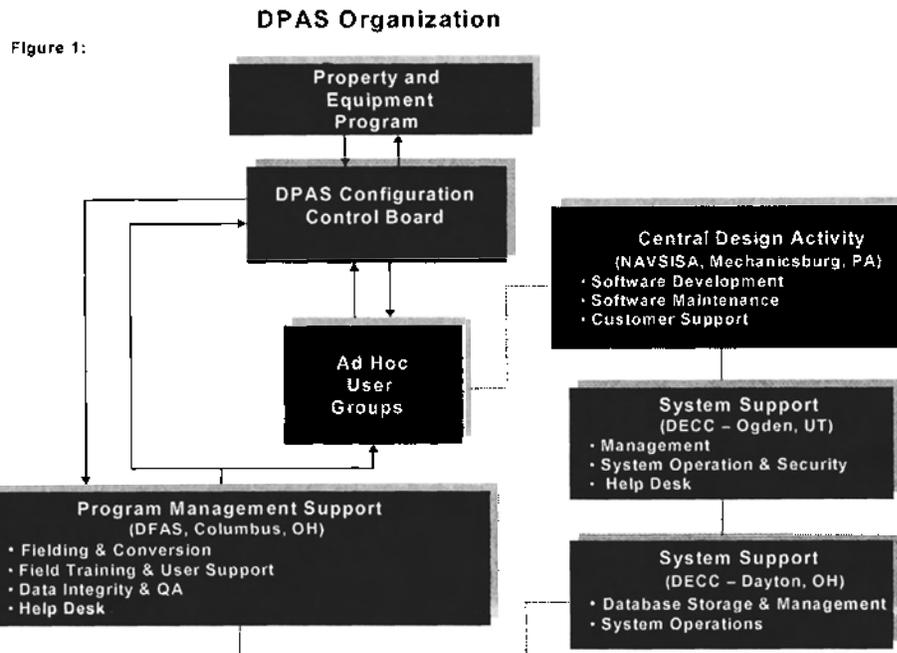

DPAS provides DoD users with full support for property accountability, management, and financial reporting. Specifically, it provides the capability to update item authorizations, perform asset cataloging actions, assign accountability, perform accountable record processing (such as receipts, turn-in, transfers, and inventory tracking and status), account for government furnished property, compute depreciation, generate general ledger transactions, update subsidiary and general ledger records, report financial status, maintain an automated document register, and report disposals. DPAS also supports various maintenance requirements including tracking preventive maintenance schedules and actions, generating work orders, and tracking warranty, loan and lease data. DPAS users have the ability to choose the DPAS functionality they want to use to meet their property accountability needs. In addition to standard reporting capabilities, DPAS provides users with commercially developed ad hoc query and

report writing software. This toolset allows DPAS users to create and save custom queries and reports to meet any special reporting requirements that the standard DPAS reports do not support.

Department of Defense Office of Inspector General Long-Range Strategy.

The Department of Defense Office of Inspector General (DoD OIG) is implementing a long-range strategy to conduct audits of DoD financial statements. The Chief Financial Officers Act of 1990, (P.L. 101-576), as amended, mandates that agencies prepare and conduct audits of financial statements. The reliability of information in DPAS directly impacts the ability of DoD to produce reliable, and ultimately auditable, financial statements; which is key to achieving the goals of the Chief Financial Officers Act.

Management Oversight. The Program Manager for DPAS reports to the Deputy Director, Property and Equipment Policy Office, which reports to the Office of the Under Secretary of Defense (Comptroller) and the Office of the Under Secretary of Defense, (Acquisition, Technology and Logistics) (OUSD, AT&L). The DPAS Program Management Office is located at Defense Finance and Accounting Service (DFAS), Columbus, Ohio, which provides direct operational oversight for the program and supports all customer service requirements (including data conversions, centralized help desk support, training, quality assurance site support, e-learning, and website services). DFAS coordinates with the Defense Enterprise Computing Center (DECC) Ogden to provide program information technology infrastructure support. Additionally, DFAS and DECC-Ogden work closely with Navy Supply Information Systems Activity (NAVSISA) for all DPAS software development, maintenance, and testing. Finally, these entities work closely with the DPAS Configuration Control Board (CCB) made up of headquarters level property managers representing the user community, to review the application's functionality, proposed changes, and provide recommendations as needed. The CCB meetings also provide DoD property managers with a forum to learn from each other and share solutions to common problems. Figure 1 below provides a graphical representation of the DPAS oversight and support structure.

User Activities. DPAS interfaces with 26 systems representing military and civilian logistics, supply, base operations support, contract administration, business management, finance and accounting, asset tracking, equipment management, facilities, resources infrastructure, and data collection. The property transactions are input into DPAS by property book officers at user activities throughout DoD. Property related transactions are not processed centrally by any specific organization. Certain application related controls that govern DPAS activities such as access to system functionality, depreciation perimeters and exception reporting are resident at each user activity.

Federal Financial Reporting Requirements. The Federal Financial Management Improvement Act (FFMIA) of 1996 requires that each Federal agency implement and maintain financial management systems that comply substantially with Federal financial management systems requirements, applicable Federal accounting standards, and the United States Government Standard General Ledger at the transaction level. Additional requirements are set forth in Office of Management and Budget (OMB) Circular A-127, "Financial Management Systems," which incorporates by reference OMB Circulars A-123, "Management Accountability and Control," and A-130, "Management of Federal

Information Resources.” OMB Circular A-127 requires that agencies’ financial management systems be able to provide timely and useful financial information to:

- support management’s fiduciary role,
- support agency legal, regulatory, and other special management requirements,
- support budget formulation and execution functions,
- support fiscal management of program delivery and decision making,
- comply with internal and external reporting requirements, including financial statements prepared in accordance with OMB and Treasury reporting requirements, and
- monitor the financial management system to ensure integrity of financial data.

The Federal Information Security Management Act. In 2002, as part of the Electronic Government Act, Congress passed, and the President signed into law, the Federal Information Security Management Act (FISMA). Its goals include development of a comprehensive framework to protect the Government’s information, operations, and assets. The Act assigns specific responsibilities to Federal agencies, the National Institute of Standards and Technology, and OMB in order to strengthen information system security. In particular, FISMA requires the head of each agency to implement policies and procedures to cost-effectively reduce information technology security risks to an acceptable level.

FISMA requires OMB to prepare an annual report to Congress detailing agency progress in meeting FISMA requirements including four primary security factors used to measure compliance. First, the agency must have authorization to process data, once certification and accreditation is in place. Security control costs must be “built into” the life cycle of the system. Security controls such as the contingency plan, must have been tested and evaluated during the past year.

Federal Financial Audit Requirements. GAO-03-673G, “Government Auditing Standards,” June 2003, issued by the Government Accountability Office (GAO), contains the standards for audits of government organizations, programs, activities and functions, and of government assistance administered by contractors, nonprofit organizations, and other non-government organizations. Auditors and audit organizations, when required by law, regulation, agreement, contract, or policy, must follow these standards, referred to as generally accepted government

auditing standards. These standards pertain to auditors' professional qualifications, the quality of audit effort, and the characteristics of professional and meaningful audit reports.

In addition, the Federal Information System Controls Audit Manual (FISCAM), January 1999 (GAO/AIMD-12.19.6, Volume 1), describes the computer-related controls that auditors should consider when assessing the integrity, confidentiality, and availability of computerized data. FISCAM was primarily designed for use in evaluations of general and application controls over financial information systems that support agency business operations. The purpose of FISCAM is to (1) inform financial auditors about computer-related controls and audit issues so they can integrate the work of information systems auditors with other aspects of the financial audit, and (2) provide guidance to information systems auditors on the scope of issues that generally should be considered in any review of computer-related controls over the integrity, confidentiality, and availability of computerized data associated with Federal agency systems.

Technical Report. The purpose of this technical report is to provide detailed information regarding the internal control and compliance findings identified during the Statement on Auditing Standard (SAS) No. 70/88 audit. The report provides the comprehensive results of the SAS 70/88 audit, including those items that, from a financial statement audit perspective, were not deemed material, significant, or relevant for SAS 70/88 reporting purposes, but were important to communicate to DFAS, Defense Information Systems Agency (DISA), and NAVSISA management.

In addition to this Technical Report, we issued on July 7, 2005, Report No. D-2005-092, "Report on Defense Property Accountability System Controls Placed in Operation and Test of Operating Effectiveness for the Period September 1, 2004 through April 30, 2005" in accordance with SAS 70/88. This report is intended for use by financial statement auditors of organizations that use DPAS for property accountability and is designed to meet the specific needs of a financial statement audit.

Objectives

The specific objectives of this audit were to determine whether: (1) DPAS general and application controls were adequately designed and operating effectively; (2) DPAS complied with requirements of FFMIA and other applicable laws and

regulations; and (3) DPAS was properly certified and accredited in accordance with the DoD Information Technology Security Certification and Accreditation Process (DITSCAP). See Appendix A for a discussion of the audit scope and methodology.

A. Information Assurance

Information assurance controls over DPAS system security, operations, and data processing did not comply with DoD information assurance requirements. This occurred because the DPAS System Security Authorization Agreement was not in compliance with the DoD Information Technology Security Certification and Accreditation Process. In addition, user account support documentation was lacking; and system audit trails were not proactively monitored. The data processing standard operating procedures were not adequately documented. Further, Defense Enterprise Computing Center Ogden relied on one individual to manage the DPAS database without an alternate. As a result, the controls over DPAS system security, operations, and data processing created potential system and procedural vulnerabilities that threatened the confidentiality, integrity, and availability of the DPAS application and its data.

Information Assurance Guidance

DoD Information Assurance Requirements. In October 2002 and February 2003, DoD released Department of Defense Directive (DoDD) 8500.1, "Information Assurance," and Department of Defense Instruction (DoDI) 8500.2, "Information Assurance Implementation," respectively. DoDI 8500.2 establishes baseline requirements for controls over information assurance and technological changes, emphasizes implementation of need-to-know access controls, and requires the implementation of certain encryption controls.

DoD Instruction 8500.2, "Information Assurance Implementation," February 6, 2003. This instruction defines information assurance as measures that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. The measures include providing for restoration of information systems by incorporating protection, detection, and reaction capabilities. The instruction defined the Mission Assurance Category (MAC) which reflects the importance of information relative to the achievement of DoD goals and objectives, particularly the war fighter combat mission. The mission assurance category is the basis for determining availability and integrity control requirements.

The assigned MAC level serves as the basis on which management determines appropriate availability and integrity control requirements. In

accordance with DoDD 8500.1 and DoDI 8500.2, DFAS determined DPAS to be a MAC III system, which, "...handles information necessary to conduct day-to-day business, but does not materially affect support to deployed or contingency forces in the short-term." MAC III applications require protective measures, techniques, or procedures generally commensurate with commercial best practices. The confidentiality level of DPAS is defined as sensitive.

DoD Instruction 5200.40, "Defense Information Technology Security Certification and Accreditation Process," December 30, 1997.

DITSCAP establishes a standard Department-wide process, set of activities, general tasks, and management structure to certify and accredit information systems and maintain the information assurance and security posture of the defense information infrastructure throughout the life cycle of each system. The certification process is a comprehensive evaluation of the technical and non-technical security features of an information system and other safeguards. The process establishes the extent to which a particular design and implementation meets specified requirements for physical, personnel, administrative, information, information systems, and communications security. The accreditation process is a formal declaration by the Designated Approving Authority that an information system is approved to operate in a particular security mode using a prescribed set of safeguards at an acceptable level of risk.

DoD 8510.1-M, "Department of Defense Information Technology and Security Certification and Accreditation Process Application Manual," July 31, 2000. This manual supports DITSCAP by presenting a detailed approach to the activities comprising the certification and accreditation process as well as the content of the System Security Authorization Agreement (SSAA). DFAS and DISA are required to follow DITSCAP for maintaining DPAS.

Information Assurance Controls Over DPAS

Information assurance controls over DPAS security, operations, and data processing did not comply with DoD information assurance requirements. DPAS project management did not update the DPAS SSAA to include DoD guidance. In addition, supporting documentation for DPAS user accounts, maintaining audit trails and tracking of required security training was deficient.

DPAS System Security Authorization Agreement. The DPAS SSAA was approved by the Designated Approving Authority on October 9, 2003 providing DPAS with an authority to operate. However, the SSAA was

not in compliance with DITSCAP because the procedural review was not completed in accordance with DODI 8500.2 and DITSCAP.

According to DODI 8500.2, Controls for Integrity and Availability, an annual information assurance review should be conducted which comprehensively evaluates existing policies and processes. The information assurance review is designed to ensure procedural consistency and fully support the goal of uninterrupted operations. As a result of the audit, sections of the SSAA were updated in accordance with DoDI 8500.2.

Although, the SSAA was updated to meet the requirements of DoDI 8500.2, the requirements identified in Phase II and Phase III of DITSCAP were not documented. During Phase II, evidence is collected to support the certification of a system. When Phase II is completed the system should have a documented security specification, comprehensive test plan and procedures, and written assurance that all network and other interconnection requirements have been determined. During Phase III, a review of the SSAA is completed to ensure that its requirements and agreements still apply.

DITSCAP further states that after each task is completed, a Task Analysis Summary Report must be prepared. The Task Analysis Summary Report must include the following information:

- Record of findings;
- Evaluation of vulnerabilities discovered during evaluations;
- Summary of the analysis level of effort;
- Summary of tools used and results obtained; and
- Recommendations.

In addition, the Minimum Security Checklist must be completed for each task and level. The results of the completed task analysis are then documented and added to the SSAA.

The DPAS SSAA, Appendix P, Test and Evaluation Report, documents the Minimum Security Checklist for each completed task, however, the appendix does not summarize the analysis level of effort, tools used results obtained, and recommendations. It is important that the DPAS Operations Support Office ensures that all task analysis reports are completed and maintained as required by DITSCAP.

DPAS User Account Support Documentation. DECC-Ogden is responsible for creating access accounts for user activities and maintaining documentation that supports the development of those accounts. DoDI 8500.2 requires that a comprehensive account management process be implemented to ensure that only authorized users can gain access to workstations, applications, and networks. It also requires that individual accounts designated as inactive, suspended, or terminated are promptly deactivated. However, DECC-Ogden did not have documentation supporting complete evidence of valid users for DPAS. We selected a haphazard sample of 45 user accounts from a current listing of DPAS users. DECC-Ogden did not have the supporting System Authorization Access Request, DoD Form 2875, or DISA Form 41 for 4 of the 45 DPAS user accounts selected for testing. In March 2004, administrative functions for user account maintenance was transferred from DECC-Dayton to DECC-Ogden. The lack of supporting documentation authorizing access to DPAS may cause undetected system use and compromise data integrity. As a result of our audit, DECC-Ogden stated that they executed a full review of their DPAS user group and removed the four user accounts in question. They also contacted the user activities of the four user accounts and obtained new access forms and developed new user accounts for the four accounts.

System Audit Trails. DECC-Ogden did not monitor or review system audit trails for unusual or irregular activity. DoDI 8500.2 requires that tools are to be available for the review of system audit trails. DECC-Ogden did not proactively monitor the system audit logs because it did not have an effective automated tool that would allow them to easily identify unusual or irregular activity within the voluminous amount of audit trail data generated by the DPAS system. Although DECC-Ogden maintained the audit trails on compact disc, monitoring and reviewing the files was ineffective without an automated detection tool. The Information Technology Specialist indicated that an automated monitoring tool had been requested from the DECC-Mechanicsburg, but as of March 31, 2005, it had not been approved or obtained. DISA Headquarters should obtain an audit trail monitoring tool to detect unusual or irregular activity associated with the operation and administration of the DPAS system.

Data Processing

Documented Standard Operating Procedures. DECC-Ogden did not adequately document standard operating procedures for the support activities performed by the DPAS system administrators. DoDI 8500.2

requires documented procedures to ensure procedural consistency and to minimize the interruption of operations. Although each system administrator had their own informal operating procedures, these procedures were not documented in a consistent manner and not readily accessible to other system administrators in case of an emergency or the system administrator was unavailable. Without documented standard operating procedures specifically designed for DPAS support operations, management may have difficulty enforcing desired DPAS operating standards and procedures and indoctrinating and training new system administrators who are newly assigned to support DPAS. As a result of the audit, DECC-Ogden created formal standard operating procedures for the DPAS system administrators. These procedures are currently accessible to the system administrators via a shared network drive.

Qualified Database Administrator Back-Up. DPAS technology uses a unique database management system called SUPRA. The current DPAS database administrator did not have an individual with SUPRA expertise to serve as a backup in the event that the DPAS administrator was unavailable. The DPAS database administrator function performs data error resolution, version control, and updates management in relation to the database. Management had difficulty designating a backup because of the limited resources. DoDI 8500.2 requires that existing policies and processes ensure procedural consistency and fully support the goal of uninterrupted operations. Without a fully qualified database administrator back-up, DPAS could experience processing delays or disruptions in the event the current DPAS database administrator is unexpectedly unavailable or leaves the government. As a result of the audit, the current database administrator is in the process of training the system administrators to serve as alternate database administrators for DPAS.

Documentation of Batch Processing Error Resolution. DECC-Dayton did not document corrective actions when identifying and resolving system batch processing errors. The database administrator at DECC-Dayton did not have a tool or resource that could be effectively used to document the corrective actions performed. DoDI 8500.2 requires audit trails be created related to system activity, including activity used to correct system processing errors. The inability to document the corrective actions performed to correct batch processing errors prevents management from establishing an effective audit trail as well as accountability related to resolving system processing issues and problems. In addition, the lack of documentation of resolution activities makes it more difficult to research potential past solutions to future processing problems.

Management Comments on Information Assurance Controls Over DPAS

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics, partially concurred with the finding and stated that the finding could have been presented in a more neutral tone similar to the “Report on Defense Property Accountability Systems Controls Placed in Operation and Test of Operating Effectiveness for the Period September 1, 2004 through April 20, 2005,” dated July 7, 2005. The Under Secretary of Defense, Acquisition, Technology, and Logistics agreed that there were some inconsistencies in the adherence to policies but did not believe that the depth of these inconsistencies could be determined based on our limited scope and use of haphazard sampling.

Audit Response. Although the audit of DPAS resulted in the issuance of two reports, the information presented in each report differs. The DPAS SAS 70/88 audit report focused on controls at the service organization for a specified period of time. The technical report addresses information assurance controls at the user sites we visited in addition to information presented in the SAS 70/88. The inconsistencies addressed in the technical report are related to user sites visited during our audit. The results of our sample were not intended to generalize that controls at the DPAS user activities were adequate or inadequate at all sites.

Recommendations, Management Comments, and Audit Response

A.1 We recommend that the Under Secretary of Defense, Acquisition, Technology, and Logistics direct the Defense Property Accountability System, Operations Support Office to update the Defense Property Accountability System, System Security Authorization Agreement to include all Task Analysis Summary Report information as outlined in the DoD Information Security Certification and Accreditation Process to reflect the current technical environment and operations.

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics concurred and stated that the SSAA update will be accomplished as part of the DPAS FY 06 recertification and accreditation.

A.2 We recommend that the Director, Defense Information Systems Agency:

a. Implement a periodic review of user accounts to ensure only authorized accounts are active in the Defense Property Accountability System.

Management Comments. The Director, Defense Information Systems Agency, Computing Services, concurred and stated that DISA DECC Ogden implemented a periodic review of user accounts to ensure only authorized accounts are active in the Defense Property Accountability System. DISA Field Security Office is in the process of developing a long term solution that will be implemented in January 2006.

b. Obtain an audit trail record analysis tool that will allow system administrators to monitor and report unusual and irregular activity within the audit records.

Management Comments. The Director, Defense Information Systems Agency, Computing Services, concurred and stated that DISA Field Security Office conducted research and has not been able to identify a tool. However, DECC Ogden is proactively monitoring audit information. DECC Ogden security administrators implemented an audit procedure that executes a schedule process on all Hewlett Packard and SUN servers on a daily basis. The report is emailed to the Information Assurance Officer's mail server. The Information Assurance Officer reviews the report daily and sends issues to the appropriate system Administrator.

c. Continue to train the system administrators to serve as alternate database administrators for Defense Property Accountability System.

Management Comments. The Director, Defense Information Systems Agency, Computing Services, concurred and stated that DISA has established a process to improve the skill level to the recommended level. Internal processes will be carefully modified to bridge knowledge shortfalls.

d. Document corrective actions performed regarding system batch processing errors.

Management Comments. The Director, Defense Information Systems Agency, Computing Services, concurred and stated that this recommendation should be forwarded to NAVSISA as the finding pertains to functionality of the DPAS application.

Audit Response. We consider the comments partially responsive. During the audit, we found that the database administrator is responsible for resolving batch-processing errors. DoDI 8500.2 requires that activity used to correct system processing errors be documented. The database administrator located at DECC-Dayton did not document system batch processing errors therefore; it is recommended that this function be performed by DISA. Consequently, we request that DISA provide additional comments in response to the final report, identifying actions DISA will take to ensure that corrective actions are documented.

B. Federal Financial Management Improvement Act Compliance

The Under Secretary of Defense, Acquisition, Technology, and Logistics did not fully comply with mandatory requirements of the Federal Financial Management Improvement Act. This occurred because the Defense Property Accountability System database does not have the capability for capturing and calculating environmental clean-up costs. Failure to comply with this mandatory requirement could result in inaccurate and incomplete financial reported information.

FFMIA Guidance

Federal Accounting Standards. In 1996, Congress enacted the Federal Financial Management Improvement Act (FFMIA) (P. L.104-208), which is intended to improve Federal financial management. FFMIA requires that financial systems at Federal agencies substantially comply with (1) Federal accounting standards, (2) the United States Standard Government General Ledger at the transaction level, and (3) Federal financial management systems requirements.

GAO Property Management Systems Requirements Checklist. In December 2001, the GAO issued the “Property Management Systems Requirements – Checklist for Reviewing Systems under FFMIA.” This guidance was issued to assist agencies in implementing and monitoring their property management systems. The requirements are detailed in the Federal Financial Management Systems Requirements series issued by the Joint Financial Management Improvement Program (JFMIP) and OMB Circular A-127, Financial Management Systems, July 23, 1993.

FFMIA Compliance

OUSD (AT&L) did not comply with mandatory requirements of FFMIA. FFMIA requires that agencies implement and maintain financial management systems that substantially comply with Federal financial management system requirements. As part of this requirement, DPAS Operations Support Office used the GAO checklist to determine whether DPAS was in compliance with Federal financial management system requirements. According to the FY 2001 Annual Self-Assessment, DPAS management indicated they did not comply with the

mandatory requirement – “does the property management system of general property, plant, and equipment (PP&E) calculate the annual amortization of estimated material, clean-up costs, and unamortized balance?”

Systems Requirement to Calculate Clean-Up Costs. JFMIP, Property Management Systems Requirements, October 2000, states that management should:

- Capture the total estimate clean-up cost when the item is placed in service and/or when an event has occurred and the liability is probable and estimable;
- Calculate the annual amortization of estimated material, clean-up costs and the unamortized (i.e., estimated future clean-up costs) balance; and
- May accomplish the capturing and calculation of clean-up costs through a process or system other than in a property system. JFMIP further indicates that management should determine the most appropriate method to include calculating and reporting of liabilities for clean-up costs associated with a specific item of PP&E and in other cases the liability may be estimated for the universe of PP&E.

Calculation of Environmental Clean-up Costs

DPAS did not have the capability for capturing and calculating environmental clean-up costs. Based on our analysis of the DPAS, functionality, and information obtained through multiple interviews with the DPAS Operations Support Office, it was determined that DPAS did not calculate the annual amortization of these estimated costs and unamortized balance.

The DPAS Operations Support Office attempted to resolve this deficiency by requesting from DPAS user activities, whether they collected data on environmental clean-up costs. In response, DPAS user activities indicated that when costs associated with clean-up costs are identified, the events have progressed well beyond the estimation point and the associated clean-up costs have either been paid or are in the process of being completed for payment, and that there is a lack of clarity regarding the accurate estimation of clean-up costs. In addition, the DPAS Operations Support Office determined that there was “no evidence that this process was being done in any automated fashion or any evidence that this process was required by any Service or Agency using DPAS.”

DPAS noncompliance with this mandatory requirement may impact DoD's ability to completely and accurately report environmental clean-up costs. DPAS should initiate a system change request in order to calculate the amortization of estimated environmental clean-up costs and the unamortized balance.

Significance of FFMIA Compliance

We determined that DPAS did not comply with the mandatory FFMIA requirement to capture and calculate environmental clean-up costs. As a result of the audit, the DPAS Operations Support Office researched and provided valuable information for implementing this requirement. Financial management systems in the Federal government must be designed to support the vision articulated by the government's financial management community. Specifically, they should be designed to collect accurate, timely, complete, reliable, and consistent information. Because this requirement was not met, the DoD financial statements may be incomplete and inaccurate.

Management Comments on the Finding and Audit Response

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics partially concurred with the finding and stated that the report did not indicate that DoD does not require DPAS to capture clean-up costs. However, the Director does recognize that DoD is required to collect and amortize environmental liabilities. DoD currently uses estimates to account for and report such costs consistent with FFMIA requirements, in accordance with Volume 4, Chapter 13 of the FMR. The Director also stated the report did not indicate that DPAS met all other FFMIA requirements.

Audit Response. As stated in the finding, JFMIP allows for capturing and calculation of clean-up costs through a process or system other than in a property system and that management should determine the most appropriate method. The limited scope of this audit was to determine whether DPAS complied with FFMIA. During the course of our audit, we found that the DPAS Operations Support Office did not comply with the requirement to capture and calculate clean-up costs in any manner outside of DPAS. In addition, we recognize that OUSD (AT&L) met all other FFMIA requirements. The report indicated this by stating that OUSD (AT&L) did not fully comply with the mandatory requirements of the FFMIA.

Recommendations, Management Comments, and Audit Response

Revised Recommendation. As a result of management comments, we revised draft Recommendation B to clarify the nature of the actions needed to improve existing controls regarding the Federal Financial Management Improvement Act Compliance.

B. We recommend that the Under Secretary of Defense, Acquisition, Technology, and Logistics ensure that the Defense Property Accountability System Operations Support Office implement a method for the calculation of the amortization of clean-up costs not captured in Defense Property Accountability System.

Management Comments. The Under Secretary of Defense, Acquisition, Technology, and Logistics did not concur with the DPAS Operations Support Office modifying DPAS to calculate clean up costs. However, they are currently working on Business Enterprise Architecture and the Process Model for environmental liabilities in that each component will design a data system or use an existing system such as DPAS. If the component determines that DPAS is needed to comply with FFMIA, then DPAS will be modified at that time.

Audit Response. Although, the Under Secretary of Defense, Acquisition, Technology, and Logistics did not concur, their comments were considered partially responsive. We recognize that the Joint Financial Management Improvement Program, Property Management Systems Requirements, October 2000, states that management can capture and calculate clean-up costs through a process or system other than in a property system. We also accept management's comments indicating that they are currently working on their Business Enterprise Architecture and the Process Model for environmental liabilities in order to determine the most appropriate method to capture and calculate clean-up costs. However, during the audit, we found that there was no evidence that the capturing and calculation of clean-up costs was being performed in any process or system other than DPAS. Therefore, we request additional information indicating the timeframe needed to determine what system or systems will be used to capture and amortize environmental clean-up costs. Additionally, we request comments to the revised recommendation.

C. Controls at Defense Property Accountability System User Activities

DPAS program management and direction related to the use of DPAS at user activities need improvement. The lack of management oversight, communication, follow-up and remedial activities allowed the DPAS user activities to inconsistently apply PP&E regulations and policies. Application and complementary user application controls were inconsistently applied in the following areas:

- Segregation of Duties;
- Least Privilege;
- Standard Operating Procedures;
- Recognition of Capital Assets;
- Timely and Accurate Recording of Asset Transactions;
- Maintenance of Asset Source Documentation; and
- Inventory Activities.

As a result, the inadequate controls increased the risk of inaccuracies in DPAS and reporting of related PP&E financial data to the standard general ledger. The inadequate controls also increased the risk of errors going undetected, noncompliance with policies and procedures and noncompliance on access controls. See Appendix B for a listing of the type and location of user activity deficiencies.

User Activity Guidance

OMB Circular A-130, “Management of Federal Information Resources, Appendix III, Security of Federal Automated Systems,” November 30, 2000. This circular requires that Federal agencies provide an adequate level of security for all agency Automated Information Systems to assure that automated systems operate effectively and accurately, that the appropriate physical, personnel, administrative, and technical controls are implemented, and to assure continuous operation of automated systems that support critical agency functions. DoD

Instruction 8500.2, "Information Assurance Implementation," February 2003, and DoD 8510.1-M, "DITSCAP Application Manual," July 2000, provides mandatory, minimum Automated Information Systems security requirements.

DPAS Basic Plus Manual, July 20, 2004. The Manual states the two major objectives for protecting data processed by the DPAS are to ensure that data:

- a) is protected from unauthorized modification and disclosure during preparation and transmission of DPAS information; and
- b) Integrity is provided during transmission.

User Activity Selection

Prior Reporting. On July 7, 2005, we issued Report No. D-2005-092, "Report on the DPAS Controls Placed in Operation and Test of Operating Effectiveness for the period September 1, 2004 through April 30, 2005," in accordance with the SAS No. 70/88. In this report, we reported that significant DPAS-related control activities should be performed at the DPAS user activities. SAS 70/88 is a reporting standard designed to report on controls of service organizations and is not intended for reporting on internal controls at user activities. As such, the DPAS application controls, as well as complementary manual controls, resident at the user activities were not covered in the original scope of the DPAS SAS 70/88 Audit.

Selection of User Activities. Based on DPAS data quality metrics developed by the DPAS Operations Support Office, a haphazard sample of 16 user activities was selected for testing. The 16 user activities were selected based upon their proximity to the DPAS Service Organizations: DFAS-Columbus, and DECC-Dayton, Ohio; DECC-Ogden, Utah; DECC-Oklahoma City, Oklahoma and NAVSISA, Mechanicsburg, Pennsylvania. Appendix B provides a listing of the user activities that were visited.

Program Management Oversight and Direction

Overall program management and direction related to the use of DPAS at user activities need improvement. Although DPAS management is sensitive to the needs of its user activities, communication, follow up and remedial efforts could be improved. Also, DPAS management gathers and distributes DPAS related quality assurance metrics to property managers. These data quality reports provide

a snapshot of DPAS data error trends although past follow-up activities related to these error trends has been minimal and inconsistent. These efforts, although commendable, do not meet the needs of the user activities.

Configuration Control Board. The CCB members provide direction by proposing and approving system changes. Additionally, the CCB receives monthly quality assurance data from the DPAS Operations Support Office, Quality Assurance Branch, for review and action. Figure 2 below provides a summary of the types of DPAS quality data metrics for the Monthly Management Reports.

Figure 2.

DPAS Data Quality Metrics

Accounting Reports	Asset Accountability Reports	Asset Management	Financial	Logistics	General Statistics
<ul style="list-style-type: none"> Acquisition cost validation Capital Asset Not Activated for Depreciation Assets Under Capitalized Threshold Depreciated 	<ul style="list-style-type: none"> Assets Without Location Codes Past Due Inventories Acquisition Costs Determined by User 	<ul style="list-style-type: none"> Excess Assets Over 90 Days Blank Key DPAS Data Fields Missing Bar Codes Assets Surveyed Within One Year 	<ul style="list-style-type: none"> Residual Value Greater Than Zero Depreciation Period Greater Than 20 Years Accumulated Depreciation for Personal Property 	<ul style="list-style-type: none"> Property Under \$5,000 on Report Increases and Decreases Not Posted Within 7 Days 	<ul style="list-style-type: none"> Summary of Asset Values and Number of Assets by Asset Categories History Deletion Status

The CCB was chartered to meet on a quarterly basis. However, the CCB only met five times during the last three fiscal years. Although the OUSD (AT&L) had created the CCB to meet the needs of the DPAS user community, there was a lack of regular and consistent communication and follow-up of user activities regarding DPAS. Thus, program management oversight and direction was inadequate.

Application and Complimentary Controls

OUSD (AT&L) did not provide guidance on the execution of applicable PP&E regulations and policies within the DPAS user activities. As a result, the lack of management oversight, communication, and follow-up of application controls at user activities were inconsistently applied in the following areas:

- Segregation of Duties;
- Least Privilege;

-
- Standard Operating Procedures;
 - Recognition of Capitalized Assets;
 - Timely and Accurate Recording of Asset Transactions;
 - Maintenance of Asset Source Documentation; and
 - Inventory Activities

Segregation of Duties and Least Privilege. The lack of segregation of duties between the responsibilities assigned to the Property Book Officer (PBO) and the Information System Security Officer (ISSO) increased the risk that DPAS user accounts may be granted access privileges beyond their daily job requirements and would increase the likelihood of unauthorized transactions within DPAS. DoDI 8500.2, states that access procedures should enforce the principles of separation of duties and “least privilege” and that access to privilege accounts is limited to only privilege users. Since least privilege was not implemented, DPAS users could execute unauthorized transactions within DPAS. The PBO and ISSO responsibilities should be assigned to separate individuals and access privileges should be re-evaluated based on least privilege. Based on the 16 user activities selected, we found that:

- 6 of the 16 user activities had the access capability of performing duties of the PBO and the ISSO; and
- 9 of the 16 user activities did not enforce the principle of least privilege. Specifically, DPAS user activities had granted individuals full access to DPAS although their job functions did not require such access, and terminated or transferred individuals’ user accounts remained active.

The existence of unnecessary access and user accounts increases the risk that DPAS may be accessed by unauthorized individuals. As a result, unauthorized DPAS user access increases the risk of unauthorized transactions being executed within DPAS.

Standard Operating Procedures. DoDI 8500.2 requires information assurance roles and responsibilities at all organizational and information technology levels be clearly delineated in policy and doctrine. Doctrine and procedures that document how policy objectives are to be achieved should be developed and regularly updated or expanded to keep pace with new threats and the management challenges that accompany the introduction of new technology. Standard

operating procedures at 7 of the 16 DPAS user activities were not clearly defined or documented. Figure 3 provides examples of the types of standard operating procedures that should be documented.

Figure 3. Standard Operating Procedures

User Authorization	Asset Register	Physical Inventory	Depreciation	Record Transfer
<ul style="list-style-type: none"> List authorized DPAS users and their access needs approved by management Configure system to grant access permission only to authorized users to enter, modify and alter property records Segregate users in accordance with responsibilities, i.e., asset acquisition, modification, disposal 	<ul style="list-style-type: none"> Review, reconcile, and record corrections using source documentation, Asset Register and Master File Obtain approval from management for changes to Asset Register and Master File Review audit trails to confirm changes to property records 	<ul style="list-style-type: none"> Conduct inventories as required by regulation(s) to include wall-to-wall and hand receipts Compare asset information from hand receipts with Asset Register Address reconciled items in timely manner. 	<ul style="list-style-type: none"> Valid depreciation charges by management Ensure depreciation correctly rolled forward from one period to the next 	<ul style="list-style-type: none"> Confirm system capability to electronically transfer property records Validate data inputs via batch processing

Without a formal written standard method of property management, there is a greater likelihood of inconsistent application of the recording asset acquisitions, disposals, and changes within DPAS.

Recognition of Capitalized Assets. The DoD Financial Management Regulation (FMR), Volume 4, states that the DoD threshold is \$100,000¹ for recognizing assets for capitalization and depreciation. Recognition is made for both assets purchased using General or Working Capital Funds. Additionally, it states that all general PP&E assets acquired by DoD must be recognized for both accounting and reporting purposes in terms of the asset’s capitalized value and the accumulated depreciation of the asset on the appropriated DoD component’s financial statements.

The FMR provides for a recovery period of less than five years. For example, when an asset exceeds the DoD capitalization threshold and has a useful life of at least two years but less than five, the Component can elect to depreciate the asset over two to four years, as deemed appropriate.

Several DPAS user activities were not recognizing capital assets and recording depreciation. Five of the 16 user activities did not enforce the principle of recognition of capital assets. Specifically, we found that:

- user activities depreciated assets valued below the \$100,000 capitalization threshold because these assets were purchased with capital budget funds;

¹ This is the current DoD threshold as of April 29, 2005.

-
- user activities did not depreciate assets valued above the \$100,000 capitalization threshold because they were not purchased with capital budget funds, and
 - user activities relied on DPAS for the sole purpose of tracking assets. They were not aware that DPAS had the capability of calculating and producing financial data for external financial systems.

These DPAS user activities did not implement procedures to enforce the timely, proper identification and depreciation of capital assets in DPAS. As a result, both asset values and depreciation expense were not properly recorded in the general ledger.

Timely and Accurate Recording of Asset Transactions. The recording of PP&E within DPAS was inaccurate because the DPAS user activities did not update DPAS completely, accurately and timely for additions, deletions, and changes according to details within relevant source documents. DoD FMR requires that account control be established for all assets provided to or acquired by DoD. Additionally, DoDI 5000.64, Section 5.3., states that accountable records should be established for all property purchased, leased, or otherwise obtained having a unit acquisition cost of \$5,000 or more.

DPAS was selected as the migratory system for accumulating and accounting for real and personal property in DoD. The property information in DPAS was intended to feed asset value, depreciation value, or expense amount for non-capitalized property into an accounting system. At 11 of the 16 user activities, we found that user activities:

- added assets to DPAS ranging from thirty days to one year after receipt of inventory;
- did not remove an asset from DPAS until five months after the request for disposal was made; and
- did not accurately adjust existing assets within DPAS.

These DPAS user activities did not have procedures established that required the monitoring of PP&E transactions to ensure the related transactional data was entered into DPAS in a timely, accurate and complete basis. The incomplete, untimely and inaccurate recording of asset transactions will negatively impact the quality of property accountability data in DPAS.

Maintenance of Asset Source Documentation. At DPAS user activities we visited, there was a lack of source documentation to support asset acquisition and disposal activities. DPAS user activities did not have procedures established that required the authorization and maintenance of source documents that supported the execution of asset transactions within DPAS. For several of the DPAS user activities, procedures were established, but there was no review of source documents to recorded transactions to verify the accuracy of information in DPAS.

At 8 of the 16 user activities, we found that user activities:

- did not have adequate source documentation for one or more asset acquisition transactions;
- did not have adequate source documentation for one or more asset disposal transactions executed in DPAS; and
- did not have adequate source documentation for one or more asset record adjustments.

Record Retention Requirements. DoD Regulation 7000.14-R, “DoD Financial Management Regulation,” volume 1, chapter 9, “Financial Records Retention,” August 2000, states that all financial records, both paper and electronic, documenting the acquisition of DoD PP&E shall be maintained for at least the minimum period specified in the applicable General Records Schedule issued by the National Archives and Records Administration (NARA).

National Archives and Records Administration Requirements for Real Property Records. NARA General Records Schedule No. 3, item 1 requires that records, other than abstract or certificates of title, relating to real property acquired after December 31, 1920, be retained until 10 years after unconditional sale or release of the government of conditions, restrictions, mortgages, or other liens. Records related to real property acquired prior to January 1, 1921, are not covered by the General Records Schedule and must be schedules by submission of a Standard Form 115 to NARA.

National Archives and Records Administration Requirements for Personal Property Records. NARA General Records Schedule No. 3, item 3 requires that the routine procurement files (including contract, receipt, inspection, and payment) related to transactions (including construction contracts), other than real property that exceed \$2,000 to be retained until 6 years and 3 months after final payment. Files pertaining to transactions, including construction contracts, at or below \$2,000 should be retained until 3 years after final payment.

The lack of proper source documentation did not allow management to establish a documented audit trail supporting the accountability of property assets. In accordance with DoDI 5000.64, senior management should ensure that records of the property accountability system are maintained, to include a complete trail of all transactions, suitable for audit.

Inventory Activities. DoD 5000.64, “Defense Property Accountability,” Section 5.4.2, August 2004 requires that inventories of personal property be conducted every three years. Army inventory requirements are more stringent, requiring an inventory of all property issued on hand receipts on an annual basis according to Army Regulation 710-2, “Inventory Management, Supply Policy Below the National Level,” February 2004. At 8 of the 16 user activities, we found that:

- user activities had not conducted inventories of personal property within the 3 year period;
- management did not have oversight of the physical inventory process;
- inventory records were not available; and
- bar coding was not being used to track property and equipment received.

By not conducting periodic inventories, management could not validate the existence of assets that were recorded in asset records. In addition, the lack of management oversight over the inventory process did not allow management to determine whether inventory procedures were being followed and that inventory-related exceptions and issues were being identified and resolved.

Inventory documentation should have included the asset listing as of the physical inventory date, documentation of the physical count, inventory adjustments made, documentation supporting adjustments made, signatures of those who conducted the physical inventory, and a reconciliation report comparing the physical inventory results to DPAS. The FMR requires the verification of the accounting of records through periodic physical counts and inventories of PP&E. Additionally, the FMR requires that the results of physical inventories be reconciled to property accountability records and systems and that the differences be researched and fully documented. These procedures minimize the risk of unrecorded PP&E.

An integral part in the establishment of accountability of assets during the receipt process is the timely recognition of these receipts and a process to easily monitor

and account for property and equipment during their life cycle. User activities indicated that based upon a cost benefit or other analysis, the implementation of Automated Identification Technology, such as bar coding, would not be practicable. The use of bar coding or other automatic technology is a mandatory requirement to assist in property accountability as noted by DoDI 5000.64, "Defense Property Accountability," Section 5.2, August 2002. Reliance upon manual identification and recording of assets received, inventoried and disposed is both labor intensive and less accurate than the use of Automated Identification Technology in the tracking of property and equipment.

Management Comments on the Finding and Audit Response

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics partially concurred with the finding. The Director stated that the DPAS Project Manager has both recognized and identified to the Configuration Control Board, areas where DPAS user activities were not following policy by using quality assurance reporting. Recently they made reports more user friendly and web based. Again the Director indicated that it is difficult to determine the range and depth of the issues identified based on our limited scope and sampling.

Audit Response. While the Director partially concurred and has identified areas where DPAS user sites were not following policy, we found there was a lack of follow up to error trends identified by DPAS reports and infrequent meeting conducted by the CCB. Regarding the range and depth of issues identified, we are reporting on the DPAS user activities we visited and their deficiencies as identified in this finding and Appendix B.

Recommendations, Management Comments, and Audit Response

Revised Recommendation. As a result of management comments, we revised draft Recommendation C.7 to clarify the nature of the actions needed to improve existing controls regarding the controls at the Defense Property Accountability System User Site activities.

C. We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics:

- 1. Enforce procedures at the user activities for the separation of duties between the Property Book Officer and the Information System Security Officer.**

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics concurred and stated that a software change request will be developed by the end of the second quarter, FY 2006 to preclude a user from combining PBO and ISSO duties. This software change request will be briefed to the CCB and prioritized against existing software change requests by the Board.

- 2. Implement “least privilege” access for all authorized Defense Property Accountability System user accounts based on specific roles and responsibilities of the user.**

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics, concurred and stated that DPAS provides “least privilege” access capability and sites have been trained to apply this principal. When a new user account is created, the user has no privileges. The ISSO grants user privileges based on the unique circumstances of the organization and the individual’s job requirements.

- 3. Require that user activities monitor system access and notify Defense Enterprise Computing Center Ogden of transferred and terminated employees to identify and delete unauthorized users.**

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics, concurred and stated that recommended procedures are currently in place, no additional action is required.

Audit Response. Although the Director, concurred with the recommendation, we consider the comments to be partially responsive. Specifically, the Director did not identify the actions that have been taken in response to this recommendation. Therefore, we request that the Director provide additional comments in response to the final report identifying specific actions taken to ensure that user activities notify DECC Ogden of transferred and terminated employees to identify and delete unauthorized users.

4. Ensure that user activities establish and use detailed standard operating procedures for property accountability.

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics, concurred and stated that the Property and Equipment Policy Office is currently developing a Personal Property Handbook which will aid DPAS users in developing their SOPs. A draft handbook will be staffed during the second quarter, FY 2006.

5. Ensure that user activities identify and record the acquisition and disposition of assets meeting the DoD capitalization threshold, to include the proper recovery period, regardless of the type of funding used to purchase the asset. Additionally, ensure that accountable records are established for all property purchased, leased, or otherwise obtained having a unit acquisition cost of \$5,000 or more.

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics, concurred and stated that DoD Instruction 5000.64, section 5.3.1 requires that assets with an acquisition cost of \$5,000 or more have records established and an audit trail of all transactions suitable for audit be maintained. Additionally these records are currently collected and made available to each DPAS CCB member agency. Many of the agencies have used the reports and made significant improvements over the past six months. The Property and Equipment Policy Office is in the process of determining which quality metrics need to be reported to OSD. The metrics will be specified in the Personal Property Concept of Operations during the second quarter FY 2006.

6. Require user activities to retain source documentation of all asset acquisition, transfer, and disposal activities for a minimum of six years and three months. Additionally, ensure that user activities maintain asset records in accordance with the National Archives and Records Administration General Records Schedule.

Management Comments. The Under Secretary of Defense, Acquisition, Technology, and Logistics partially concurred with the FMR and NARA General Records Schedule requirement to retain source documentation for PP&E assets. However, DPAS must first be scheduled with NARA in order to identify and establish disposition authorities for all records in compliance with Federal laws and regulations. The Chief, Directives and Records Division/OSD Records Administrator is coordinating a memo requiring

information systems, such as DPAS, to complete a systems survey by December 2005 that will assist in bringing DPAS into compliance.

Audit Response. Although, the Director partially concurred, we consider their comments partially responsive. Scheduling with NARA and completing a survey by December 31, 2005, may bring DPAS closer to compliance with NARA. However, we found that source documentation such as invoices, receiving reports, inventory quantity adjustments, and disposition documents were missing. We request a more specific plan for the retention of source documents and a target completion date for scheduling with NARA.

7. Require user activities to conduct physical inventories of accountable assets at least every three years in accordance with DoD Instruction 5000.64, Section 5.4.2 and maintain documentation identifying the results.

Management Comments. The Director, Acquisition Resource and Analysis responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics did not concur with our recommendation because DoD Instruction 5000.64, section 5.4.2 requires only military equipment to be inventoried annually. Other non military accountable assets are to be inventoried at least every three years. Additionally, the Director did not concur with utilizing Automated Identification Technology in all instances because DoD Instruction 5000.64, section 5.2.1.2 provides for an analysis for cost or practicality.

Audit Response. We consider their comments partially responsive. We found that some user activities had not conducted inventories of personal properties within a three year period and that inventory documentation was not available. We request that the Director provide additional comments regarding the revised recommendation.

Appendix A. Scope and Methodology

Methodology. We performed an assessment of the design and operating effectiveness of controls over the DPAS application at DFAS Columbus, DECC Ogden, DECC Dayton, DECC Oklahoma City, and NAVSISA Mechanicsburg. We also assessed controls at the user activities. See Appendix B to view the full listing of user activities. The assessment covered the period from October 1, 2004 through March 31, 2005, and was performed in accordance with Generally Accepted Government Auditing Standards. Specifically, we performed the following.

- We interviewed personnel at the OUSD (AT&L) in Arlington, Virginia.
- We interviewed personnel and inspected documented policies and procedures at DECC Ogden, DECC Dayton, and NAVSISA Mechanicsburg.
- We inspected management and exception reports, SSAAs, and other relevant control documentation located at DECC Ogden, NAVSISA Mechanicsburg, DECC Dayton, DFAS Columbus, and DECC Oklahoma City.
- We tested specific control activities in place or performed by personnel at DECC Ogden, NAVSISA Mechanicsburg, DFAS Columbus, DECC Dayton.
- We monitored DPAS network and interface traffic through the use of a network-connected security tool located at DECC Dayton.
- We reviewed security vulnerability assessments performed at DECC Ogden.

The control objectives included within the scope of the audit were derived from the following sources:

- Government Accountability Office Federal Information System Controls Audit Manual;
- Department of Defense Instruction 8500.2, "Information Assurance Implementation;" and

-
- Applicable laws and regulations, including Business Management Modernization Program Systems Compliance Criteria, Federal Financial Management Improvement Act of 1996, and the Federal Information Security Management Act.

Scope Limitations. There is a classified instance of DPAS that is used by the National Security Agency. Although this instance is maintained by DISA and NAVSISA, there are special operating procedures, controls, and facilities used to accommodate the classified nature of the data processed by the National Security Agency instance of DPAS. Since the support of this classified instance is somewhat specialized as compared to the support provided to the rest of the DPAS instances and the volume and dollar amount of the property transactions processed by the classified instance is immaterial to the total population of property assets tracked by DPAS as a whole, the DoD OIG has elected not to include this classified instance of DPAS in the scope of this audit.

The Navy uses DPAS in a manner that is different than the rest of the user activities. For example, the Navy does its own administration of user access and uses a combination of DPAS modules that is unique. The scope of this audit did not include the DPAS related activities and controls performed by the Navy users.

Sampling Methodology. We used haphazard sampling to test DPAS: user access authorization; asset acquisitions; asset disposals; system change reports; problem ticket reports; visitor access requests; batch error correction; depreciation re-performance calculations; and employee security training completion. The results of our sample are not intended to be used to generalize that the application controls at DFAS, DISA, NAVSISA, and the user activities are adequate or inadequate.

Use of Computer-Processed Data. We did not rely on computer-processed data to perform this audit. We assessed the controls that involved computer generated data such as user access listings, error reports, and transaction logs.

Use of Technical Assistance. We received assistance from the DoD OIG Quantitative Methods Division to help determine our sampling plan. In addition, the DoD OIG Technical Assessment Division assisted in reviewing audit and test plans as well as testing compliance with DoD information assurance and certification and accreditation requirements.

Government Accountability Office High-Risk Area. GAO has identified several high-risk areas in DoD. This report provides coverage of the effective management of information technology investments high-risk area.

Prior Coverage. No prior coverage has been conducted regarding DPAS during the last five years.

Appendix B. User Activities Visited

Type of Deficiency Identified	Total No. Of Deficiencies	User Activities

8) Army Night Vision Electronic-Sensors Directorate (A NVESD)	16) DLA New Cumberland (DLA NC)

Appendix C. Audit Response to OUSD(AT&L) Comments on the Report

Management Comments. The Director, Acquisition Resource and Analysis, responding for the Under Secretary of Defense, Acquisition, Technology, and Logistics clarified that the Property Management Council as referenced in the draft report is different than the DPAS CCB. It is anticipated that the Property Management Council will be chartered by OUSD (AT&L) and chaired by the Deputy Director, Property and Equipment Policy. The Property Management Council will address military equipment and administrative property issues across DoD and property accountability systems. In contrast, the DPAS CCB is chaired by the DPAS Program Manager and is concerned with issues directly related to DPAS.

Audit Response. As a result, this report was modified to reflect their clarification. References to the Property Management Council have been changed to the CCB.

Appendix D. Acronyms

CCB	Configuration Control Board
DECC	Defense Enterprise Computing Centers
DFAS	Defense Finance and Accounting Service
DISA	Defense Information Systems Agency
DITSCAP	DoD Information Technology Security Certification and Accreditation Process
DoDD	DoD Directive

MEMORANDUM FOR DEPUTY INSPECTOR GENERAL FOR AUDITING

SUBJECT: Response to DoDIG Draft Report, "Technical Report on the Defense Property Accountability System," Project Number D2004-D000FG-0200.000

Thank you for the opportunity to comment on the subject report. We concur with a number of your recommendations, for example, the need to continually gather and report metrics to our users. However, we believe the negative tone of the report does not fairly reflect the Defense Property Accountability System's (DPAS) security, operations, and data processing compliance with DoD information assurance requirements. As requested, we have commented on each of your findings and recommendations below.

Finding A -- Information Assurance: Information assurance over DPAS system security, operations, and data processing did not comply with DoD information assurance requirements.

AT&L Response: Partially Concur. We believe a more accurate and neutral presentation of this finding would be to quote from your DoDIG Service Auditor's Report (SAR) of July 7, 2005 which stated, "A number of controls in place to ensure compliance with DoD information assurance policies, including DoD Instruction 8500.2 and DoD Information Technology Security Certification and Accreditation Process (DITSCAP) appear to be suitably designed, but our tests of operating effectiveness indicated inconsistencies in adherence to these policies." We agree that there are some inconsistencies in adherence to policies that we must address but the range and depth of these inconsistencies can not be determined due to your limited scope and self described "haphazard" sampling methodology which prevented you from evaluating any Navy, Marine Corp, or National Security Agency sites, or for that matter any of our top twenty-five sites as determined by either asset value or asset count.

DoDIG Recommendation A.1: We recommend that the Under Secretary of Defense, Acquisition, Technology, and Logistics direct the Defense Property Accountability System, Operations Support Office to update the Defense Property Accountability System, System Security Authorization Agreement (SSAA) to include all Task

Analysis Summary Report information as outlined in the DoD Information Security Certification and Accreditation Process to reflect the current technical environment and operations.

AT&L Response: Concur. The SSAA update will be accomplished as part of the DPAS FY 06 recertification and accreditation.

Finding B -- Federal Financial Management Improvement Act Compliance: The Under Secretary of Defense, Acquisition, Technology, and Logistics did not fully comply with mandatory requirements of the Federal Financial Management Improvement Act (FFMIA).

AT&L Response: Partially Concur. Your finding states that DPAS did not fully comply with FFMIA because the DPAS database does not have the capability for capturing and calculating environmental clean-up costs. It is correct that DPAS does not have transaction level reporting capability, but your report did not state that the Department did not require this capability of the system nor does it state that DPAS meets all other FFMIA requirements. We recognize the Department is required to collect and amortize environmental liabilities. These costs, both Defense Environmental Restoration Program (DERP) and non-DERP, include the costs of researching and determining the existence of hazardous waste, removing, containing, and/or disposing of hazardous waste from property, or material and/or property that consists of hazardous waste at the time of shutdown or disposal of the asset. Currently, the Department uses estimates to account for and report such costs consistent with FFMIA requirements, in accordance with Volume 4, Chapter 13 of the FMR and DERP management guidance.

We recommend your finding be stated as "The Under Secretary of Defense, Acquisition, Technology, and Logistics fully complied with mandatory requirements of the Federal Financial Management Improvement Act with the exception of environmental clean-up costs, which are reported outside of DPAS."

DoDIG Recommendation B: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics, ensure that the Defense Property Accountability Systems Operations and Support Office implement a method for the calculation of the amortization of clean-up costs captured in the Defense Property Accountability System.

AT&L Response: Non-concur. The Department is currently working on its Business Enterprise Architecture and the Process Model for the Environmental Liabilities has steps that will address the liabilities associated with equipment, as well as real property. Each component will need to comply with the process model and design a data system, or use an existing data system to comply with the process model

Revised

and business architecture. If a Component needs to use DPAS to comply with the model then it would only be appropriate at that time to add the functionality to DPAS.

Finding C -- Control at Defense Property Accountability System User Activities: DPAS program management and direction related to the use of DPAS at user activities needs improvement. The lack of management oversight, communication, follow-up and remedial activities allowed the DPAS user activities to inconsistently apply PP&E regulations and policies.

AT&L Response: Partially Concur. PM DPAS has recognized and identified to DPAS Configuration Control Board (CCB) members through quality assurance reports areas where their user activities were not following policy. We have recently made changes to the reports to make them more user friendly and available through the web. Again, due to the limited scope and sampling, it is difficult to determine the range and depth of the issues identified.

DoDIG Recommendation C.1: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics enforce procedures at the user activities for the separation of duties between the Property Book Officer and the Information Systems Security Officer.

AT&L Response: Concur. PM DPAS is currently researching the number of Property Book Officers (PBOs) that have combined duties as the Information System Security Officer (ISSO) and the impact of restricting this occurrence within DPAS. Currently, the DPAS training curriculum includes a chapter titled "Security Education, Training, and Awareness Plan" intended for and taught to individuals with ISSO responsibilities. Included in this chapter of training material is a "Security Responsibility Table," which clearly defines the roles of a security officer versus an end user. A software change request (SCR) will be developed by the end of second quarter, FY2006 to preclude a user from combining PBO and ISSO duties. This SCR will be briefed to the CCB and prioritized against existing SCRs by that Board.

DoDIG Recommendation C.2: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics implement "least privilege" access for all authorized Defense Property Accountability System user accounts based on specific roles and responsibilities of the user.

AT&L Response: Concur. DPAS provides "least privilege" access capability and sites have been trained to apply this principal. When a new user account is created, the user has no privileges. The ISSO grants user privileges based on the unique circumstances of the organization and the individual's job requirements. No additional action is required.

DoDIG Recommendation C.3: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics require that user activities monitor system access and notify Defense Enterprise Computing Center Ogden of transferred and terminated employees to identify and delete unauthorized users.

AT&L Response: Concur. Recommended procedures are currently in place. No additional action is required.

DoDIG Recommendation C.4: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics ensure that user activities establish and use detailed standard operating procedures for property accountability.

AT&L Response: Concur. The Property and Equipment Policy Office (P&EP) is currently developing a Personal Property Handbook which will aide DPAS users in developing their SOPs. A draft handbook will be staffed during second quarter, FY 2006.

DoDIG Recommendation C.5: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics ensure that user activities identify and record the acquisition and disposition of assets meeting the DoD capitalization threshold, to include the proper recovery period, regardless of the type of funding used to purchase the asset. Additionally, ensure that accountable records are established for all property purchased, leased, or otherwise obtained having a unit acquisition cost of \$5,000 or more.

AT&L Response: Concur. DoD Instruction 5000.64, section 5.3.1, "Accountable Records," states, "Accountable records shall be established for all property purchased, leased (capital leases), or otherwise obtained, having a unit acquisition cost of \$5,000 or more (and land, regardless of cost), and items that are sensitive or classified. (See Volume 10, Table 61 of DoD 4100.39-M (reference (j)).) Property records and/or systems shall provide a complete trail of all transactions, suitable for audit (i.e., a transaction-based history of asset activity, including individual additions and deletions)." In addition to the policy that is currently in place, this data is currently collected and made available to each DPAS CCB member agency. Many of these agencies have used these reports and made significant improvements over the past six months. The P&EP Office is currently in the process of determining which quality metrics need to be reported to OSD, and the metrics will be specified in the Personal Property Concept of Operations during the second quarter FY2006.

DoDIG Recommendation C.6: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics require user activities to retain source documentation of all asset acquisition, transfer, and disposal activities for a minimum of six years and three months. Additionally, ensure that the user activities maintain

asset records in accordance with the National Archives and Records Administration General Records Schedule.

AT&L Response: Partially Concur. The report is correct in recommending that DPAS follow National Archives and Records Administration (NARA) records retention policy as documented in the General Record Schedule (GRS). However, since DPAS is a DoD system that falls under the purview of USD(AT&L), the system and its records should be identified under Administrative Instruction (AI) 15, "Administrative Procedures and Disposition Schedule." AI 15 contains approved disposition schedules for many of the records created by DPAS. This system not only creates the real property records and the personal property records identified on page 22 of the report, but supports general ledger transactions, cataloging, accountable record processing, financial status reports, compute depreciation, and create custom queries and reports to meet user requirements. Thus, this system not only has records that are required to be maintained for six years and three months and 10 years but creates additional records with various retention periods. This does not include the records required to document the system, such as system documentation.

To comply with the law and to allow for the destruction or retention of the records as appropriate, DPAS must be scheduled with NARA in order to identify and establish disposition authorities for all the records, as defined by 44 USC §3301, for compliance with Federal laws and regulations (44 USC §3303, 36 CFR §1228.26 and §1234.32), and DoD Directive 5015.2, "DoD Records Management Program" (March 6, 2000). The Chief, Directives and Records Division/OSD Records Administrator is in the process of coordinating a memo requiring information systems, such as DPAS, to complete a systems survey by December 2005 that will assist in bringing information systems into compliance with current Federal laws and regulations.

DoDIG Recommendation C.7: We recommend that the Under Secretary of Defense, Acquisition, Technology and Logistics require user activities conduct physical inventories of accountable assets on an annual basis utilizing "Automated Identification Technology," such as bar coding and maintain documentation identifying the results.

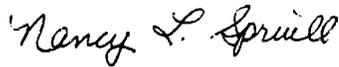

AT&L Response: Non-concur. DoD Instruction 5000.64, section 5.4.2. "Physical Inventories," states, "Military Equipment shall be inventoried at least annually; other personal property shall be inventoried at least every 3 years." To require all accountable property be inventoried annually will present an undue administrative and fiscal burden to the agency. Additionally, the requirement to use Automated Identification Technology (AIT) to the greatest extent practical currently exists under DoD Instruction 5000.64, Section 1.2. The instruction appropriately takes into

Revised

consideration the smaller DoD entities where an investment in AIT may be both cost prohibitive and/or organizationally impractical. That being said, the revision to DoD Instruction 5000.64 includes stronger reinforcement for the AIT in the maintenance and upkeep of formal accountable property records.

In addition to our comments above on your findings and recommendations, we would like to clarify that the Property Management Council (PMC) referenced on page two of the report is significantly different than the DPAS CCB. It is anticipated that the PMC will be chartered by USD(AT&L) and chaired by the Deputy Director, Property and Equipment Policy. The PMC will address military equipment and administrative property issues across the Department and across property accountability systems. In contrast, the DPAS CCB is chaired by the DPAS Program Manager and is concerned with issues directly related to DPAS. Although the DoD Components may be represented by the same office on both bodies, they will have different roles and responsibilities in the PMC and the CCB. The figure on page three should be modified to reflect this clarification.

If you have any questions regarding this memorandum, please contact my point of contact Mr. Ric Sylvester, at 703-604-6350 x121 or ric.sylvester@osd.mil.

17 October 2005 Report

Response To

Technical Report on the Defense Property Accountability System

Information Assurance Controls Over DPAS

A.2 We recommend that the Director, Defense Information Systems Agency:
a. Implement a periodic review of user accounts to ensure only authorized accounts are active in the Defense Property Accountability System.

DISA's Response: Concur.

Corrective action: DISA Field Security Office (FSO) is in the process of developing a long term solution to correct this finding. This solution will be implemented in January 2006. In the interim, DISA DECC Ogden implemented a periodic review of user accounts to ensure only authorized accounts are active in the Defense Property Accountability System. The process entails the following steps:

- A database administrator (DBA) will provide a current list of users for verification.
- The security technicians will verify user authorization against the current System Authorization Access Request DD2875.

b. Obtain an audit trail record analysis tool that will allow system administrators to monitor and report unusual and irregular activity within the audit records.

DISA's Response: Concur. DECC Ogden is proactively monitoring audit information.

Corrective action: DISA Field Security Office conducted the research and has not been able to identify a tool. To satisfy the requirement, DISA DECC Ogden's security administrators implemented an audit procedure that executes a schedule process (CRON service) on all HP and SUN servers on a daily basis. The report is emailed to the Information Assurance Officer's (IAO) mail server and for each server's primary System Administrator (SA) to review. The IAO reviews the report daily and sends issues to the security SA's who then email the appropriate SA.

c. Continue to train the system administrators to serve as alternate database administrators for Defense Property Accountability System.

DISA's Response: Concur.

Corrective action: DISA has established a process to improve the skill level to the recommended level. The process includes a weekly training session between the expert database administrator and the trainee database administrator. Given the legacy nature of this database, internal processes will be carefully modified to bridge knowledge shortfalls.

d. Document corrective actions performed regarding system batch processing errors.

DISA's Response: Concur. However, this recommendation should be forwarded to NAVSIS, as this finding pertains to the functionality of the DPAS application.

MEMORANDUM FOR THE COMMANDANT OF THE MARINE CORPS
DIRECTOR, DEFENSE FINANCE AND ACCOUNTING
SERVICE VIA INSPECTOR GENERAL, DEPARTMENT OF
DEFENSE, ASSISTANT INSPECTOR GENERAL FOR
AUDITING

Subj: **MARINE CORPS IMPLEMENTATION OF THE PROMPT PAYMENT ACT
(AUDIT REPORT N2006-0026)**

Ref: (a) NAVAUDSVC memo 7547/N2005-NMC000-0016, dated 2 Nov 04
(b) SECNAV Instruction 7510.7F, "Department of the Navy Internal Audit"

1. This report provides the results of the subject audit announced in reference (a). Section A of this report provides our findings and recommendations, summarized management responses, and our comments on the responses. Section B provides the status of the recommendations. The complete text of the management responses is provided in the Appendices. The table below notes the action command for each recommendation.

Command	Finding No.	Recommendation No.
Commandant of the Marine Corps	1, 2	1-3, 6-8
Defense Finance and Accounting Service	1	4, 5

2. Actions taken by the Commandant of the Marine Corps concerning recommendation 7 meet the intent of the recommendation and the recommendation is considered closed. Actions planned by the Commandant of the Marine Corps concerning recommendations 1-3, 6, and 8, and the Defense Finance and Accounting Service concerning recommendations 4 and 5 meet the intent of the recommendations. These recommendations are considered open pending completion of planned corrective actions, and are subject to monitoring in accordance with reference (b). Management should provide a written status report either upon completion of agreed-to actions or within 30 days of target completion dates. Please provide all correspondence to the Assistant Auditor General for Internal Control and Command Support Audits, Gregory N. Sinclitico, gregory.sinclitico@navy.mil, with a copy to the Director, Policy and Oversight, Vicki McAdams, Vicki.McAdams@navy.mil. Please submit correspondence in electronic format (Microsoft Word or Adobe Acrobat file) and ensure that it is on letterhead and includes a scanned signature.

3. Any requests for this report under the Freedom of Information Act must be approved by the Auditor General of the Navy as required by reference (b). This audit report is also subject to followup in accordance with reference (b).

Executive Summary

Overview

We reviewed Marine Corps implementation of the Prompt Payment Act (PPA) based on a request from the Assistant Deputy Commandant, Installation and Logistics (I&L) Department, Headquarters Marine Corps. The Marine Corps asked us to determine if their processes and procedures could be improved to ensure compliance with PPA requirements. As implemented by Office and Management guidance, the PPA requires Federal agencies to make payments in a timely manner and requires interest payments to contractors¹ for late payments (Exhibit A). The Defense Finance and Accounting Service (DFAS) Columbus, OH, makes payments for contracts and purchase orders based on supporting documentation (receiving reports, contractor invoices, and contract documents) which show that legal disbursement of funds may be made. DFAS payments to contractors include: Contract Pay, which are payments made through the Mechanization of Contract Administration Services (MOCAS) system for contracts that are typically high-value, complex, and multi-year in nature, primarily associated with major weapons system delivery and support. DFAS payments also include Vendor Pay, which entails payments made through the Computerized Accounts Payable System for Windows (CAPS(W)) for goods and services such as supplies, utilities, medical services, and transportation support.

For payments made on DoD contracts, Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) is the key DoD designated system for electronic submission of contractor invoices to CAPS(W). Electronic invoice submission is mandated by law, unless such submission cannot be made or certain exceptions exist, none of which were applicable to our review (Exhibit A). WAWF-RA is also the Marine Corps designated solution to the problem of late payments due to missing or late receiving reports. WAWF-RA provides receiving activities with the capability to electronically submit receiving reports to DFAS payment systems. Details are shown in Exhibit A.

The conditions we reviewed existed during the period November 2004 to August 2005. There were no relevant prior audit reports on which to follow up.

¹ For the purposes of this report, the terms "vendor" and "contractor" are used interchangeably.

Objective

The audit objective was to determine whether Marine Corps' internal controls over vendor and contract payments made were adequate to ensure compliance with PPA timeliness requirements.

Noteworthy Accomplishments

Noteworthy accomplishments are incorporated into Findings 1 and 2, which discuss Marine Corps/DFAS initiatives to monitor the respective areas discussed and which show progress made. Finding 1 (Impact section) specifically shows Marine Corps progress in reducing interest paid under PPA, a key WAWF-RA goal.

Finding 1 shows that the Marine Corps made efforts to monitor WAWF-RA usage for contractor invoices and receiving reports at Marine Corps activities to identify and address problems. They have made progress. Details are shown in Exhibit H.

Finding 2 shows that the Marine Corps and DFAS jointly undertook an April 2005 project to monitor and correct CAPS(W) rejects of contractor invoices submitted electronically to CAPS(W) through WAWF-RA for the top five contractors in terms of number of invoice rejects. The project helped reduce invoice rejects for these contractors. Details are shown in Exhibit L.

Conclusions

Marine Corps internal controls over vendor payments made were not adequate to ensure full compliance with PPA timeliness requirements. Specifically, while the Marine Corps made progress in this area, its efforts were not fully effective in implementing WAWF-RA and reducing CAPS(W) rejects of contractor invoices and receiving reports submitted electronically through WAWF-RA for payment. Further actions are needed. Also, DFAS needs to improve certain procedures to better support the Marine Corps in implementing WAWF-RA. We focused our audit efforts on issues related to WAWF-RA implementation because WAWF-RA was the key Marine Corps solution to the problem of late payments due to late or missing receiving reports and WAWF-RA was the key customer concern in this regard (Exhibit A). (Findings 1 and 2 Impact sections show the correlation between WAWF-RA implementation and resolving the late payment problem.)

As a result, (1) further Marine Corps improvements in reducing interest paid for late payments are possible; (2) many Marine Corps late payments and associated interest are still due to unrecorded receipts on CAPS(W), a problem that WAWF-RA electronically submitted receiving reports were intended to correct; and (3) the return on the Marine Corps investment in WAWF-RA has not been fully realized because some activities are not fully participating.

WAWF-RA Implementation. Our audit identified problems with manual submission of invoices and receiving reports for 63 of 146 (43.2 percent) of sample payments reviewed during the November 2004 to March 2005 period. Contractors erroneously submitted 62 of the 63 invoices to CAPS(W) for payment manually instead of electronically through WAWF-RA. Further, Marine Corps receiving activities erroneously submitted receiving reports manually to CAPS(W) for all 63 of the problem sample payments reviewed.

Further, we subsequently performed statistical analyses to determine the current status of WAWF-RA usage (May 2005 to August 2005) after our detailed sample review was completed. We concluded that the Marine Corps showed progress both within the May 2005 to August 2005 period and compared to the earlier sample review period, but still had room for improvement. Marine Corps-wide manual contractor invoice submissions to CAPS(W), compared to total contractor invoice submissions to CAPS(W), varied from 27.8 percent in May 2005 to 16.1 percent in August 2005. Marine Corps-wide manual receiving report submissions, compared to total receiving report submissions to CAPS(W), varied from 39.6 percent in May 2005 to 32.7 percent in August 2005. (Manual-to-total indicates how many invoices were submitted manually during that month versus the total amount submitted.)

CAPS(W) Rejects of WAWF-RA Contractor Invoices and Receiving Reports. We reviewed monthly Marine Corps-wide CAPS(W) reports for May 2005 to August 2005 to determine the number of invoices and receiving reports submitted to CAPS(W) electronically through WAWF-RA successfully and those submitted through WAWF but rejected by CAPS(W). We also compared these reject rates to an earlier December 2004 to April 2005 period to evaluate trends. We concluded that the Marine Corps showed progress during May 2005 to August 2005 as compared to the earlier period, but still had room for improvement. CAPS(W) reject rates for WAWF-RA electronically submitted contractor invoices (WAWF-RA invoices rejected/total WAWF-RA invoices submitted) varied from 30.1 percent in May 2005 to 37.4 percent in August 2005. They showed some improvement from the earlier period for which the invoice reject rates varied from 39 percent to 43 percent with no recognizable trend. CAPS(W) reject rates for WAWF-RA submitted receiving reports (WAWF-RA receiving reports rejected/total WAWF-RA receiving reports submitted) varied

from 15.0 percent in May 2005 to 21.2 percent in August 2005. These reject rates showed improvement over reject rates from the earlier period which varied from 30 percent to 34 percent with no recognizable trend.

We did not assess Marine Corps internal controls over contract payments made to ensure compliance with PPA timeliness requirements. We chose to focus on Vendor Pay and did not review Contract Pay further because we evaluated FY 2004 contract pay amounts disbursed under PPA, interest paid, and interest per million and did not consider amounts to be material (Exhibit D), particularly relative to Vendor Pay (Exhibit J).

Corrective Actions

We recommend that the Commandant of the Marine Corps take actions to improve internal controls to more effectively monitor the level of WAWF-RA usage within the Marine Corps and the number of WAWF-RA submitted contractor invoices and receiving reports rejected by CAPS(W).

We recommend that DFAS:

- Establish internal controls to ensure that DFAS rejects all contractor invoices manually submitted to CAPS(W) for payment that should be submitted electronically.
- Modify CAPS(W) database extracts used for monitoring WAWF-RA usage to include all receiving activities.

The Commandant of the Marine Corps and DFAS agreed with the recommendations and completed or initiated actions that should correct the conditions in the report. Managements' responses are summarized in Section A. The complete text of management responses is included in Appendix 1 and 2.

Section A:

Findings, Recommendations, and Corrective Actions

Finding 1: Wide Area Work Flow-Receipt and Acceptance Usage

Synopsis

Marine Corps implementation of Wide Area Work Flow-Receipt and Acceptance Usage (WAWF-RA) was not fully effective. The Marine Corps had made progress, but further actions are needed. Also, DFAS needs to improve certain procedures to better support the Marine Corps in these efforts. Headquarters Marine Corps generally required Marine Corps activities to implement WAWF-RA by 30 June 2004 for new contracts and 30 September 2004 for existing contracts.² Agencies are required to monitor and correct causes of late payments and maintain effective controls, to include documented analyses of actual performance against goals. Non-compliance with WAWF-RA requirements occurred because contracting offices did not include the WAWF-RA usage clause in their contracts as required. Further, they do not have internal controls to provide for contractor compliance with the usage clause. Receiving activities do not use WAWF-RA to electronically submit receiving reports to the payment office. The Marine Corps attempted to monitor WAWF-RA usage for contractor invoices and receiving reports to identify and address these problems, but further actions are needed. As a result, (1) further Marine Corps improvements in reducing interest paid for late payments are possible; (2) many Marine Corps late payments and associated interest are the result of unrecorded receipts on the Computerized Accounts Payable System for Windows (CAPS(W)), a problem WAWF-RA electronically submitted receiving reports were intended to correct; and (3) the return on the Marine Corps investment in WAWF-RA has not been fully realized because some activities are not fully participating.

² Marine Corps Logistics Command (MARCORLOGCOM) received a waiver to original deadlines to extend them to September 2004 and 31 December 2004, respectively. Deadlines were later revised for all Marine Corps activities to 30 September 2005.

Discussion of Details

Pertinent Guidance

WAWF-RA Guidance. Commandant of the Marine Corps White Letter No. 02-04, “Late Payments To Vendors,” dated 13 May 2004, directed the Deputy Commandant, Installation and Logistics (I&L) Department, Headquarters Marine Corps (HQMC) and Deputy Commandant, Programs and Resources Department, HQMC, to provide oversight for WAWF-RA by holding individual commands accountable.

Marine Corps Administrative Message 510/03, dated 4 November 2003, designated the Contracts Division, I&L Department, HQMC, as the WAWF-RA overall Functional Manager. It further required that each installation designate a WAWF-RA Point of Contact (POC) to support this initiative. According to the administrative message, the Marine Corps was supposed to followup with specific implementation details to designated POCs.

Exhibit A provides further details concerning WAWF-RA guidance and a description of WAWF-RA.

WAWF-RA Contract Clause Guidance. WAWF-RA contract clause-related guidance is shown in Exhibit A.

Prompt Payment Act Internal Control Related Guidance. Exhibit A provides details concerning the Prompt Payment Act (PPA) as implemented by Office of Management and Budget guidance. OMB Para 1315.3 requires agency heads to establish internal procedures to monitor the causes of late payments and any interest incurred, and take necessary corrective actions. This paragraph requires agency heads to maintain effective internal control systems, to include an effective quality control program to quantify payment performance and take corrective actions.

Department of Defense (DoD) Financial Management Regulation (FMR) 7000.14-R, Volume 10, Chapter 7, Paragraph 070501, which implements the PPA, requires that reasons for late payments shall be identified and corrective action taken so that the DoD goal of zero interest payments may be achieved. It also designates reason categories (including delays in disbursing office receipt of proper receiving reports and purchase orders or contracts).

Government Accountability Office (GAO)/Department of the Navy (DON) Internal Control-Related Guidance. GAO Standards for Internal Control in the Federal Government (November 1999) provides standards for maintaining controls at Government activities. It states that managers need to compare actual performance to planned or expected results in the organization and analyze significant differences. It specifically requires activities to monitor performance indicators and measures. It requires ongoing monitoring of internal controls in the course of normal operations. It further requires activities to maintain documentation of internal controls, all significant transactions, and other significant events; and that the documentation should be readily available for examination. Finally, it requires managers to evaluate findings from reviews and complete proper actions to correct deficiencies or produce improvements. Office of Management and Budget Circular A-123, dated 21 December 2004, required that Federal agencies implement the GAO Internal Control Standards.

Secretary of the Navy Instruction (SECNAVINST) 5200.35D, which incorporates the GAO Standards for Internal Control in the Federal Government, requires that managers continually monitor and improve the effectiveness of internal controls associated with their operations and that monitoring efforts be documented. At the time of our audit, SECNAVINST 5200.35D had not been updated with the current GAO standards. Therefore we cited OMB Circular A-123 as the guidance requiring implementation of GAO standards.

Audit Results

Marine Corps efforts to implement WAWF-RA were not fully effective. The Marine Corps had made substantial progress but further actions were needed. The following shows the results of our analyses and Exhibit B shows our scope and methodology.

Sample Payment Reviews

We reviewed 146 sample payments made between November 2004 and March 2005³ at 3 Marine Corps activities to determine if contractor invoices and receiving reports were submitted manually to CAPS(W) for payment instead of electronically through WAWF-RA. Exhibit B shows how we selected these activities and shows our universes and sample selection methodology. We concluded that WAWF-RA was often not used to electronically submit contractor invoices and receiving reports to CAPS(W) for payment. Our audit identified

³ As shown in Exhibit B, specific periods covered for samples reviewed varied within this period.

problems with manual submission of invoices and receiving reports for 42.5 percent (62 of 146) of sample payments reviewed. We found that contractors inappropriately submitted invoices manually to CAPS(W) for 42.5 percent (62 of 146) of sample payments reviewed. Marine Corps receiving activities inappropriately submitted receiving reports manually to CAPS(W) for 43.2 percent (63 of 146) of sample payments reviewed (same as the previous sample, plus one). These results varied widely by activity. A detailed breakdown by activity reviewed is in Exhibit E. Note that the Impact section shows the correlation between manual receiving reports and untimely payments.

May 2005 to August 2005 Marine Corps Wide WAWF-RA Usage

We reviewed May 2005 to August 2005 WAWF-RA usage reports provided by HQMC to obtain updated figures showing the extent of manual contractor invoice and receiving report submissions to CAPS(W) for payment to determine if the condition had improved and if a wide variance between Marine Corps activities reviewed still existed concerning WAWF-RA usage. We developed statistics from the usage reports Marine Corps-wide and for activities reviewed.⁴

Manual Contractor Invoice Submissions to CAPS(W). Marine Corps-wide manual contract invoice submissions to CAPS(W) declined as compared to total contractor invoice submissions to CAPS(W). The rate of decline varied from 27.8 percent in May 2005 to 16.1 percent in August 2005. Exhibit F provides details and shows that these respective figures were 19.5 percent to 5.8 percent for MARCORSYSCOM; 5.4 percent to 1.8 percent for the Regional Contracting Office (RCO) Quantico, VA; and 50.2 percent to 40.2 percent for MARCORLOGCOM. Details are shown in Exhibit F.

Consequently, we concluded that the Marine Corps showed some progress between May 2005 to August 2005, but still had room for improvement (Exhibit F). Also, results were not consistent between activities reviewed, although all showed recent downward trends. We concluded that MARCORSYSCOM and Regional Contracting Office (RCO) Quantico, VA had improved substantially over the earlier sample review period and

⁴ Marine Corps-wide statistics were not available during the sample review period because of CAPS(W) database inaccuracies in coding manual vs. WAWF-RA submissions, which DFAS subsequently took actions to correct. Note also that the activity-level statistics for both contractor invoices and receiving reports are by contracting office – which is how the Marine Corps currently tracks this data. As later noted, we could not identify receiving activities from CAPS(W) extracts. While contracting offices are not responsible for receiving reports, the data does show which contracting offices customers have problems with submitting manual receiving reports to CAPS(W) for payment.

had a low rate of WAWF-RA non-compliance. In contrast, MARCORLOGCOM generally showed similar or higher WAWF-RA non-compliance rates from May 2005 to August 2005 than during our earlier sample review period, and had a substantially higher rate of WAWF-RA non-compliance than the other activities reviewed.

Manual Receiving Report Submissions to CAPS(W). Marine Corps-wide manual receiving report submissions, as compared to total receiving report submissions to CAPS(W), declined from 39.6 percent in May 2005 to 32.7 percent in August 2005. Exhibit G provides details and shows that respective figures were 30.8 percent to 36.0 percent for MARCORSYSCOM (no general trend); 19.0 percent to 15.1 percent for RCO Quantico, VA (no general trend/June and July 2005 substantially higher); and 63.0 percent to 56.7 percent for MARCORLOGCOM (no general downward trend). (See Exhibit G.)

Consequently, we concluded that the Marine Corps showed some overall progress over the May 2005 to August 2005 period, but still had room for improvement. Manual receiving report submissions were a larger problem than manual contractor invoice rates (Exhibit G). Also, results were not consistent between activities reviewed and all three activities needed improvement. The three activities had widely varying manual receiving report submission rates, substantially higher manual receiving report submission rates than manual contractor invoice submission rates, and showed no recent general trends. Further, when compared to the earlier sample review period (November 2004 to March 2005) MARCORLOGCOM had a substantially higher manual receiving report submission rate, MARCORSYSCOM showed slight improvement, and RCO Quantico showed substantial improvement.

Causes

Activity Level WAWF-RA Implementation Procedures.

WAWF-RA Usage Clause. For 19.9 percent (29 of 146) sample payments reviewed, MARCORSYSCOM, RCO Quantico and MARCORLOGCOM contracting officers did not include the required WAWF-RA usage clause in their contracts to mandate that contractors submit invoices electronically to CAPS(W) for payment through WAWF-RA. Exhibit E shows a breakdown by activity. Key reasons contracting office personnel cited for not using the WAWF-RA clause in contracts included: (1) lack of contracting office oversight over this process, (2) the contracting office was slow to comply with WAWF-RA clause

requirements when they were implemented, and (3) the need to pay the contractor quickly. Contracting officers believed prompt payment was a higher priority than modifying existing contracts to place the WAWF-RA clause in the contract and have the contractor submit invoices electronically. Contracting officers believed that they did not have time to modify the contracts for electronic submission as well as pay the contractor promptly.

Contractor Non-compliance With WAWF-RA Usage. MARCORSYSCOM, RCO Quantico, and MARCORLOGCOM did not have internal controls to provide for contractor compliance with requirements to submit their invoices electronically through WAWF-RA when WAWF-RA usage clauses were incorporated into contracts. Internal controls are required in order to meet the intent of GAO and SECNAV internal control guidance. We found that contractors did not comply with WAWF-RA usage clauses for 22.6 percent (33 of 146) sample payments reviewed. Details by activity are shown in Exhibit E. Key reasons contracting office personnel cited for contractors submitting invoices manually in non-compliance with the contract WAWF-RA clause were: (1) the contractor was allowed by the contracting office to use a paragraph in the WAWF-RA clause that allowed manual input when a contractor could not use WAWF-RA because of the need for rapid turnaround times for contract delivery, and (2) the contractor did not receive WAWF-RA training. In several cases, the reasons for contractor non-compliance could not be determined. In those cases where no justification was provided, we considered that non-compliance.

We did not consider reasons cited for not using the WAWF-RA clause or contractor non-compliance with the clause for these sample payments to be valid. The need to pay contractors promptly was a problem unique to start-up efforts in implementing WAWF-RA, as it dealt with modifying pre-existing contracts to incorporate the WAWF-RA clause. (The Marine Corps was required to modify existing contracts as well as apply the clause to new contracts.) However, the other reasons were relevant to all contracts for which problems were noted and therefore were problems that needed to be addressed by the Marine Corps.

We did not determine why receiving activities did not electronically submit receiving reports to CAPS(W).

Sufficiency of Marine Corps Efforts To Monitor WAWF-RA Usage.

The Marine Corps made efforts to monitor WAWF-RA usage for contractor invoices and receiving reports at Marine Corps activities to identify and address problems. They had achieved progress (Exhibit H provides details of progress made). However, further actions were needed to meet the intent of PPA and DoD guidance requiring activities to monitor causes of late payments, take corrective

actions, and maintain effective control systems. These actions would address the specific causes identified during our sample review and any other causes of late payments disclosed by improved monitoring procedures. Also, DFAS needed to improve certain procedures to better support the Marine Corps in these efforts. The following identifies specific Marine Corps and DFAS actions needed, as well as applicable criteria.

WAWF-RA Monitoring Guidance. On 10 August 2005 (20 months after the 4 November 2003 HQMC guidance established the requirement for field-level WAWF-RA monitors), HQMC personnel informed us that they had not issued specific WAWF-RA monitoring policy or procedures to field activities as planned. They stated they were working on standard guidance. We confirmed with RCO Quantico, VA and MARCORLOGCOM contracting office personnel that they had not received any guidance and had not established local guidance. They informed us that HQMC coordination concerning WAWF-RA consisted of data calls to which they had to respond, such as lists of late contractor invoices requiring action (Exhibit H). Implementing policy should be issued.

Trend Analyses—WAWF-RA Usage For Contractor Invoices. HQMC had not performed trend analyses from monthly CAPS(W) extracts concerning WAWF-RA usage for contractor invoices. Documented trend analyses are needed to meet the intent of PPA, GAO, and SECNAV internal control guidance for monitoring operations. Further, it would be useful in identifying those RCOs and contractors for improvement that have the most significant rates of manual contractor invoice submissions, determining how they have done historically, and tracking future progress. It would thereby aid in the cited goal of communicating with RCOs and contractors to ensure WAWF-RA compliance and solve related problems (Exhibit H).

Instead of conducting trend analysis, the Marine Corps provided the detailed CAPS(W) database extracts to activities for analyses and action (Exhibit H). This process assists in identifying and correcting deficiencies for individual contracts. However, it does not provide the needed complete HQMC overview to track progress of corrective actions and target specific problem areas. These trend analyses should be performed at Headquarters and activity levels as part of standard WAWF-RA monitoring procedures discussed. For example, we noted that for another joint DFAS/Marine Corps project to analyze rejects of WAWF-RA submissions from CAPS(W) (Finding 2 and Exhibit L), statistical data was broken down and

tracked for the top five contractors with invoice rejects. This effort succeeded in reducing rejects for those contractors. Similar analyses could be performed for the WAWF-RA usage issue. Exhibit I shows two examples of the types of analyses that could be performed and highlights specific problem areas concerning WAWF-RA usage.

RCO Internal Controls—WAWF-RA Usage For Contractor Invoices. RCOs were not requested to improve, and did not provide any plans for improving, internal controls to resolve WAWF-RA usage problems for contractor invoices. RCOs were required to provide reasons for WAWF-RA non-compliance for specific contractors and submit a detailed plan to HQMC for ensuring contractor compliancy with invoice WAWF-RA requirements as noted (Exhibit H). Responses generally showed how the RCOs corrected or planned to correct the particular contract.

However, activities should be required to also show how internal controls will be improved to eliminate significant causes identified. This is needed to meet the intent of GAO requirements for managers to evaluate findings from reviews and determine and complete proper actions to correct deficiencies or produce improvements.

For example, our analyses of sample payments (as confirmed by selected RCOs' corrective action plans received back by HQMC to date) showed that common causes for manual invoice submission to CAPS(W) were: (1) insufficient RCO oversight concerning not placing WAWF-RA clauses in contracts, and (2) contractors not complying with the clauses and not being required by contracting officers to justify their actions. We also identified lack of contractor WAWF-RA training as an issue in some cases.⁵ These are problems that improved internal controls would correct.

WAWF-RA Usage Monitoring-Receiving Reports. Eleven months after the original 30 September 2004 WAWF-RA implementation deadline, and 9 months after the 31 December 2004 deadline for MARCORLOGCOM, the Marine Corps had not analyzed WAWF-RA usage for receiving reports. DFAS provided the same monthly May 2005 to August 2005 CAPS(W) extracts to HQMC showing manual versus WAWF-RA receiving report submissions to CAPS(W) as were provided for contractor invoices.

⁵ Note that the other key issue we identified concerned contracting offices not using WAWF-RA clauses or contractors not complying with clauses due to the need for fast payment on contracts with quick turnaround times (deliveries). This should not be a significant future issue, as it dealt with using WAWF-RA on contracts already awarded at the time of Marine Corps WAWF-RA implementation.

However, the Marine Corps had not made efforts at the time of our review on 24 August 2005 to analyze these reports or initiate corrective actions, as had been done for contractor invoices. These efforts are needed to meet the intent of PPA, GAO, and SECNAV internal control guidance for monitoring operations. They are also needed to target specific problem areas and take corrective actions. For example, our analyses of the May 2005 to August 2005 CAPS(W) extracts showed a specific problem area and demonstrated the type of analyses that can be performed. Details are in Exhibit I.

DFAS Rejects of Manual Invoices Submitted to CAPS(W). Although our statistical analyses showed a decline in manual submission of contractor invoices to CAPS(W) for payments, they indicate that DFAS was still not rejecting all manual invoices for which manual submission was not justified as requested by the Director, Contracts Division, HQMC. We found that the rate of manual invoices submitted by contractors to CAPS(W) for payment varied from 27.8 percent in May 2005 to 16.1 percent in August 2005 (Exhibit F). After our review, the Marine Corps informed us on 24 January 2006 that they intend to implement a continuous review process of the vendors submitting invoices manually to determine if there is reasonable justification and if an exception should/has been granted. This information will be provided to all concerned to ensure “manual” invoices are being defined and reported in the same manner by all contractors.

CAPS(W) WAWF-RA Usage Extracts-Receiving Activity Code. We found that CAPS(W) extracts (which DFAS provided to the Marine Corps to analyze manual vs. WAWF-RA submissions to CAPS(W)) did not identify many receiving activities. This is a critical omission because receiving activities are accountable for manually receiving WAWF-RA report submissions. We reviewed the May 2005 to August 2005 CAPS(W) extracts, and found that the receiving activity was not identified for 43.1 percent (1,742 of 4,044) of invoices for May 2005; 37.2 percent (1,821 of 4,897) of invoices for June 2005; 39.0 percent (1,438 of 3,691) of invoices for July 2005; and 35.9 percent (1,937 of 5,396) of invoices for August 2005, with no recognizable trend over this period. DFAS needs to correct this problem. Identifying the receiving activity is critical since they are accountable for WAWF-RA manual receiving report submissions.

Impact

Marine Corps-Wide Interest Per Million

We concluded that the Marine Corps had made progress concerning Interest Per Million (IPM) (the key indicator of Marine Corps PPA performance), but trends were not consistently positive and there was room for further improvement. The Marine Corps had improved in IPM in FY 2005 as compared to FY 2004. (See Exhibit J.) However, we noted no recognizable trend during FY 2005, and the August 2005 IPM was actually higher than in October 2004. Further, while the FY 2005 Non-DFAS-Fault IPM (primarily Marine Corps fault) was still over the Marine Corps goal, there was no recognizable trend during FY 2005. The August 2005 Non-DFAS-Fault IPM was actually only slightly less than October 2004. Details are shown in Exhibit J.

Late Payments Due to Unrecorded Receipts

A key WAWF-RA goal was to improve the processing of receiving reports through electronic submission to CAPS(W) for payment, and thereby reduce late payments and associated interest due to unrecorded receiving reports on CAPS(W). This finding and Exhibit I show that WAWF-RA has been successful in reducing processing timeframes. However, we found that late payments due to unrecorded receiving reports accounted for 31 percent (2,686 of 8,661) of late payments during October 2004 to August 2005. There was no recognizable trend and August 2005 late payments due to unrecorded receiving reports were only slightly below those of October 2004. The remaining 69 percent of late payments consisted of several miscellaneous causes which we did not review because of time constraints and because those involving DFAS were outside the scope of our audit. Often, fault for these late payments was designated as a DFAS fault, while we focused on Marine Corps functions.

We further found that the top four Marine Corps activities with late payments due to unrecorded receiving reports during October 2004 to August 2005 were, in descending order: MARCORSYSCOM; Marine Corps Base (MCB) Camp Pendleton, CA; Marine Corps Forces Reserve; and MCB Camp Lejeune, NC. These activities accounted for 37.8 percent (1,014 of 2,686) of late payments.

Finally, we found that manually received report submissions to CAPS(W) between October 2004 to August 2005 accounted for 82.5 percent (2,216 of 2,686) of late payments due to unrecorded receiving reports. WAWF-RA submissions only accounted for 16.3 percent (439 of 2,686) of late payments (the remaining 31 were submitted by other electronic means).

These analyses, in total, demonstrate that increased WAWF-RA usage can reduce late payments due to receiving report problems. They also show the need for: (1) improvements in Marine Corps monitoring of WAWF-RA usage concerning receiving reports to reduce late payments and associated interest, and (2) statistical analyses of WAWF usage concerning receiving reports to identify specific Marine Corps receiving activities for improvement.

Cost of WAWF-RA

Costs to implement WAWF-RA at Marine Corps activities totaled \$1.4 million. Consequently, the Marine Corps needs to ensure that all activities and contractors are WAWF-RA compliant to fully realize a return on this investment.

Recommendations

We recommend that the Commandant of the Marine Corps (CMC):

Recommendation 1. Issue guidance, including internal controls to ensure compliance, requiring documented trend analyses concerning monthly WAWF-RA usage for contractor invoices and receiving reports. These analyses should evaluate the level of Marine Corps-wide WAWF-RA usage and at more detailed levels, such as those shown in the audit finding, to target specific problem areas and allow for corrective actions.

CMC response to recommendation 1. Concur. HQMC performs trend analysis on an ongoing basis to track overage invoices, manual submissions, and those contracting processes/procedures that inhibit the use of WAWF-RA. HQMC will continue to utilize available data to perform root cause analysis using Lean Six Sigma methodology. HQMC will issue standard procedures guidance in concert with recommendation 2. Planned completion date is 30 September 2006.

Naval Audit Service comment on response to recommendation 1. CMC planned actions meet the intent of the recommendation.

Recommendation 2. Issue guidance, establish internal controls to ensure compliance, and establish standardized procedures for followup at the Headquarters and activity levels when analyses show deficiencies in RCO/receiving activity/contractor performance in WAWF-RA usage.

CMC response to recommendation 2. Concur. HQMC is developing standard procedures to ensure WAWF-RA usage and corrective action if deficiencies are found. Procedures include weekly conference calls with Regional Contracting Offices (RCOs) and monthly HQMC reviews to identify deficient RCOs and contractors concerning WAWF-RA usage. Details are in Appendix 1. Planned completion date is 30 September 2006.

Naval Audit Service comment on response to recommendation 2. CMC planned actions meet the intent of the recommendation.

Recommendation 3. Issue guidance and establish internal controls to ensure compliance, requiring RCOs and receiving activities to provide plans to Headquarters Marine Corps for improving internal controls concerning WAWF-RA usage for contractor invoices and receiving reports when analyses show deficiencies at the RCO/receiving activity/contractor level and corrective actions are required.

CMC response to recommendation 3. Concur. HQMC is developing a standard WAWF clause to be used by all RCOs. HQMC will draft the action plan with input from the RCOs. Once the WAWF clause is complete, a memo will be sent to all RCOs requiring the use of the WAWF clause in all new and existing contracts. Planned completion date is 30 September 2006.

Naval Audit Service comment on response to recommendation 3. CMC planned actions meet the intent of the recommendation.

We recommend that the Defense Finance and Accounting Service:

Recommendation 4. Establish internal controls to ensure that DFAS rejects all contractor invoices manually submitted to CAPS(W) for payment that should be submitted electronically.

DFAS response to recommendation 4. Concur. DFAS Columbus has established internal controls by having the technicians ensure manually received invoices are rejected in a timely manner if the electronic billing clause is included in the contract. Review by supervisors and leads further ensures timely reject where appropriate. A return letter which specifies this lack of compliance is included with a copy of the original invoice and is returned within 7 days as specified by the PPA. Periodic evaluation of this control will be incorporated into the Management Control Program matrix. In addition, further analysis will be performed to determine alternative approaches to automating this manual control and the cost associated with each alternative. Planned completion date is

3 July 2006.

Naval Audit Service comment on response to recommendation 4. DFAS planned actions meet the intent of the recommendation.

Recommendation 5. Modify CAPS(W) database extracts used for monitoring WAWF-RA usage to include all receiving activities.

DFAS response to recommendation 5. Concur. Further analysis must be performed to determine the root cause for the lack of receiving activity data through the Standard Procurement System interface provided by Marine Corps contracting offices. DFAS will partner with the Marine Corps in this analysis to develop solutions to modify systems or interfaces to ensure data availability for the CAPS(W) database extracts. Planned completion date is 3 July 2006.

Naval Audit Service comment on response to recommendation 5. DFAS planned actions meet the intent of the recommendation.

Finding 2: Rejection of WAWF-RA Submitted Contractor Invoices and Receiving Reports by the Computerized Accounts Payable System for Windows (CAPS(W))

Synopsis

Marine Corps efforts were not fully effective in reducing CAPS(W) rejects of contractor invoices and receiving reports submitted electronically through WAWF-RA for payment. The Marine Corps and DFAS had made progress, but further Marine Corps actions were needed. HQMC generally required Marine Corps activities to implement WAWF-RA by 30 June 2004 for new contracts and 30 September 2004 for existing contracts.⁶ Agencies were required to monitor causes of late payments and take corrective actions and maintain effective control systems, to include documented analyses of actual performance against goals. Invoice rejects were reduced as a result of a joint Marine Corps and DFAS April 2005 project to monitor and correct CAPS(W) rejects of WAWF-RA submitted invoices for certain contractors with high reject numbers. However, additional Marine Corps actions were needed to monitor and reduce invoice and receiving report rejects from CAPS(W) because progress to date will not fully address the issue of receiving report rejects and of CAPS(W) invoice rejects for some contractors. As a result, (1) further Marine Corps improvements in reducing interest paid for late payments could still be made; (2) a large portion of late Marine Corps payments and associated interest were still due to unrecorded receiving reports on CAPS(W), a problem WAWF-RA electronically submitted receiving reports were intended to correct; and (3) the return on the substantial Marine Corps investment in WAWF-RA has not been fully realized.

Discussion of Details

Background and Pertinent Guidance

WAWF-RA Implementation/Internal Control Requirements. Finding 1 and Exhibit A provide Background and Pertinent Guidance concerning WAWF-RA implementation requirements, and PPA and DoD guidance requiring activities to monitor causes of late payments, take corrective actions, and maintain effective control systems. Finding 1 also provides GAO and SECNAV guidance concerning internal controls.

Supporting Documentation for Payments. OMB Paragraph 1315.4(c) as implemented by DoD FMR 7000.14-R Volume 10 Chapter 7 Paragraph 070201 requires agencies to review contractor invoices and reject improper invoices to

⁶ Deadlines were later revised to 30 September 2005 for all Marine Corps contracts.

contractors for correction, specifying all reasons why the invoice is improper and the corrections needed. Paragraph 1315.9 (b) as implemented by DoD FMR 7000.14-R Volume 10 Chapter 7 Paragraph 070201 and FAR Part 32.905, establishes proper invoice requirements. Paragraphs 1315.4(d) and (e) require that agencies ensure that receipts are properly recorded at time of delivery of goods and services and acceptance is executed as promptly as possible. Paragraphs 1315.9 (c) and (d) establish proper receiving report requirements.

Audit Results

Marine Corps efforts to reduce CAPS(W) rejects of contractor invoices and receiving reports submitted electronically through WAWF-RA for payment are not fully effective. The Marine Corps and DFAS had made progress but further Marine Corps actions are needed. Exhibit B shows our general scope and methodology. We determined the extent of CAPS(W) rejects of WAWF-RA submitted contractor invoices and receiving reports. Specifically, we reviewed May 2005 to August 2005 monthly Marine Corps-wide CAPS(W) extracts showing invoices and receiving reports submitted to CAPS(W) electronically through WAWF-RA successfully and those submitted through WAWF but rejected by CAPS(W). We also compared these reject rates to an earlier December 2004 to April 2005 period to evaluate trends.

CAPS(W) Contractor Invoice Rejects. CAPS(W) reject rates for WAWF-RA submitted contractor invoices (WAWF-RA invoices rejected/total WAWF-RA invoices submitted) varied from 30.1 percent in May 2005 to 37.4 percent in August 2005. Details are shown in Exhibit K. We concluded that these rates were high but there was no recognizable trend. They showed some improvement from an earlier period (December 2004 to April 2005), for which the invoice reject rates varied from 39 percent to 43 percent during the period with no recognizable trend.

CAPS(W) Receiving Report Rejects. CAPS(W) reject rates for WAWF-RA submitted receiving reports (WAWF-RA receiving reports rejected/total WAWF-RA **receiving reports** submitted) varied from 15.0 percent in May 2005 to 21.2 percent in August 2005. Details are shown in Exhibit K. We concluded that these rates were substantially lower than CAPS(W) **invoice** reject rates, but were still high. Also, there was a general increase in the CAPS(W) WAWF-RA receiving report reject rate over the period. These reject rates showed improvement over reject rates from an earlier period (December 2004 to April 2005), which

varied from 30 percent to 34 percent during the period with no recognizable trend.

Causes

In April 2005, the Marine Corps and DFAS jointly undertook a project to monitor and correct CAPS(W) rejects of contractor invoices submitted electronically to CAPS(W) through WAWF-RA for the top five contractors in terms of number of invoice rejects. The project made progress in reducing invoice rejects for these contractors. Details are shown in Exhibit L. However, additional Marine Corps actions were needed to monitor and reduce invoice and receiving report rejects from CAPS(W) on an ongoing basis because progress to date will not fully address the issue of receiving report rejects and of CAPS(W) invoice rejects for all contractors. The following identifies actions needed, as well as applicable criteria:

Marine Corps Monitoring of CAPS(W) Contractor Invoice Rejects. The Marine Corps had not developed any ongoing Marine Corps-wide goals for reducing the number of WAWF-RA submitted contractor invoices rejected by CAPS(W) and therefore did not track actual performance against goals. The only goal established was a 30 percent one-time goal under the Kaizen project (see Exhibit L), which only addressed the top five contractors with rejects. GAO and SECNAV internal control guidance requires that managers continually monitor and improve controls over their operations (Finding 1 Pertinent Guidance).⁷ GAO guidance in particular requires managers to establish performance indicators and monitor actual performance against these indicators. PPA and GAO internal control-related guidance require managers to take corrective actions for deficiencies identified (Finding 1 Pertinent Guidance).

Our results showed that significant Marine Corps-wide CAPS(W) invoice reject rates still existed, even after the Kaizen project had been completed in April 2005. This fact, along with the high reject rates we noted specifically for the next five highest contractors in terms of invoice rejects (discussed below), demonstrated the need for the Marine Corps to establish ongoing goals for reducing CAPS(W) invoice rejects, track performance against goals, and identify and take needed corrective actions.

⁷ SECNAV Instruction 5200.35D requires that DON adhere to OMB Circular A-123 which incorporates the revised GAO Internal Control Standards.

Our analyses of May 2005 to August 2005 CAPS(W) extracts showed that invoice reject rates can be broken down to identify problem areas and track performance. Details are shown in Exhibit M.

Marine Corps Monitoring of CAPS(W) Receiving Report Rejects. At the time of our review, the Marine Corps had not made efforts to analyze CAPS(W) rejects for receiving reports submitted through WAWF-RA. On 16 September 2005 (1 year after the original Marine Corps WAWF-RA implementation deadline and 9 months after the MARCORLOGCOM deadline), DFAS Kaizen project personnel informed us that a project team was forming to analyze WAWF-RA-submitted receiving report rejects from CAPS(W). Procedures were also being drafted for DFAS Vendor Pay technicians to process these rejects. The Kaizen project team had not started this project until this time due to other priorities and the Marine Corps had taken no other actions to analyze this issue prior to this planned effort.

Our results showed that significant Marine Corps-wide CAPS(W) reject rates for receiving reports still existed between May 2005 and August 2005 and had actually increased. Therefore, the Marine Corps needs to establish the same type of ongoing goals for reducing CAPS(W) receiving report rejects as for invoices, track performance against goals, and identify and take needed corrective actions until reject rates reach acceptable levels. The same criteria applies as for invoice rejects.

Our analyses of May 2005 to August 2005 CAPS(W) extracts showed that receiving report rejects can be broken down to target problem areas and identify and correct problems. Details are shown in Exhibit M.

Documentation of Analyses of CAPS(W) Contractor Invoice Rejects. Kaizen project personnel had not been required to and had not developed documentation summarizing root-cause analyses performed to analyze WAWF-RA-submitted contractor invoices rejected by CAPS(W) for the top five contractors with invoice rejects (Exhibit L). The documentation provided to us was fragmented, difficult to follow, and did not provide a clear description of how personnel went from initial identification of the common types of rejects to the corrective actions. Exhibit N provides two examples.

HQMC personnel informed us that root-cause analyses were complex and hard to document. However, SECNAV guidance requires that efforts by managers to monitor their operations and evaluate related controls must be properly documented (Finding 1 Pertinent Guidance) and available for

examination, and prescribes specific documentation requirements. Further, we noted that corrective actions tended to focus on defining what problem occurred rather than providing specific corrective actions, such as needed internal control improvements. However, we could not evaluate the adequacy of corrective actions without documentation supporting the root-cause analyses leading to the corrective actions.

The Marine Corps, as part of their participation in Kaizen projects such as the planned CAPS(W) receiving report reject project and as part of recommended monitoring procedures for CAPS(W) contractor invoice and receiving report rejects, needs to ensure that results of root-cause analyses are clearly documented.

Guidance to Contractors – Invoice Rejects. HQMC did not provide guidance to contractors other than the top five contractors in terms of WAWF-RA-submitted invoice rejects from CAPS(W) concerning the common types of errors the Kaizen project found for these top five contractors (Exhibit L). This was cited as a pending issue in a 7 April 2005 Kaizen brief, but the actions were never taken. Kaizen project personnel only informed DFAS pay technicians to use the instructions concerning invoice reject processing for the common errors for all contractors. They informed us that guidance to other contractors was outside their scope, which was limited to the top five contractors.

We analyzed May 2005 to August 2005 CAPS(W) extracts showing invoices received during those months to determine WAWF-RA invoice reject rates from CAPS(W) for the next five contractors with the highest number of invoice rejects. We found that over that period of time, 960 (50.8 percent) of 1,888 total WAWF-RA contractor invoice submissions to CAPS(W) for these next five contractors were rejected by CAPS(W) with no recognizable trend. This indicated that other contractors had significant invoice reject problems and, therefore, guidance to them concerning this issue was needed as had been provided to the top five contractors. Details are shown in Exhibit O.

Impact

Marine Corps-Wide Interest Per Million

We concluded that the Marine Corps had made substantial progress concerning IPM (the key indicator of Marine Corps PPA performance) but trends were not consistently positive and there was room for further improvement (Finding 1

Impact section). We also found that late payments due to unrecorded receiving reports accounted for 31 percent of the late payments during October 2004 to August 2005. Details are shown in Finding 1 Impact. A key WAWF-RA goal was to improve the processing of receiving reports through electronic submission to CAPS(W) for payment to reduce late payments and associated interest. Finding 1 and Exhibit I showed that WAWF-RA has been successful in reducing processing timeframes. However, Finding 2 and Exhibit M showed CAPS(W) rejects of WAWF-RA-submitted receiving reports added additional processing time. This contributes to the problem of late payments due to unrecorded receiving reports. CAPS(W) must have an acceptable receiving report to allow DFAS to process a contractor invoice for payment. CAPS(W) considers a receiving report “unrecorded” until the receiving report is acceptable.

Cost of WAWF-RA.

Costs to implement WAWF-RA at Marine Corps activities totaled \$1.4 million. Consequently, the Marine Corps needs to ensure that WAWF-RA successfully processes contractor invoices and receiving reports to CAPS(W) to fully realize a return on this investment.

Recommendations

We recommend that the Commandant of the Marine Corps:

Recommendation 6. Develop ongoing Marine Corps-wide goals for reducing the number of WAWF-RA submitted contractor invoices and receiving reports rejected by CAPS(W), track actual performance against goals, and identify and take needed corrective actions. Use trend analyses techniques to target problem areas.

CMC response to recommendation 6. Concur. HQMC is analyzing submitted contractor invoices and receiving reports rejected by CAPS(W). HQMC will coordinate with the program manager, Marine Corps Systems Command, to ensure that repetitive technical issues are resolved in a timely manner. In coordination with DFAS, HQMC will participate in a Kaizen project analyzing and developing goals for more effective use of WAWF-RA and CAPS(W). Planned completion date is 30 March 2007.

Naval Audit Service comment on response to recommendation 6.
CMC planned actions meet the intent of the recommendation.

Recommendation 7. Require Marine Corps personnel, as part of their participation in future Kaizen projects related to WAWF-RA and ongoing monitoring of CAPS(W) rejects (Recommendation 6), to ensure that root-cause analyses concerning CAPS(W) rejects of invoices and receiving reports are clearly documented, evaluate root cause trends and reflect consideration of all manual and systemic options for resolving problems.

CMC response to recommendation 7. Concur. DFAS is the project manager on future Kaizen projects. The Marine Corps will include documentation of root cause analyses and trends in future Kaizen projects in coordination with DFAS. Planned completion date is 26 April 2006.

Naval Audit Service comment on response to recommendation 7. CMC actions meet the intent of the recommendation. CMC indicated that these actions would be incorporated into future Kaizen projects as recommended. Concerning ongoing CAPS(W) reject monitoring efforts (the other part of the recommendation) the CMC response to recommendation 6 indicated that HQMC will identify and resolve recurring technical issues, which also meets the intent of recommendation 7. We consider this recommendation closed.

Recommendation 8. Provide guidance to all contractors other than the top five contractors with CAPS(W) invoice rejects concerning the common types of errors the Kaizen project found for the top five contractors.

CMC response to recommendation 8. Concur. Guidance and training will be provided to all contractors once common errors are identified. Details are in Appendix 1. Planned completion date is 30 March 2007.

Naval Audit Service comment on response to recommendation 8. CMC planned actions meet the intent of the recommendation.

Background

Audit Request. We reviewed Marine Corps implementation of the Prompt Payment Act (PPA) based on a 29 June 2004 request from the Assistant Deputy Commandant, Installation and Logistics (I&L) Department, Headquarters, Marine Corps (HQMC). We held a Pre-Announcement Letter meeting with the Director, Contracts Division, I&L Department, HQMC on 28 October 2004 and status meetings on 27 January 2005, 10 February 2005, and 18 May 2005 respectively with the Director, the Deputy Director, and his staff. Overall, the basis for the request was that HQMC personnel believed that Marine Corps' PPA implementation in terms of late payments and associated interest payments was improving (which our review confirmed), but they wanted us to review PPA related initiatives taken and determine what further steps could be taken to bring these values closer to zero. Specific customer concerns, which were expressed at these meetings and which we were requested to review were as follows:

- Focus on Marine Corps causes of late payments and corresponding interest payments (vs. problems at the Defense Finance and Accounting Service (DFAS) Columbus, OH payment office level) at selected Marine Corps activities.
- Focus on timeliness of payments vs. accuracy of payments because timeliness is the key driver for interest payments.
- Focus primarily on Vendor Pay (CAPS(W)) (Computerized Accounts Payable System for Windows) vs. Contract Pay (MOCAS) (Mechanization of Contract Administration Services) because Vendor Pay represents much larger values in terms of dollars disbursed subject to PPA requirements and interest paid (which our review substantiated).
- Focus on Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) because it is the key Marine Corps solution to late payments as it concerns receiving reports, due to its electronic submission feature. Determine if selected activities are actually using WAWF-RA to electronically submit receiving reports to DFAS payment systems and requiring contractors to use it to electronically submit invoices.
- Determine why CAPS(W) rejects receiving reports from WAWF-RA at such high rates and what Marine Corps actions could be taken to improve the reject rate.

- Provide trend analyses (1) at the most detailed level possible concerning causes of late payments, levels of WAWF-RA usage by Marine Corps receiving activities and contractors, and rejects of WAWF-RA submitted invoices and receiving reports from CAPS(W), and (2) to show historical Marine Corps progress in implementing PPA requirements in terms of values of late payments and associated interest.
- Review obligation-related issues associated with late payments. Obligations are provided to DFAS payment systems primarily by the Standard Procurement System to support payments made.

Prompt Payment Act. The Prompt Payment Act of 21 May 1982 as implemented in Overview Office of Management and Budget (OMB) 5 Code of Federal Regulations (CFR) chapter III Part 1315.3(e), amended on 17 October 1988 (Public Law 100-496), requires federal agencies to make payments in a timely manner. If a payment to a contractor is late, an interest payment is also due to the contractor (Paragraphs 1315.3(e) and 1315.4(i), Federal Acquisition Regulation (FAR) Part 32 “Prompt Payment Act” paragraph 32.907). FAR Paragraph 32.908 establishes PPA contract clause requirements to mandate interest penalties for late payments to contractors. PPA Paragraph 1315.1(a) shows that the PPA applies to the acquisition of property and services.

Marine Corps PPA Implementing Guidance. Commandant of the Marine Corps White Letter No. 02-04, “Late Payments To Vendors” dated 13 May 2004 states that immediate attention to the longstanding and serious problem of late payments to contractors and associated interest payments to contractors is required. It states that the Marine Corps determined that the two key reasons for untimely payments were missing or late receiving reports and unrecorded obligations. Their respective solutions were to implement WAWF-RA immediately at every receipt and acceptance point in the Marine Corps and ensure that obligations are recorded timely and accurately on the Standard Accounting and Reporting System.

Marine Corps Administrative Message 510/03, dated 4 November 2003, states that Section 1008 of the National Defense Authorization Act requires the electronic submission and processing of claims for payments under Department of Defense (DoD) contracts. It states that DoD identified WAWF-RA as a key system in implementing this statutory requirement. This system provides electronic submission via the internet of both invoices from contractors and receiving reports from Marine Corps receiving activities to DFAS payment personnel to make payments. The message states that a key goal is to reduce interest penalties. It shows that interest penalties due to missing receiving reports accounted for one-third of Fiscal Year 2003 \$1.3 million interest penalties and

half of the Marine Corps attributable interest. It identified WAWF-RA implementation as the key action needed to address this cause of late payments.

WAWF-RA Contract Clause Guidance. Various subsequent Marine Corps guidance showed that required WAWF-RA implementation includes placing the Defense Federal Acquisition Supplement (DFARS) 252.232-7003 “Electronic Submission of Payment Requests” clause in contracts to provide for contractors to submit electronic invoices. This clause requires electronic invoice submission unless such a submission cannot be made. DFARS Paragraph 232.7002 states that this clause is required for all contracts except purchases paid with Government-wide commercial credit cards, awards made to foreign vendors, classified contracts or purchases, and certain other cases. None of these cases were applicable to our review. This paragraph also requires that when invoices are submitted electronically for payment, supporting documentation such as receiving reports, contracts, contract modifications and required certifications must also be processed in electronic form (scanned documents are acceptable for supporting documentation to meet this requirement). This paragraph further shows that WAWF-RA is one of three acceptable forms of electronic invoice submission for contractors. When we were deriving the statistical data concerning WAWF-RA usage for Finding 1, we found that usage of these other electronic forms of submission was so minimal that we did not comment on them in the audit report. The key issue was WAWF-RA vs. manual submission.

WAWF-RA Description. WAWF-RA is a secure web-based system for electronic invoicing, receipt and acceptance. It creates a virtual folder to combine the three documents required to pay a contractor (the contract, invoice, and receiving report). The WAWF-RA application enables electronic form submission of invoices, Government inspection, and acceptance documents in order to support the DoD goal of moving to the paperless acquisition process. It is intended to help mitigate interest payments that occur due to lost or misplaced documents, provide on-line access to view document status, improve data accuracy by minimizing re-keying data, and make all documentation required for payment easily accessible. Contractors can submit electronic invoices in WAWF-RA. Contractors and receiving personnel at receiving activities can create electronic receiving reports (contractors can create two types of combination invoice/receiving report formats—“Combo” format is for goods or goods and services and a “2 in 1” format is for services only contracts). Government inspection and acceptance officials electronically sign their acceptance of the goods and services on the receiving report. WAWF-RA invoices and receiving reports are electronically submitted to DFAS Columbus payment systems for payment-CAPS(W) for Vendor Pay and MOCAS for Contract Pay-through the Navy Air Force Interface and DoD Electronic Data Access.

Exhibit B:

Scope and Methodology

The audit was conducted between 13 December 2004 and 17 March 2006. Activities visited or contacted are listed in Exhibit C. There were no relevant prior audit reports on which we needed to follow up. The period of transactions covered varied by audit area addressed and are included in the following discussion of these areas. This was a requested audit. Exhibit A describes the audit request and particular areas of customer concern, which we addressed in the audit as described in the following scope and methodology.

Marine Corps Level Analyses – Vendor Pay and Contract Pay. We reviewed applicable laws, the Federal Acquisition Regulation, the Defense Federal Acquisition Regulation Supplement, Department of Defense (DoD) guidance and Marine Corps guidance concerning the Prompt Payment Act (PPA). Specific guidance reviewed is shown in Exhibit A. Our purpose was to determine what policies and procedures Marine Corps activities were required to follow to ensure compliance with PPA requirements, to include successfully implementing the Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) – the key Marine Corps solution to implementing the PPA and reducing interest payments to contractors.

We evaluated recent Marine Corps and Defense Finance and Accounting Service (DFAS) initiatives concerning PPA implementation to include determining the scope, methodology, and nature of the efforts; current status; completed actions; planned actions and milestones; and problem areas disclosed by these efforts on which we needed to perform further work or followup. Key initiatives reviewed included those specifically noted as customer concerns in Exhibit A which were (1) WAWF-RA usage concerning invoices by contractors and receiving reports by Marine Corps activities, and (2) minimizing Computerized Accounts Payable System for Windows (CAPS(W)) rejects of invoices and receiving reports submitted via WAWF-RA. Our review of these initiatives involved assessing internal controls because these initiatives were basically for the purpose of improving internal controls over these areas.

For Vendor Pay, we analyzed Fiscal Year (FY) 2004 and October 2004 to August 2005 Marine Corps' and selected activities' actual Dollars Disbursed Under PPA and Interest Paid (for late payments made), and reviewed their actual performance against the key goal for measuring PPA compliance, which is Interest Per Million (IPM) (of Dollars Disbursed Under PPA). The purposes were to determine historical trends and evaluate current performance. The purpose for the FY 2004

activity level analysis was also to select activities for review. Exhibit J shows our analyses.

For Contract Pay, we analyzed FY 2004 and October to December 2004 Marine Corps' Dollars Disbursed under PPA, Interest Paid, and IPM. The purposes were to evaluate trends and current performance, and also to determine if these values warranted performing detailed reviews at the Marine Corps activity level, as were planned for Vendor Pay. Based on the results shown in Exhibit D, as compared to Vendor Pay amounts shown in Exhibit J, we concluded that we should not proceed further and perform Marine Corps activity-level reviews for Contract Pay.

This conclusion was based on the facts that (1) that FY 2004 Dollars Disbursed Under PPA for Contract Pay were \$882.3 million, or only 46 percent of the corresponding \$1.9 billion Vendor Pay Dollars Disbursed Under PPA; (2) the FY 2004 Interest Paid amount of \$87,200 for Contract Pay was only 7.1 percent of the corresponding \$1,229,803 Vendor Pay amount, and these small Contract Pay interest amounts continued into the October to December 2004 timeframe; and (3) the FY 2004 IPM Actual amount for Contract Pay was only \$99 as compared to \$640 for Vendor Pay. We noted that IPM for Contract Pay for both FY 2004 and October to December 2004 were substantially above goals and that this amount for Contract Pay increased from \$99 for FY 2004 to \$252 for October to December 2004. However, we also noted that most of the increase during this time was DFAS' fault (we are reviewing Marine Corps functions) and that during the period, from month to month IPM actually decreased for the Marine Corps as a whole, Non-DFAS Fault (primarily Marine Corps fault) and DFAS Fault, which was a positive trend. Based on all of these factors, we decided not to review Contract Pay further as it was not material relative to Vendor Pay and appeared to be an improving area.

Marine Corps Activity Level Reviews-Vendor Pay-Site

Selection/Universes/Sample Selection/Review Methodology. We used FY 2004 data concerning Interest Paid and Dollars Disbursed Under PPA (Exhibit J) to select Marine Corps activities for review. We identified the top seven Marine Corps activities in terms of FY 2004 Interest Paid. We noted that these seven activities also had significant Dollars Disbursed Under PPA, a secondary selection criteria (some Marine Corps activities with higher amounts disbursed than some of these seven activities had substantially lower interest paid amounts and were therefore not considered for review). All seven activities were considered candidates for potential review. We selected Marine Corps Systems Command (MARCORSYSCOM), Quantico, VA, and Marine Corps Combat Development Command (MCCDC), Quantico, VA, for our initial review. MARCORSYSCOM had the highest Interest Paid and Dollars Disbursed Under PPA amounts and MCCDC was collocated with MARCORSYSCOM, making it

efficient to review the two activities together. At a 18 May 2005 meeting, the Director, Contracts Division, Installations and Logistics (I&L) Department, HQMC requested that we review Marine Corps Logistics Command (MARCORLOGCOM), Albany, GA. The remaining four activities were not reviewed due to audit time constraints.

Our Vendor Pay universes used for Marine Corps activity-level reviews included payments associated with contracts which Marine Corps activities awarded. The universes did not include utilities, payments made using Government credit cards, contracts awarded by other services, other miscellaneous payments (which did not have associated contracts), or contracts awarded overseas. We obtained two CAPS(W) databases for Vendor Pay from the Director of Commercial Pay Services, DFAS Columbus, OH. One CAPS(W) database included on-time and late payments made from November 2004 to January 2005, and the other CAPS(W) database included late payments made from January to March 2005 (on-time payment data was not available at the time of review for this time period). The November 2004 to January 2005 CAPS(W) database showed that 1,604 of 9,198 total payments made for Marine Corps contracts during this period were made late. This comprised \$73,956,220.47 (27.1 percent) of the \$272,763,773.88 total payments. Associated interest was valued at \$154,183.60. The January to March 2005 CAPS(W) database showed 2,936 late payments for Marine Corps contracts, valued at \$117,320,338.06, with associated interest of \$223,087.06.

The following describes the universes and samples reviewed by activity. We traced sample payments back to source documents (invoices and receiving reports) to determine whether WAWF-RA was used to electronically submit receiving reports and invoices to CAPS(W) and evaluated causes and associated internal controls, for cases in which WAWF-RA was not used. We determined the extent of CAPS(W) database accuracy concerning the code used to show whether invoices and receiving reports were submitted manually or via WAWF-RA. We reviewed late payments due to unrecorded obligations at MARCORSYSCOM but then discontinued our review as noted below.

MARCORSYSCOM. The CAPS(W) database showed that 313 of 1,192 total November 2004 to January 2005 payments were made late for MARCORSYSCOM contracts, comprising \$30,321,259.78 (30.1 percent) of \$100,609,187.19 total payments with associated interest of \$53,909.66.

We reviewed all 38 late payments (valued at \$6,175,727.93, with associated interest valued at \$8,674.93) for which invoices and receiving reports were shown on CAPS(W) as being sent to CAPS(W) via manual input instead of electronically via WAWF-RA (reasons for these late payments as shown on CAPS(W) varied but were primarily lack of receiving reports).

We reviewed all 15 late payments shown on CAPS(W) as late due to unrecorded obligations valued at \$911,747.13 with associated interest of \$2,352.19, to determine the reasons for unrecorded obligations and evaluate related internal controls. Since we did not find a problem in this area at MARCORSYSCOM, and because of the lack of scope at MCCDC as noted below, we did not review this area at MARCORLOGCOM.

MCCDC. The CAPS(W) database showed that 41 late payments for MCCDC valued at \$820,595.25 were made during November 2004 to January 2005 (contracts were awarded by the Regional Contracting Office (RCO), Quantico, VA, for MCCDC-related goods and services). Associated interest was valued at \$2,215.03. We could not determine the total number and value of MCCDC related payments because on-time payments for RCO Quantico, VA awarded contracts could not be broken out by customer. We reviewed 40 of the 41 late payments, valued at \$816,346.83, with associated interest valued at \$2,206.90 (reasons for these late payments on CAPS(W) varied but were primarily lack of receiving reports). We did not review one of the late payments because it involved a problem with Blanket Purchase Agreements already known to the Marine Corps and for which they were taking action.

We did not review payments at MCCDC shown on the November 2004 to January 2005 CAPS(W) database as late due to unrecorded obligations because the universe was not material. Only 4 of the 41 late payments valued at \$155,393.03, with associated interest of \$382.95, were due to this problem.

MARCORLOGCOM, Albany, GA. One CAPS(W) database showed 48 late payments for MARCORLOGCOM Albany, GA made during January to March 2005 valued at \$2,349,690.99 with associated interest valued at \$9,035.16. Note that the 48 late payments included 17 late payments, valued at only \$622,399.97, with interest valued at \$2,612.59. The MARCORSYSCOM section explains why we did not review obligation problems at MARCORLOGCOM. The other CAPS(W) database showed 1,307 on-time payments made from November 2004 to January 2005 for MARCORLOGCOM, valued at \$40,293,661.35. We used the January to March 2005 late payment database to ensure that we had the latest data for review (MARCORLOGCOM Albany, GA, was the last activity reviewed, as MARCORSYSCOM and MCCDC were reviewed together first). However, for on-time payments, November 2004 to January 2005 was the latest data available at the time of our MARCORLOGCOM, Albany, GA review. We reviewed on-time payments in addition to late payments, contrary to our reviews at the other two activities, to ensure that we had a large enough universe/sample to properly evaluate WAWF-RA usage.

We reviewed the 23 of 48 late payments valued at \$1,019,648.84, with associated interest valued at \$2,611.26, for which CAPS(W) showed the late payments as due to missing receiving reports. This included 19 payments valued at \$616,099.56 for which CAPS(W) coded invoices and receiving documents as manual input and 4 valued at \$403,549.28 for which it coded invoices and receiving documents as WAWF-RA input (reviewed to determine if the WAWF-RA input code was accurate).

We reviewed 45 judgmentally selected on-time payments made during November 2004 to January 2005 valued at \$9,507,062.57 for which CAPS(W) showed invoices and receiving reports as manual input. We focused on contractors with larger numbers of payments in the universe.

CAPS(W) Rejects of Contractor Invoices and Receiving Reports. We reviewed relevant Marine Corps and DFAS initiatives as noted above. We also performed statistical analyses concerning CAPS(W) rejects of contractor invoices and receiving reports to (1) determine the current extent and historical trends for the problem, and (2) break down the problems into specific components, such as breaking down contractor invoice rejects by contractor and receiving report rejects by receiving activity.

Data Reliability – Vendor Pay and Contract Pay. For Vendor Pay, we traced Dollars Disbursed Under PPA amounts and Interest Paid amounts reported for November 2004 to January 2005 back to supporting CAPS(W) databases which provided payment details and found no material discrepancies. We also checked IPM computations for this time period and found that they were proper. For sample payments reviewed, we checked invoice amounts and interest amounts shown on the CAPS(W) databases back to supporting documentation and found no material discrepancies. We could not evaluate the completeness of the CAPS(W) databases or the reported statistics.

For Contract Pay, we performed the same analyses comparing statistics to payment details in the supporting CAPS(W) databases for June to November 2004 and found no material discrepancies. However, we did not trace the CAPS(W) databases back to source documentation because as noted we discontinued our Contract Pay review.

We did not evaluate the reliability of data included in May 2005 to August 2005 CAPS(W) WAWF-RA usage reports (Finding 1) or CAPS(W) reports showing rejects of contractor invoices and receiving reports submitted through WAWF-RA for payment (Finding 2). Finding 1 footnote 3 discusses CAPS(W) inaccuracies in coding manual vs. WAWF-RA submissions to CAPS(W) and

DFAS corrective actions, which we noted during the earlier part of our audit. We did not validate the subsequent DFAS corrections after they were made due to time constraints. We did not evaluate CAPS(W) data concerning rejects because (1) required supporting data was at DFAS and CAPS(W) database accuracy was a DFAS function, whereas we focused on Marine Corps functions, and (2) this was a widely acknowledged problem, already known within the Marine Corps and DFAS prior to our audit. As noted, CAPS(W) rejects of WAWF-RA transactions was one of the Marine Corps concerns which generated the audit.

We used personal computers on this audit. We used Microsoft Word to do word processing. We used Microsoft Access and Microsoft Excel to process databases, identify universes and select samples, provide statistical analyses, and show sample results.

We conducted the audit in accordance with Generally Accepted Government Auditing Standards.

Exhibit H:

Marine Corps Efforts to Monitor WAWF-RA Usage

The Marine Corps, with assistance from the Defense Finance and Accounting Service (DFAS), made efforts and had achieved progress in monitoring Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) usage. The Marine Corps and DFAS jointly established a “Kaizen” project during August 2005 to monitor WAWF-RA usage by contractors for submitting invoices and by receiving activities for submitting receiving reports electronically to CAPS(W) for payment. As part of this project, DFAS provided Headquarters Marine Corps (HQMC) with Computerized Accounts Payable System for Windows (CAPS(W)) extracts which showed details of contractor invoices processed in CAPS(W) for payment each month and which provided the source of the invoices and related receiving reports (WAWF-RA vs. manual input).

On 24 August 2005, HQMC personnel informed us that they were currently using the monthly reports to monitor WAWF-RA usage for contractor invoices. Specifically, they had sent out a data call to Regional Contracting Office (RCO) Quantico, VA, RCO Camp Pendleton, CA, and RCO Albany, GA (part of the Marine Corps Logistics Command) providing the June 2005 monthly invoice report for the activity and requesting reasons why contractor invoices were still being input to CAPS(W) manually and a plan to make the contractors WAWF-RA compliant. HQMC planned to use the data call responses as a baseline to see if remedies were being put into effect. At the time of our review on 24 August 2005, they were in the process of comparing June 2005 to July 2005 WAWF-RA usage data for contractor invoices to see if progress was being made.

By going to the individual RCOs for answers, HQMC expected to 1) make it mandatory that they communicate with their vendors, acceptors, and all parties involved in the WAWF-RA process; 2) verify that the WAWF-RA clause is included in all contracts; and 3) assist and provide solutions in instances where WAWF-RA presents problems or is difficult to implement. Future planned actions were to meet face-to-face with the individual RCOs to better understand how each office is currently performing and monitoring WAWF-RA procedures and to assist in developing a detailed plan so that WAWF-RA is a more organized process with clearly defined roles and responsibilities.

On 24 August 2005, HQMC personnel also informed us that the Director Contracts Division, HQMC had earlier in the year (date unknown) told DFAS during a monthly phone call that DFAS is to reject all contractor invoices unless

submitted electronically in accordance with the contract WAWF-RA clause. The issue was again discussed with DFAS during the WAWF-RA Kaizen project.

However, the Marine Corps had not made efforts at the time of our review on 24 August 2005 to analyze these reports or initiate corrective actions, as had been done for contractor invoices.

Exhibit I:

Examples of Trend Analyses Which Could Be Performed -WAWF-RA Usage

Contractor Invoices – Top Five Contractors and Regional Contracting Offices (RCOs).

We analyzed the May 2005 to August 2005 Computerized Accounts payable System for Windows (CAPS(W)) extracts and found that the top five contractors in terms of manual invoice submissions to CAPS(W) accounted for 47.5 percent (1,846 of 3,889) of total manual submissions.

Further, in terms of invoice transaction volume, the top five RCOs (Marine Corps Systems Command (MARCORSYSCOM); RCO Quantico, VA; Marine Corps Logistics Command (MARCORLOGCOM); RCO Camp Lejeune, NC; and RCO Camp Pendleton, CA,) had manual submission rates of 1.8 percent to 50.2 percent over the same period. These activities had a general downward trend and varied widely from each other. Of the activities with high manual submission rates, MARCORLOGCOM had the highest manual submission rates, followed by RCO Camp Pendleton, MARCORSYSCOM, and RCO Camp Lejeune. RCO Quantico had consistently low manual submission rates. Details are in Exhibit F.

These results demonstrate that the analyses could be used to target specific contractors and contracting offices for improvement.

Contractor Invoices – Invoice Dates. We also compared the invoice date to the date the invoice was entered into CAPS(W) for Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) vs. manual submissions, to determine if WAWF-RA made any improvements in these timeframes which was a key WAWF-RA goal. We found the average number of days for WAWF-RA/manual submission were: 35/47 May 2005, 39/51 June 2005, 41/49 July 2005, and 32/75 August 2005. We concluded that WAWF-RA was effective in improving these timeframes, and there were no recognizable trends over this period.

Top Five Receiving Activities. An analysis of the top five receiving activities submitting receiving reports manually to CAPS(W) would be useful in allowing the Marine Corps to target specific receiving activities for improvement in WAWF-RA usage and benchmark activities against each other. However, we could not perform this analysis since as noted in Finding 1, the CAPS(W) May to August 2005 extracts often did not record the receiving activity.

Receiving Report Dates. We also compared the date the merchandise was accepted to the date receiving reports were entered into CAPS(W) for WAWF-RA vs. manual submissions to determine if WAWF-RA made any improvements in these receiving report submission timeframes, which was a key WAWF-RA goal in eliminating late payments and associated interest. We found the average number of days WAWF-RA/Manual were: 12/47 for May 2005, 13/36 for June 2005, 11/29 for July 2005, and 8/27 for August 2005. We concluded that WAWF-RA had been generally effective in improving these timeframes over manual submissions and there was a general slight downward trend for WAWF-RA submissions. We could not perform this analysis for individual receiving activities, which would be useful in targeting receiving activities for improvement. As noted in Finding 1, the CAPS(W) May 2005 to August 2005 extract often did not record the receiving activity.

Exhibit J:

FY 2004 and FY 2005 Prompt Payment Act Implementation - Marine Corps and Selected Activities - Vendor Pay

Activity To Which Fault Assigned	FY 2004				FY 2005 (Oct 2004 to Aug 2005)			
	Dollars Disbursed Under PPA	Interest Paid	Interest Per Million Actual	Interest Per Million Goal	Dollars Disbursed Under PPA	Interest Paid	Interest Per Million Actual	Interest Per Million Goal
Total Marine Corps (MC)	\$1,920,089,059	\$1,229,803	\$640	\$726	\$1,933,714,849	\$689,078	\$356	\$250
Non-DFAS Fault (Primarily MC Fault)		\$520,220	\$271	\$384		\$436,977	\$226	\$108
DFAS Fault		\$709,583	\$369	\$342		\$252,101	\$130	\$142

Exhibit K:**May 2005 to August 2005 CAPS(W) Rejects of WAWF-RA Submitted Contractor Invoices and Receiving Reports**

	Contractor Invoices	Receiving Reports
May 2005		
WAWF-RA Input Rejected By CAPS(W)	890	366

% Rejects to Total	32.4%	21.8%
August 2005		
WAWF-RA Input Rejected By CAPS(W)	1,718	770
Total Submitted to CAPS(W) Through WAWF-RA	4,590	3,629
% Rejects to Total	37.4%	21.2%

Exhibit L:

Marine Corps/DFAS Kaizen Project to Monitor CAPS(W) Contractor Invoice Rejects

The Marine Corps and the Defense Finance Accounting Service (DFAS) jointly undertook an April 2005 “Kaizen” project to monitor Computerized Accounts Payable System for Windows (CAPS(W)) rejects of contractor invoices submitted electronically to CAPS(W) through Wide Area Work Flow-Receipt and Acceptance (WAWF-RA). They focused on five contractors with the highest number of contractor invoice rejects from January 2004 to March 2005 and used CAPS(W) invoice acceptance rates over this period of time as a baseline for determining whether their analyses and resulting corrective actions were effective. They established a one time goal of increasing the CAPS(W) acceptance rate for WAWF-RA submitted invoices by 30 percent as of July 2005. They analyzed the common reasons for invoice rejects for the five contractors. Key errors causing CAPS(W) invoice rejects were Contract Line Item (CLIN) errors, CLIN unit price errors, invalid invoice dates and invoice received (by payment office) dates, and contracts not being found in CAPS(W) for the invoice.

Corrective actions consisted of project personnel (1) phoning and providing guidance to the five contractors showing the common errors identified and telling the contractors how to fix them, (2) providing guidance (flowchart) to Defense Finance and Accounting Service (DFAS) Vendor Pay technicians who process payments to tell them how to correct the common errors for CAPS(W) invoice rejects, (3) instructing DFAS Vendor Pay technicians to use the flowchart provided for processing invoice rejects for all contractors, and (4) providing guidance to Regional Contracting Offices (RCOs) concerning just one particular type of CLIN error involving the use of “lot” as the contract quantity.

Exhibit M:

Examples of Trend Analyses For CAPS(W) Rejects of Contractor Invoices and Receiving Reports

Computerized Accounts Payable System for Windows (CAPS(W)) Rejects of Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) Submitted Contractor Invoices – By Contractor. The Marine Corps/Defense Finance and Accounting Service (DFAS) Kaizen project broke down invoice rejects by contractor and reviewed the five contractors with the highest number of rejects (Finding 2 and Exhibit L). Further, we analyzed invoice reject rates for the group of five contractors in terms of number of invoice rejects (Finding 2 and Exhibit O show results).

Contractor Invoice – Processing Timeframes. We compared the contractor invoice date to the date the invoice was entered into CAPS(W) for CAPS(W) rejects of WAWF-RA submitted contractor invoices vs. successful WAWF-RA invoices submitted to CAPS(W) to determine if rejects had additional processing timeframes. We found the average number of days for rejects/successful invoice transactions were: 52/35 May 2005, 69/39 June 2005, 74/41 July 2005, and 64/32 August 2005. We concluded that processing timeframes for rejected transactions were substantially longer than for successful transactions, meaning that reducing invoice rejects could help significantly in paying contractors faster.

Top Five Receiving Activities – CAPS(W) Rejects of Receiving Reports Submitted Through WAWF-RA. An analysis of the top five receiving activities with receiving report rejects would be useful in allowing the Marine Corps to target specific receiving activities for improvement and benchmark activities against each other. However, we could not perform this analysis since as noted in Finding 1, the CAPS(W) May 2005 to August 2005 extracts often did not record the receiving activity.

Receiving Reports – Processing Timeframes. We compared the receiving report merchandise acceptance date to the date the receiving report was entered into CAPS(W) for CAPS(W) rejects of WAWF-RA submitted receiving reports vs. successful WAWF-RA receiving reports submitted to CAPS(W) to determine if rejects had additional processing timeframes. We found the average number of days for rejects/successful receiving report transactions were: 28/12 May 2005, 31/13 June 2005, 28/11 July 2005, and 25/8 August 2005. We concluded that processing timeframes for rejected transactions were substantially longer than for successful transactions, meaning that reducing receiving report rejects could help significantly in paying contractors faster.

Exhibit N:

Examples of Lack of Documentation Concerning Analyses Of CAPS(W) Contractor Invoice Rejects

Kaizen project personnel had not been required to and had not developed documentation summarizing root cause analyses performed to analyze Wide Area Work Flow-Receipt and Acceptance (WAWF-RA) submitted contractor invoices rejected by Computerized Accounts Payable System for Windows (CAPS(W)) for the top five contractors with invoice rejects. Following are two examples.

Internal Controls. Headquarters Marine Corps personnel informed us that as part of the project, they compared contract data in CAPS(W) to another source to see if the common contractor errors causing CAPS(W) invoice rejects occurred at the CAPS(W) level or contractor level. However, we were never provided any documentation or explanations as to why the problems occurred, such as identifying any internal control breakdowns that occurred or may have needed correction at Defense Finance Accounting Service (DFAS) Vendor Pay, Regional Contracting Office or contractor levels to preclude the invoice reject problem in the future.

WAWF-RA Edit Checks. We asked DFAS Kaizen project personnel on 15 September 2005 whether WAWF-RA edit checks had been considered to determine if the common errors that the Kaizen project causing invoice rejects found could be caught in WAWF-RA before being provided to CAPS(W). We considered this a key internal control because WAWF-RA is the system that inputs invoice data to CAPS(W). Project personnel informed us on 29 September 2005 that there is a capability to prepopulate WAWF-RA by loading Contract Line Item (CLIN) data into WAWF-RA for invoices and receiving report line items (Exhibit L shows that several key errors related to CLINs). Currently, the Marine Corps has not turned on the WAWF prepopulation function as further testing of this function was needed. Once turned on (January or February 2006), project personnel expected the CAPS(W) CLIN rejects to decrease by February or March 2006. However, there had been no mention of this issue in any of the project documentation provided us to show that the issue had been analyzed or how it would address the specific reject causes found.

Exhibit O:**Second Five Contractors With High CAPS(W) Contractor Invoice Rejects (Note A)**

	MAY 2005	JUN 2005	JUL 2005	AUG 2005	TOTAL
WAWF-RA Invoice Successfully Received IN CAPS(W)	220	227	259	222	928
WAWF-RA Invoice Rejected By CAPS(W)	224	414	87	235	960
TOTAL	444	641	346	457	1,888
% Rejects to Total	50.5%	64.6%	25.1%	51.4%	50.8%

Note A: These totals represent the second group of five contractors in terms of high number of invoice rejects from CAPS(W). The Marine Corps/DFAS Kaizen project addressed the top five contractors (Finding 2 and Exhibit L). Note also that this represents the second group of five contractors for May 2005. We used the same group for the June 2005 to August 2005 analyses.

Exhibit P:**Acronyms**

Acronym	Name
CAPS(W)	Computerized Accounts Payable System for Windows
DFAS	Defense Finance and Accounting Service
DFARS	Defense Federal Acquisition Supplement

HEADQUARTERS UNITED STATES MARINE CORPS
3000 MARINE CORPS PENTAGON
WASHINGTON, DC 20350-3000

IN REPLY REFER TO:

05-0016
RFR-50
26 April 06

From: Commandant of the Marine Corps
To: Assistant Auditor General, Internal Control and Command
Support Audits

Subj: Naval Audit Service Draft Audit Report - Marine Corps
Implementation of the Prompt Payment Act (N2005-NMC000-0016)

Ref: (a) NAS memo 7510 N2005-NMC000-0016 of 17 March 06

1. The reference transmitted the subject draft report requesting Marine Corps comments. The following comments regarding the report recommendations are provided:

a. **Recommendation 1.** "Issue guidance, including internal controls to ensure compliance, requiring documented trend analyses concerning monthly WAWF-RA usage for contractor invoices and receiving reports. These analyses should evaluate the level of Marine Corps-wide WAWF-RA usage and at more detailed levels, such as those shown in the audit finding, to target specific problem areas and allow for corrective actions."

- (1) The Marine Corps concurs in the recommendation.
- (2) Headquarters Marine Corps (HQMC) performs trend analysis on an on-going basis to track overage invoices, manual submissions, and those contracting processes/procedures that inhibit the use of WAWF. HQMC will continue to utilize available data to perform root cause analysis using Lean Six Sigma methodology. HQMC will issue standard procedures guidance in concert with recommendation 2. The estimated completion date is 30 September 2006.

b. **Recommendation 2.** "Issue guidance, establish internal controls to ensure compliance, and establish standardized procedures for follow-up at the Headquarters and activity levels when analyses show deficiencies in RCO/receiving activity/contractor performance in WAWF-RA usage."

- (1) The Marine Corps concurs in the recommendation.

- (2) HQMC is developing standard procedures to ensure WAWF-RA usage and corrective action if deficiencies are found. Weekly conferences calls are held with Regional Contracting Offices (RCOs) who have deficiencies in WAWF usage (late payments, manual submissions). HQMC reviews monthly source reports to determine those RCOs who are not properly including the WAWF clause in contracts, those commodities that are submitted by other electronic means and those contractors requiring WAWF guidance and training. The estimated completion date is 30 September 2006.

c. **Recommendation 3.** "Issue guidance and establish internal controls to ensure compliance, requiring RCOs and receiving activities to provide plans to Headquarters Marine Corps for improving internal controls concerning WAWF-RA usage for contractor invoices and receiving reports when analyses show deficiencies at the RCO/receiving activity/contractor level and corrective actions are required."

- (1) The Marine Corps concurs in the recommendation.
- (2) HQMC is developing a standard WAWF clause to be used by all RCOs. HQMC will draft the action plan with input from the RCOs. Once the WAWF clause is complete, a memo will be sent to all RCOs requiring the use of the WAWF clause in all new and existing contracts. The estimated completion date is 30 September 2006.

d. **Recommendation 6.** "Develop ongoing Marine Corps-wide goals for reducing the number of WAWF-RA submitted contractor invoices and receiving reports rejected by CAPS(W), track actual performance against goals, and identify and take needed corrective actions. Use trend analyses techniques to target problem areas."

- (1) The Marine Corps concurs in the recommendation.
- (2) HQMC is analyzing submitted contractor invoices and receiving reports rejected by CAPS(W). HQMC will coordinate with the program manager, Marine Corps Systems Command, to ensure that repetitive technical issues are resolved in a timely manner. In coordination with DFAS, HQMC will participate in a Kaizen project analyzing and developing goals for more effective use of WAWF-RA and CAPS(W). The estimated completion date is 30 March 2007.

c. **Recommendation 7.** "Require Marine Corps personnel, as part of their participation in future Kaizen projects related to WAWF-RA and ongoing monitoring of CAPS(W) rejects (Recommendation 6), to ensure that root-cause analyses concerning CAPS(W) rejects of invoices and receiving reports are clearly documented, evaluate root cause trends and reflect consideration of all manual and systemic options for resolving problems."

- (1) The Marine Corps concurs in the recommendation.
- (2) DFAS is the project manager on future Kaizen projects. The Marine Corps will include documentation of root cause analyses and trends in future Kaizen projects in coordination with DFAS.

f. **Recommendation 8.** "Provide guidance to all contractors other than the top five contractors with CAPS(W) invoice rejects concerning the common types of errors the Kaizen project found for the top five contractors."

- (1) The Marine Corps concurs in the recommendation.
- (2) Guidance and training will be provided to all contractors once common errors are identified. HQMC will work directly with the field offices and vendors to ensure that the corrective actions identified to reduce rejects are implemented and that required training is available to both vendors and the regional contracting offices. The estimated completion date is 30 March 2007.

2. This report does not contain information that is deemed "For Official Use Only."

of Information Act.
Exemption (b) (6) applies.

Management Comments to Draft Audit Report “Marine Corps Implementation of the Prompt Payment Act,” Project Number N2005-NMC000-0016.000, dated March 17, 2006

Recommendation 4: We recommend that the Defense Finance and Accounting Service establish internal controls to ensure that DFAS rejects all contractor invoices manually submitted to CAPS (W) for payment that should be submitted electronically.

Management Comments: DFAS Columbus has established internal controls by having the technicians ensure manually received invoices are rejected in a timely manner if the electronic billing clause is included in the contract. Review by supervisors and leads further ensures timely reject where appropriate. A return letter which specifies this lack of compliance is included with a copy of the original invoice and is returned in 7 days, as specified by the Prompt Pay Act (PPA). Periodic evaluation of this control will be incorporated into the Management Control Program matrix. In addition, further analysis will be performed to determine alternative approaches to automating this manual control and the cost associated with each alternative.

Estimated Completion Date: July 3, 2006

Recommendation 5: We recommend that the Defense Finance and Accounting Service modify CAPS (W) database extracts used for monitoring WAWF-RA usage to include all receiving activities.

Management Comments: Further analysis must be performed to determine the root cause for the lack of receiving activity data through the Standard Procurement System (SPS) interface provided by the U.S. Marine Corps (USMC) contracting offices. DFAS will partner with the USMC in this analysis to develop solutions to modify systems or interfaces to ensure data availability for the CAPS (W) database extracts.

Estimated Completion Date: July 3, 2006

FOR OFFICIAL USE ONLY

Introduction to Tab G

Purpose: Documents a remediation plan to correct gaps or deficiencies observed and documented during the analysis performed in the Verification of Processes and Procedures section of this package. (Tab C.7) This tab provides the corrective actions, milestones, and timelines. The remediation plan is a working document that is intended to be updated with status on corrective actions and milestones.

Index:

Reference	Document	Description
G.1	Remediation Action Plan	Outlines the actions agreed upon for remediation of known deficiencies.

FY 08 Remediation Action Plan

Ref	Observation	Testing Results	Recommendation	Corrective Action	Status	Date Closed
1	Supporting Documentation not readily available to support entries on Report 8	Complete supporting documentation needed to support the amounts in Report 8 were not provided in a timely manner	Processes and procedures should be developed to maintain all original files associated with FBWT reconciliation process to include the support for the Report 8 process.	Procedures were implemented to no longer use management reports to populate Report 8. New procedures were designed to populate the Report 8 from SABRS amounts. New procedures were documented in the Standard Operating Procedures Manual. Additional reconciliation procedures were designed and implemented to tie to DDRS-B undistributed adjustment to Report 8.	Closed	3/31/2008
2	Automated adjustments made to the general ledger for undistributed calculations are not supported	a. In reconciling the DDRS-B undistributed adjustments to Report 8, appropriation 1105 for fiscal year 2005 did not reconcile. Documentation was not provided to support \$3,534.83. b. In reconciling SABRS disbursements and collections amounts to Report 8, differences were noted in 3 appropriations: 1108 (\$20), 1109 (\$23million), 1319M (\$38million) and 1508 (\$29million).	Marine Corps should document the complete methodology for compiling the Report 8 as well as document the methodology for the calculation of the DDRS-B undistributed adjustment.	Documented methodology for DDRS-B undistributed adjustment. Documented methodology and inputs for Report 8 and include documentation in Fund Balance with Treasury SOP. Monthly, review will be performed of the DDRS-B calculations for correctness and reconciliation to Report 8 will be performed. This corrective action is pending verification that will take place in the FY08 Q3 reporting period.	Pending	
3	Issues noted in the re-complied FY08 Q1 Fund Balance with Treasury	Cross walking issue: DDRS-B contains an automatic adjustment process that creates a system generated adjustment for the difference between the Treasury accounts and the SABRS account	The Marine Corps, in conjunction with DFAS, should document all adjustments being made to the financial ledger. The Marine Corps should take steps to ensure that financial reporting personnel do not have the capability to alter system data outside of the normal journal voucher process.	RFA in coordination with DFAS is designing and implementing a more comprehensive reconciliation process to include maintenance of all source files that support the Report 8. Document methodology for DDRS-B undistributed adjustment. Include documentation in Fund Balance with Treasury SOP.	Pending	
4	SABRS to DDRS-B FBWT Crosswalk Compliance	The SABRS to DDRS-B crosswalks show SABRS accounts 2311 Unearned Revenue – Advanced from Government Agencies and 2312 Unearned Revenue – Advances from the Public crosswalking into DDRS-B account 1010.	The Marine Corps should identify the exact cause of the crosswalking inconsistency and make the necessary changes to comply with Treasury posting and reporting guidance.	RFA through discussion with DFAS has determined that the cause of the crosswalk compliance variances is due to DDRS-B logic. Obtain supporting documentation for this logic and make available to the auditors.	Closed	3/31/2008
5	DDRS-B Journal Vouchers	Of 9 Journal Vouchers tested, 1 error was noted. A JV posting a late register was posted incorrectly.	To help ensure that adjustments to the DDRS-B are accurate and that documentation or a detailed audit trail exists, we recommend that DFAS-KC improve its review and approval procedures. Additionally, Marine Corps should implement processes to verifying the accuracy of the adjustments made to the DDRS-B, maintain the necessary and appropriate supporting documentation, and clearly define and implement the processes to ensure consistency.	RFA has designed and implemented a Data Call Standard Operating Procedure Manual with procedures that require supporting documentation to be maintained for all journal vouchers and adjustments. Data call checklists have also been implemented and appropriate personnel are required to check and certify that they have followed the appropriate procedures and that supporting documentation is maintained.	Closed	3/31/2008
6	SABRS History file did not reconcile to the SABRS Trial Balance extract	Variances noted in the reconciliation could possibly attributed to timing, automated adjustments, unclear extraction methodology and SABRS trial balance format	It is recommended that:(1) The Marine Corps should extract the SABRS history file and journal voucher file on the same date as the SABRS trial balance extract.(2) The Marine Corps should consider removing all automated adjustments made to the SABRS trial balance file during the extract process in favor of a DDRS-B journal voucher adjustment process that allows for a complete audit trail. (3) The Marine Corps should include all DICs that affect the general ledger in the SABRS history file extraction. (4) The Marine Corps should develop, test, and document a methodology for assigning rec types to SABRS transaction history file records or define an alternate level (SABRS general ledger account level) to facilitate reconciliations. The process for extraction and reconciliation of the transaction level detail must be verifiable through third party review and re-performance. We suggest that the Marine Corps maintain the documentation to support the query design and process in a format that allows for efficient re-performance that can be repeated at a point in time	(1) RFA has implemented a process that extracts the Trial Balance and history files at the same time each month. The files are retained for a 3 year period. (2) The SABRS extract file did not include all DIC's. The missing DIC's have been identified and included in the extract methodology. (3) Journal Vouchers were storing in SABRS with the incorrect effective date. The system has since been modified to store the correct effective date. The extract program has been modified to identify the effective date (4) The relationship between DIC's and Rec Type has been documented to clearly explain how the DIC on transactions determine the Rec Type.	Closed	3/31/2008
				Differences that still remain after the corrected process are a result of journal vouchers that could not be identified. Variances as a result of these journal vouchers are being manually researched and corrected by RFA. The new extraction process is pending verification at the FY08 Q3 reporting period.	Pending	
7	Adjustments being made to SABRS General Ledger	DFAS is not reviewing, documenting, and approving adjustments made to the SABRS general ledger (GL) when the SABRS GL is adjusted to agree with the SABRS History File. When reconciling the SABRS General Ledger, if the SABRS GL does not agree with the SABRS History File, DFAS-KC/GL staff manually adjusts the SABRS GL.	Maintain the necessary supporting documentation for each adjustment in accordance with the Office of Management and Budget Circular No. A-130; the DoD Financial Management Regulation (FMR), Volume 6A, Chapter 2. Update the procedures for performing the SABRS GL adjustments to include processes for reviewing and approving the adjustments and maintaining a log of adjustments made to SABRS. Develop and implement internal controls to verify adherence to the documented policies and procedures. Provide staff with training to help them adequately utilize the procedures.	RFA has implemented policies and procedures which require that supporting documentation be maintained for all adjustments made to the general ledger. Going forward all adjustments must be fully documented.	Closed	3/31/2008

Ref	Observation	Testing Results	Recommendation	Corrective Action	Status	Date Closed
8	External data call vouchers	DFAS-KC did not verify that the JV amounts for 26 out of the 53 data calls were calculated accurately and properly supported by source documentation.	To ensure that JVs are accurate and that documentation or a detailed audit trail exists, we recommend that DFAS-KC/AFS improve its data call process and financial statement cycle. Our specific recommendations, found in Appendix A, focus on improving processes for collecting data call information, verifying the accuracy of the information received, maintaining the necessary and appropriate supporting documentation, and clearly defining and implementing the processes to ensure consistency. It is essential that the Marine Corps provide guidance for improvement and support DFAS-KC throughout this improvement process.	RFA has designed and implemented a Data Call Standard Operating Procedure Manual with procedures that require supporting documentation to be maintained for all journal vouchers and adjustments. Data call checklists have also been implemented and appropriate personnel are required to check and certify that they have followed the appropriate procedures and that supporting documentation is maintained. Full implementation of this corrective action is pending verification during the Q3 reporting period.	Pending	
9	DDRS SBR and BS Crosswalk Compliance	The DDRS SBR crosswalks shows account 4620 on line 9A Unobligated Balance Apportioned – Currently Available, while the TFM shows this account on line 9B Unobligated Balance Exempted from Apportionment.	The Marine Corps should work with DDRS to ensure that all financial statement lines are crosswalked in accordance with current Treasury guidelines.	Documentation needs to be obtained supporting the usage of crosswalking not in compliance with TFM.	Open	
		The DDRS Balance Sheet crosswalk shows Entity Funds separately from Non Entity Funds on the face of the financial statements. The TFM now requires this disclosure in the notes to the financial statements.		Documentation needs to be obtained supporting the usage of crosswalking not in compliance with TFM.	Open	
		The DDRS Balance Sheet crosswalk also fails to display federal loans receivable, account 1350, in a separate line. This account is crosswalked to Federal Other Assets in DDRS.		Federal loans do not apply to Marine Corps. This is not applicable, No further action is required.	Closed	3/31/2008
		The DDRS Balance Sheet crosswalk fails to display Entitlement Benefits Due and Payable, account 2160, in a separate line. This account is crosswalked to line 3F, Other Liabilities – Non Federal in the DDRS crosswalk.		Documentation needs to be obtained supporting the usage of crosswalking not in compliance with TFM.	Open	
10	Budgetary to Proprietary Relationships	A variance was noted in the Unfiled Customer Order with Advance = Advances from Others relationship testing in the amount of \$34,783,894. This reconciliation variance appears to result from the DDRS-AFS reconciliation omitting of account 2310. The only allowable variance here is for Treasury Transaction B142, disbursement of foreign currency on behalf of the operating fund. Explanation is needed as to why this account is not being included in this reconciliation.	To ensure that the Marine Corps is maintaining the proper accounting relationships, the MOAs allowing the Marine Corps to treat certain public receivables as a budgetary resource should be reviewed and made available as source documentation to support the current treatment of public receivables. The Marine Corps should also review the datacall transactions involving account 2310 to ensure that possible budgetary effects are not going unrecorded.	RFA is coordinating with DFAS and DDRS to determine the reason for omitting this account in the reconciliation. This corrective action is pending receipt of supporting documentation for the omission of this account.	Pending	
		A variance was found in the Federal Receivables Proprietary = Receivables Budgetary relationship testing in the amount of -\$25,303,215. The variance is related to the amount of Public Receivables recorded in SABRS and included on the SF 133 and GLA 4251 (Foreign Military Sales & and other public entities on military bases with MOAs).		RFA has obtained a copy of the MOA. RFA will ensure that this documentation is readily available and to obtain supporting documentation. No further action is needed.	Closed	3/31/2008
11	DDRS-B Journal Vouchers documentation	During DDRS-B JV detail testing, we noted that sufficient supporting documentation was not provided by DFAS-KC for three out of 13 JVs selected for testing.	To help ensure that adjustments to the DDRS-B are accurate and that documentation or a detailed audit trail exists, we recommend that DFAS-KC improve its review and approval procedures. Additionally, Marine Corps should implement processes to verifying the accuracy of the adjustments made to the DDRS-B, maintain the necessary and appropriate supporting documentation, and clearly define and implement the processes to ensure consistency.	RFA has designed and implemented a Data Call Standard Operating Procedure Manual with procedures that require supporting documentation to be maintained for all journal vouchers and adjustments. Data call checklists have also been implemented and appropriate personnel are required to check and certify that they have followed the appropriate procedures and that supporting documentation is maintained.	Closed	3/31/2008

During the discovery and correction phase of the USMC financial improvement initiative, in addition to the validation of processes and procedures effort, USMC noted various deficiencies. The following corrective actions were implemented to address the noted deficiencies.

Ref	Additional Corrective Actions
12	Supported the successful system compliance audit of primary Marine Corps financial system to accurately record and report financial data and information.
13	Completed initial mapping of financial statement compilation procedures in coordination with DFAS.
14	Implemented systems interface between the Defense Property and Accountability System (DPAS) and Standard Accounting Budgeting and Reporting System (SABRS) for the reporting of personal property.
15	Modified data entry requirements for SABRS to require the input of trading partner information to address eliminations. Published MARADMIN to institutionalize trading partner information requirements.
16	Implemented a rigorous web based tri-annual review process to validate transactions as identified in the DoD FMR.
17	Completed transaction analysis of SABRS.
18	Implemented MOCAS accounts payables estimation procedures.
19	Developed a methodology for Internal Controls over Financial Reporting for full implementation throughout the Marine Corps.
20	Completed and implemented interface from SABRS to DDRS-AFS and an interface from SABRS to DDRS-B for SFIS compliant trial balances.
21	Designed and implemented the Financial Statement Compilation, Funds Balance With Treasury, and External Data Call Process Validation Checklists to help ensure that documentation is maintained to support the entire Financial Statement Compilation process and that proper review and approvals are conducted. The checklists are completed and certified by the responsible process owners during each period. The checklist identifies the tasks that are required to be performed by each responsible department, the documentation to be maintained, and the required approvals. Copies of the certified checklists are maintained by RFA.
22	Implemented monthly and quarterly trial balance reconciliations to ensure that the trial balances used for financial reporting are accurate and complete. A reconciliation is performed monthly to confirm that the SABRS trial balance agrees to the detail transactions contained in the SABRS History File. A reconciliation is performed quarterly to confirm that the DDRS-B trial balance uploaded from SABRS agrees to the original SABRS trial balance. A second reconciliation is performed quarterly to confirm that the DDRS-AFS trial balance uploaded from DDRS-B agrees to the original DDRS-B trial balance.
23	Implemented a process to maintain all original files associated with the preparation of the financial statements. This documentation includes all unadjusted trial balances as well as all adjustment logs for the given reporting period. Further, the Marine Corps has taken steps to ensure that financial reporting personnel do not have the capability to alter system data outside of the normal journal voucher process.
24	Validated that the only U.S. Standard General Ledger (USSGL) accounts that should be populating the FBWT line item are 1010 and 1090 in accordance with the Treasury Financial Manual financial statement crosswalking guidance.
25	Documented the processes for performing the Report 8 reconciliation.
26	Formalized the journal voucher process for journal vouchers posted to DDRS to include USMC review for certain journal vouchers.
27	Formalized the note preparation and variance analysis process for financial reporting to include USMC review.
28	Designed and documented new procedures to include activity logs, review and approval of adjustments made to the SABRS general ledger and maintenance of supporting documentation.
29	Developed a consolidated SOP for external data calls including individual checklists for each data call to facilitate the proper internal controls and maintenance of adequate supporting documentation.

No problem, we can do that. We only input based on AFS request for all Suspended Revenues to be included.

Please reverse out the Suspended Revenue JVs that were done.

Thanks,

Supervisory Accountant
Departmental Reporting and Analysis Division

Importance: High

My understanding from this email that Marc sent is that the information on these attached spreadsheets are incorrect and should not be entered. Since these were input at the budgetary level I believe you would need to back these out.

Thanks,

Per our phone conversation this morning, below are a few comments/questions we have with the attachments. If I'm reading the spreadsheets correctly, I'll be referencing lines pertaining to the Marine Corps, lines 88-101 on the first attachment and lines 102-119 of the second attachment.

First Attachment

1. The spreadsheet is somewhat confusing because Lines 88, 91, & 93 site MIPR # M0008508MPDFAS2 in Column J under AT17AC2_1106 but our accounting system shows this MIPR # under the 1107 appropriation.

2. Lines 95, 99, & 101 MIPR # M0008508MPDFAS1 in Column J under AT17AC2_1107 but our accounting system shows this MIPR # under the 1106 appropriation.

2. I don't understand why payments for MIPR # M0008508MPDFAS2 are being put into suspense because our accounting systems currently shows over \$400K available?

3. Lines 90 & 97, what is meant by "Waiting on a determination of whether it should be output 18"?

Second Attachment

1. I need further explanation as I don't understand the "Unfunded" lines on this spreadsheet? (Lines 105-110 & 112-119)

2. How can you have a credit amount suspended? Why are lines 102 & 103 suspended? Funds appear to be available.

3. How are these two spreadsheets related?

Any assistance you can provide will be greatly appreciated. Thanks!

Subject: 1st Quarter Suspended Revenue-DFAS

Good Morning,

Attached is the 1st Quarter FY 2008 Suspended Revenue file for DFAS.
The second file provides support for the unfunded amounts identified on the detail sheets. The files will also be uploaded to the 1st Quarter-21 Day Project under the suspended revenue folder.

If you have any questions regarding the information please contact Jan Kearney (jan.kearney@dfas.mil/317-510-2555) or Linda Reynolds (Linda.Reynolds@DFAS.mil/317-510-8893).

Thanks

1105 rejected due to a new general ledger. 2980 is no longer being used as of 1st quarter FY08. Should now be 2985 as Federal, current, and unfunded. Would you make this change in all relevant trial balances so we can upload them into DDRS-AFS. We can't upload using 2980 this quarter.

Would have thought DDRS-B would have made this change, but it for sure needs to be made in DDRS-B and SABRS. Thanks.

-----Original Message-----

From: JSA DFAS

Subject: USSGL 2985

I confirmed with [redacted] that USSGL 2985 Liability for Non-Entity Assets Not Reported on the Statement of Custodial Activity will not be used in 4th quarter FY 2007. It will be used beginning with 1st quarter FY 2008.

Thanks,

No problem, we can do that. We only input based on AFS request for all Suspended Revenues to be included.

Please reverse out the Suspended Revenue JVs that were done.

Thanks,

x

Importance: High

My understanding from this email that is that the information on these attached spreadsheets are incorrect and should not be entered. Since these were input at the budgetary level I believe you would need to back these out.

Thanks,

FFYI. According to our records, we should not have unfunded support and suspended workcounts for GF.

Thanks,

Subject: RE: 1st Quarter Suspended Revenue-DFAS

Per our phone conversation this morning, below are a few comments/questions we have with the attachments. If I'm reading the spreadsheets correctly, I'll be referencing lines pertaining to the Marine Corps, lines 88-101 on the first attachment and lines 102-119 of the second attachment.

First Attachment

1. The spreadsheet is somewhat confusing because Lines 88, 91, & 93 site MIPR # M0008508MPDFAS2 in Column J under AT17AC2_1106 but our accounting system shows this MIPR # under the 1107 appropriation.

2. Lines 95, 99, & 101 MIPR # M0008508MPDFAS1 in Column J under AT17AC2_1107 but our accounting system shows this MIPR # under the 1106 appropriation.

2. I don't understand why payments for MIPR # M0008508MPDFAS2 are being put into suspense because our accounting systems currently shows over \$400K available?

3. Lines 90 & 97, what is meant by "Waiting on a determination of whether it should be output 18"?

Second Attachment

1. I need further explanation as I don't understand the "Unfunded" lines on this spreadsheet? (Lines 105-110 & 112-119)

2. How can you have a credit amount suspended? Why are lines 102 & 103 suspended? Funds appear to be available.

3. How are these two spreadsheets related?

Any assistance you can provide will be greatly appreciated. Thanks!
