1. Purpose. Per reference (a), this Training & Readiness (T&R) Manual, contained in enclosure (1), establishes training standards, regulations, and policies regarding the training of Marines and assigned Navy personnel in the Assault Amphibious Vehicle occupational field.

2. Cancellation. NAVMC 3500.2A

3. Scope

a. The Core Capability Mission Essential Task List in this manual is used in Defense Readiness Reporting System (DRRS) for assessment and reporting of unit readiness. Units achieve training readiness for reporting in DRRS by gaining and sustaining proficiency in the training events in this manual at both collective (unit) and individual levels.

b. Per reference (b), commanders will conduct an internal assessment of the unit’s ability to execute its mission and develop long-, mid-, and short-range training plans to sustain proficiency and correct deficiencies. Training plans will incorporate these events to standardize training and provide objective assessment of progress toward attaining combat readiness. Commanders will keep records at the unit and individual levels to record training achievements, identify training gaps, and document objective assessments of readiness associated with training Marines and assigned Navy personnel. Commanders will use reference (c) to incorporate Nuclear, Biological, and Chemical Defense training into training plans and reference (d) to integrate Operational Risk Management. References (e) and (f) provide amplifying information for effective planning and management of training within the unit.

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.
c. Formal school and training detachment commanders will use references (a) and (g) to ensure programs of instruction meet skill training requirements established in this manual and provides career-progression training in the events designated for initial training in the formal school environment.

4. Information. Commanding General (CG), Training and Education Command (TECOM) will update this T&R Manual as necessary to provide current and relevant training standards to commanders. All questions pertaining to the Marine Corps Ground T&R Program and Unit Training Management should be directed to: CG, TECOM, Marine Air Ground Task Force Training and Education Standards Division (C 465), 1019 Elliot Road, Quantico, Virginia 22134.

5. Command. This manual is applicable to the Marine Corps Total Force.

6. Certification. Reviewed and approved this date.

1000. INTRODUCTION

1. The T&R Program is the Corps’ primary tool for planning, conducting and evaluating training and assessing training readiness. Subject matter experts (SMEs) from the operating forces developed core capability Mission Essential Task List(s) (METLs) for ground communities derived from the Marine Corps Task List (MCTL). This T&R Manual is built around these METLs and other related Marine Corps Tasks (MCT). All events contained in the Manual relate directly to these METLs and MCTs. This comprehensive T&R Program will help to ensure the Marine Corps continues to improve its combat readiness by training more efficiently and effectively. Ultimately, this will enhance the Marine Corps’ ability to accomplish real-world missions.

2. The T&R Manual contains the individual and collective training requirements to prepare units to accomplish their combat mission. The T&R Manual is not intended to be an encyclopedia that contains every minute detail of how to accomplish training. Instead, it identifies the minimum standards that Marines must be able to perform in combat. The T&R Manual is a fundamental tool for commanders to build and maintain unit combat readiness. Using this tool, leaders can construct and execute an effective training plan that supports the unit's METL. More detailed information on the Marine Corps Ground T&R Program is found in reference (a).

3. The T&R Manual is designed for use by unit commanders to determine pre-deployment training requirements in preparation for training and for Formal Learning Centers (FLCs) and Training Detachments to create courses of instruction. This directive focuses on individual and collective tasks performed by operating forces (OPFOR) units and supervised by personnel in the performance of unit Mission Essential Tasks (METs).

1001. UNIT TRAINING

1. The training of Marines to perform as an integrated unit in combat lies at the heart of the T&R program. Unit and individual readiness are directly related. Individual training and the mastery of individual core skills serve as the building blocks for unit combat readiness. A Marine's ability to perform critical skills required in combat is essential. However, it is not necessary to have all individuals within a unit fully trained in order for that organization to accomplish its assigned tasks. Manpower shortfalls, temporary assignments, leave, or other factors outside the commander’s control, often affect the ability to conduct individual training. During these periods, unit readiness is enhanced if emphasis is placed on the individual training of Marines on-hand. Subsequently, these Marines will be mission ready and capable of executing as part of a team when the full complement of personnel is available.
2. Commanders will ensure that all tactical training is focused on their combat mission. The T&R Manual is a tool to help develop the unit’s training plan. In most cases, unit training should focus on achieving unit proficiency in the core METL. However, commanders will adjust their training focus to support METLs associated with a major Operational Plan (OPLAN)/Contingency Plan (CONPLAN) or named operation as designated by their higher commander and reported accordingly in the DRRS. Tactical training will support the METL in use by the commander and be tailored to meet T&R standards. Commanders at all levels are responsible for effective combat training. The conduct of training in a professional manner consistent with Marine Corps standards cannot be over emphasized.

3. Commanders will provide personnel the opportunity to attend formal and operational level courses of instruction as required by this Manual. Attendance at all formal courses must enhance the warfighting capabilities of the unit as determined by the unit commander.

1002. UNIT TRAINING MANAGEMENT

1. Unit Training Management (UTM) is the application of the Systems Approach to Training (SAT) and the Marine Corps Training Principles. This is accomplished in a manner that maximizes training results and focuses the training priorities of the unit in preparation for the conduct of its wartime mission.

2. UTM techniques, described in references (b) and (e), provide commanders with the requisite tools and techniques to analyze, design, develop, implement, and evaluate the training of their unit. The Marine Corps Training Principles, explained in reference (b), provide sound and proven direction and are flexible enough to accommodate the demands of local conditions. These principles are not inclusive, nor do they guarantee success. They are guides that commanders can use to manage unit-training programs. The Marine Corps training principles are:

   - Train as you fight
   - Make commanders responsible for training
   - Use standards-based training
   - Use performance-oriented training
   - Use mission-oriented training
   - Train the MAGTF to fight as a combined arms team
   - Train to sustain proficiency
   - Train to challenge

3. To maintain an efficient and effective training program, leaders at every level must understand and implement UTM. Guidance for UTM and the process for establishing effective programs are contained in references (b), (e) and (f).

1003. SUSTAINMENT AND EVALUATION OF TRAINING

1. The evaluation of training is necessary to properly prepare Marines for combat. Evaluations are either formal or informal, and performed by members
of the unit (internal evaluation) or from an external command (external evaluation).

2. Marines are expected to maintain proficiency in the training events for their MOS at the appropriate grade or billet to which assigned. Leaders are responsible for recording the training achievements of their Marines. Whether it involves individual or collective training events, they must ensure proficiency is sustained by requiring retraining of each event at or before expiration of the designated sustainment interval. Performance of the training event, however, is not sufficient to ensure combat readiness. Leaders at all levels must evaluate the performance of their Marines and the unit as they complete training events, and only record successful accomplishment of training based upon the evaluation. The goal of evaluation is to ensure that correct methods are employed to achieve the desired standard, or the Marines understand how they need to improve in order to attain the standard. Leaders must determine whether credit for completing a training event is recorded if the standard was not achieved. While successful accomplishment is desired, debriefing of errors can result in successful learning that will allow ethical recording of training event completion. Evaluation is a continuous process that is integral to training management and is conducted by leaders at every level and during all phases of planning and the conduct of training. To ensure training is efficient and effective, evaluation is an integral part of the training plan. Ultimately, leaders remain responsible for determining if the training was effective.

3. The purpose of formal and informal evaluation is to provide commanders with a process to determine a unit’s/Marine’s proficiency in the tasks that must be performed in combat. Informal evaluations are conducted during every training evolution. Formal evaluations are often scenario-based, focused on the unit’s METs, based on collective training standards, and usually conducted during higher-level collective events. References (a) and (f) provide further guidance on the conduct of informal and formal evaluations using the Marine Corps Ground T&R Program.

1004. ORGANIZATION. The AAV T&R Manual is comprised of 8 chapters and 6 appendices. Chapter 1 is an overview of the Ground T&R Program. Chapter 2 lists the Core Capability METs and their related Battalion and Company-level events. Chapters 3 through 6 contain collective events, Chapters 5 and 7 contain individual events, and Chapter 8 contains AA Bn low density MOS events. Appendices are noted in the table of contents.

1005. T&R EVENT CODING. An event contained within a T&R Manual is an individual or collective training standard. This section explains each of the components of a T&R event. These items will be included in all of the events in each T&R Manual. Community-based T&R Manuals may have several additional components not found in unit-based T&R Manuals. The event condition, event title (behavior) and event standard should be read together as a grammatical sentence.

1. Event Code. The event code is an up to 4-4-4 alphanumeric character set:
a. First up to 4 characters indicate MOS or Community (e.g., 0321, 1812 or INTL)

b. Second up to 4 characters indicate functional or duty area (e.g. DEF, FSPT, MVMT, etc.)

c. Third 4 characters indicate the unit size and supported unit, if applicable (1000 through 9000), and sequence. Figure 1-1 shows the relationship of unit size to event code. NOTE: The titles for the various echelons are for example only, and are not exclusive. For example: 4000-level events are appropriate for Section-level events as noted, but also for Squad-level events.

![Figure 1: T&R Event Levels](image)

(1) **Grouping.** Categorizing events with the use of a recognizable code makes the type of skill or capability being referenced fairly obvious. Examples include: PAT for patrolling events, DEF for events in the defense, FSPT for events related to fire support, etc. There is no special significance to the functional areas, but they should be intuitive to make it as easy as possible for the T&R user to find events. When organizing the T&R Manual, functional areas are alphabetized then the associated events are numbered. The events will be numbered based upon the introduction of each new functional area, allowing up to “999” events. For example: if there are seven Administrative events 4431 occupational field, then the events should start 4431-ADMN-1001 and run through 1007. Next, the Bulk Fuel events, BUFL should start at 4431-BUFL-1001.

(2) **Sequencing.** A numerical code is assigned to each individual (1000-2000-level) or collective (3000-9000-level) training event. The first number identifies the size of the unit performing the event, as depicted in figure 1-1. The second number is available for T&R Manuals with collective events that support those in other manuals to identify the echelon of unit being supported by a particular collective event. If a collective event is supported by other events or is performed in general support without regard to echelon, then a zero “0” will be utilized as the second number. For example: 0231-TGT-3801 would refer to an event conducted by a four Marine Targeting Cell supporting a Regiment or Group, 0231-TGT-3001 would represent
an event the Targeting Cell does in support of any sized unit. The event would not be labeled 0231-TGT-8001 because that would imply that a regiment sized targeting unit was performing some task. This is not possible, since no intelligence unit organizes in a unit larger than a Battalion. EXCEPTION: Events that relate to staff planning, to the conduct of a command operations center or to staff level decision making processes will be numbered according to the level of the unit to which the staff belongs. For example: an infantry battalion staff conducting planning for an offensive attack would be labeled as INF-PLAN-7001 even though the entire battalion is not actively involved in the planning of the operation. T&R event sequence numbers that begin with “9” are reserved for Marine Air Ground Task Forces (MAGTF) Command Element (CE) events. Marine Expeditionary Units (MEU) CE events will be numbered 90XX - 93XX. Marine Expeditionary Brigade (MEB) CE events will be numbered 94XX - 96XX. Marine Expeditionary Force (MEF) CE events will be numbered 97XX - 99XX.

![Figure 2: T&R Event Coding](image)

1006. COMBAT READINESS PERCENTAGE (CRP)

1. The Marine Corps Ground T&R Program includes processes to assess readiness of units and individual Marines. Every unit in the Marine Corps maintains a basic level of readiness based on the training and experience of the Marines in the unit. Even units that never trained together are capable of accomplishing some portion of their missions. Combat readiness assessment does not associate a quantitative value for this baseline of readiness, but uses a “Combat Readiness Percentage”, as a method to provide a concise descriptor of the recent training accomplishments of units and Marines.

2. CRP is the percentage of required training events that a unit or Marine accomplishes within specified sustainment intervals.

3. Unit combat readiness is assessed as a percentage of the successfully completed and current (within sustainment interval) key training events called “Evaluation-Coded” (E-Coded) Events. E-Coded Events and unit CRP calculation are described in follow-on paragraphs. CRP achieved through the completion of E-Coded Events is directly relevant to readiness assessment in DRRS.

4. Individual combat readiness is assessed as the percentage of required individual events in which a Marine is current. This translates as the percentage of training events for his/her MOS and grade that the Marine successfully completes within the directed sustainment interval. Individual skills are developed through a combination of 1000-level training (entry-
level formal school courses), individual on-the-job training in 2000-level events, and follow-on formal school training. Skill proficiency is maintained by retraining in each event per the specified sustainment interval.

1007. CRP CALCULATION

1. Collective training begins at the 3000-level (team, crew or equivalent). Unit training plans are designed to accomplish the events that support the unit METL while simultaneously sustaining proficiency in individual core skills. E-Coded collective events are the only events that contribute to unit CRP. This is done to assist commanders in prioritizing the training toward the METL, taking into account resource, time, and personnel constraints.

2. Unit CRP increases after the completion of E-Coded events. The number of E-Coded events for the MET determines the value of each E-Coded event. For example, if there are 4 E-Coded events for a MET, each is worth 25% of MET CRP. MET CRP is calculated by adding the percentage of each completed and current (within sustainment interval) E-Coded training event. The percentage for each MET is calculated the same way and all are added together and divided by the number of METS to determine unit CRP. For ease of calculation, we will say that each MET has four E-Coded events, each contributing 25% towards the completion of the MET. If the unit has completed and is current on three of the four E-Coded events for a given MET, then they have completed 75% of the MET. The CRP for each MET is added together and divided by the number of METS to get unit CRP; unit CRP is the average of MET CRP.

For Example:

| MET 1: 75% complete (3 of 4 E-Coded events trained) |
| MET 2: 100% complete (6 of 6 E-Coded events trained) |
| MET 3: 25% complete (1 of 4 E-Coded events trained) |
| MET 4: 50% complete (2 of 4 E-Coded events trained) |
| MET 5: 75% complete (3 of 4 E-Coded events trained) |

To get unit CRP, simply add the CRP for each MET and divide by the number of METS:

\[
\text{MET CRP: } 75 + 100 + 25 + 50 + 75 = 325
\]

\[
\text{Unit CRP: } 325 \text{ (total MET CRP)}/5 \text{ (total number of METS)} = 65\%
\]

1008. T&R EVENT COMPOSITION

1. **Event Code.** The event code is explained in paragraph 1005.
2. **Title.** The name of the event. The event title contains one action verb and ideally, one object.

3. **Evaluation Coded.** Collective events categorize the capabilities that a given unit may be expected to perform. There are some collective events that
the Marine Corps has determined that a unit MUST be able to perform, if that unit is to be considered fully ready for operations. These E-Coded events represent the irreducible minimum or the floor of readiness for a unit. E-Coded events are derived from the training measures of effectiveness for the METs for units that must report readiness in the DRRS. It would seem intuitive that most E-Coded events would be for Battalion sized units and higher since those are the units that report in DRRS. However, if the Marine Corps has determined that the readiness of a subordinate, supporting unit to accomplish a particular collective event is vital to the accomplishment of the supported unit’s MET, then that lower echelon collective event is E-Coded.

4. Supported MET(s). List all METs that are supported by the training event in the judgment of the occupation field drafting the T&R Manual, even if those events are not listed as Measure of Effectiveness (MOEs) in a MET.

5. Sustainment Interval. This is the period, expressed in number of months, between evaluation or retraining requirements. Competencies and capabilities acquired through the accomplishment of training events are to be refreshed at pre-determined intervals. It is essential that these intervals be adhered to in order to ensure Marines maintain proficiency.

6. Billet/MOS. Each individual training event will contain a billet code and/or MOS that designates who is responsible for performing that event and any corresponding formal course required for that billet. Each commander has the flexibility to shift responsibilities based on the organization of his command. These codes are based on recommendations from the collective subject matter expertise that developed this manual and are listed for each event.

7. Grade. The Grade field indicates the rank at which Marines are required to complete the event.

8. Description. This field allows T&R developers to include an explanation of event purpose, objectives, goals, and requirements. It is a general description of an action requiring learned skills and knowledge, i.e., engage fixed target with crew-served weapons. This is an optional field for individual events but its use is strongly encouraged for collective events. This field can be of great value guiding a FLC or OPFOR unit trying to discern the intent behind an event that might not be readily apparent.

9. Condition. Condition refers to the constraints that may affect event performance in a real-world environment. It indicates what is provided (equipment, tools, materials, manuals, aids, etc.), environmental constraints or conditions under which the task is to be performed, and any specific cues or indicators to which the performer must respond. Commanders can modify the conditions of the event to best prepare their Marines to accomplish the assigned mission (e.g. in a desert environment; in a mountain environment; etc.). When resources or safety requirements limit the conditions, this should be stated. The content of the condition should be included in the event on a “by exception” basis. If there exists an assumption regarding the conditions under which all or most of the events in the Manual will be performed, then only those additional or exceptional items required should be listed in the condition. The common conditions under which all the events in
a chapter will be executed will be listed as a separate paragraph at the
beginning of the chapter.

10. **Standard.** The performance standard indicates the basis for judging the
effectiveness of the performance. It consists of a carefully worded
statement that identifies the proficiency level expected when the task is
performed. The standard provides the minimum acceptable performance
parameters and must be strictly adhered to. The standard for collective
events will likely be general, describing the desired end-state or purpose of
the event. The standard for individual events will be objective,
quantifiable, and readily observable. Standards will more specifically
describe to what proficiency level, specified in terms of accuracy,
completeness, time required, and sequencing the event is to be accomplished.
These guidelines can be summarized in the acronym “ACTS” (Accuracy
Completeness Time Sequence.) In no cases will “per the reference” or “per/in
accordance with commander’s intent” be used as a stand-alone standard.

11. **Event Components/Performance Steps.** Description of the actions that the
event is composed of, or a list of subordinate, included T&R event codes and
event descriptions. The event components help the user determine what must
be accomplished and to properly plan for the event. Event components are
used for collective events; performance steps are used for individual events.

   a. The event components and performance steps will be consciously
   written so that they may be employed as performance evaluation check lists by
   the operating forces.

   b. Event components may be events one individual in the unit performs,
events that small groups in the unit perform, or events involving the entire
unit. After the publication of this order, all component events will
identify the behaviors required in plain English but also by citing the
precise event number the component event refers to, unless that component
event only occurs as part of the collective event where it is listed. This
provision will allow for specific events to be chained together in order to
provide greater granularity for units and Marines executing the events, and
clarity for those charged with evaluating unit performance.

12. **Prerequisite Events.** Prerequisites are academic training or other T&R
events that must be completed prior to attempting the task. They are lower-
level events or tasks that give the individual/unit the skills required to
accomplish the event. They can also be planning steps, administrative
requirements, or specific parameters that build toward mission
accomplishment.

13. **Chained Events.** Collective T&R events are supported by lower-level
collective and individual T&R events. This enables unit leaders to
effectively identify subordinate T&R events that ultimately support specific
mission essential tasks. When the accomplishment of any upper-level events,
by their nature, result in the performance of certain subordinate and related
events, the events are “chained.” The completion of chained events will
update sustainment interval credit (and CRP for E-Coded events) for the
related subordinate level events.
14. Related ITEs. A list of all of the Individual Training Events (1000-2000-level events) that support the event.

15. Initial Training Setting. All individual events will designate the setting at which the skill is first taught, either at the FLC, in the OPPOR as MOJT, or via a distance learning product (DL).

16. References. The training references shall be utilized to determine task performance steps. They assist the trainee in satisfying the performance standards, or the trainer in evaluating the effectiveness of task completion. T&R Manuals are designed to be a training outline, not to replicate or replace doctrinal publications, reference publications or technical manuals. References are key to developing detailed lesson plans, determining grading criteria, and ensuring standardization of training.

17. Distance Learning Products. Distance learning products include: Individual Multimedia Instruction (IMI), Computer-Based Training (CBT), Marine Corps Institute (MCI), etc. This notation is included when, in the opinion of the TRMG in consultation with the MTSD representative, the event can be taught via one of these media vice attending a formal course of instruction or receiving MOJT.

18. Support Requirements. This is a list of the external and internal support the unit and Marines will need to complete the event. This is a key section in the overall T&R effort, as resources will eventually be tied directly to the training towards METS. Future efforts to attain and allocate resources will be based on the requirements outlined in the T&R Manual. The list includes, but is not limited to:

- Range(s)/Training Area
- Ordnance
- Equipment
- Materials
- Other Units/Personnel

The ordnance requirements for one year of training for the events in the T&R will be aggregated into a table contained in an appendix to the T&R. The task analyst and the occupational field representatives will be careful not to “double count” ammunition that might be employed in the performance of individual and collective events that are chained.

19. Miscellaneous

   a. This field provides space for any additional information that will assist in the planning and execution of the event. Units and FLCs are cautioned not to disregard this information or to consider the information of lesser importance than what is contained in other parts of the T&R event. Miscellaneous fields provide an opportunity for the drafters of the T&R event to communicate vital information that might not fit neatly into any other available field. The list may include, but is not limited to:

   - Admin Instructions
   - Special Personnel Certifications
   - Equipment Operating Hours
• Road Miles

b. An example of a T&R event is provided in figure 1-4.

Figure 1-4: Example of a T&R Event

1009. CHEMICAL BIOLOGICAL RADIOLOGICAL NUCLEAR (CBRN) TRAINING

1. All personnel assigned to the operating force must be trained in CBRN defense, in order to survive and continue their mission in this environment. Individual proficiency standards are defined as survival and basic operating standards. Survival standards are those that the individual must master in order to survive CBRN attacks. Basic operating standards are those that the individual, and collectively the unit, must perform to continue operations in a CBRN environment.

2. In order to develop and maintain the ability to operate in a CBRN environment, CBRN training is an integral part of the training plan and events in this T&R Manual. Units should train under CBRN conditions whenever possible. Per reference (c), all units must be capable of accomplishing their assigned mission in a contaminated environment.

1010. NIGHT TRAINING
1. While it is understood that all personnel and units of the operating force are capable of performing their assigned mission in “every climate and place,” current doctrine emphasizes the requirement to perform assigned missions at night and during periods of limited visibility. Basic skills are significantly more difficult when visibility is limited.

2. To ensure units are capable of accomplishing their mission they must train under the conditions of limited visibility. Units should strive to conduct all events in this T&R Manual during both day and night/limited visibility conditions. When there is limited training time available, night training should take precedence over daylight training, contingent on the availability of equipment and personnel.

1011. OPERATIONAL RISK MANAGEMENT (ORM)

1. ORM is a process that enables commanders to plan for and minimize risk while still accomplishing the mission. It is a decision making tool used by Marines at all levels to increase operational effectiveness by anticipating hazards and reducing the potential for loss, thereby increasing the probability of a successful mission. ORM minimizes risks to acceptable levels, commensurate with mission accomplishment.

2. Commanders, leaders, maintainers, planners, and schedulers will integrate risk assessment in the decision-making process and implement hazard controls to reduce risk to acceptable levels. Applying the ORM process will reduce mishaps, lower costs, and provide for more efficient use of resources. ORM assists the commander in conserving lives and resources and avoiding unnecessary risk, making an informed decision to implement a Course Of Action (COA), identifying feasible and effective control measures where specific measures do not exist, and providing reasonable alternatives for mission accomplishment. Most importantly, ORM assists the commander in determining the balance between training realism and unnecessary risks in training, the impact of training operations on the environment, and the adjustment of training plans to fit the level of proficiency and experience of Sailors/Marines and leaders. Further guidance for ORM is found in references (b) and (d).

1012. MARINE CORPS GROUND T&R PROGRAM

1. The Marine Corps Ground T&R Program continues to evolve. The vision for Ground T&R Program is to publish a T&R Manual for every readiness-reporting unit so that core capability METs are clearly defined with supporting collective training standards, and to publish community-based T&R Manuals for all occupational fields whose personnel augment other units to increase their combat and/or logistic capabilities. The vision for this program includes plans to provide a Marine Corps training management information system that enables tracking of unit and individual training accomplishments by unit commanders and small unit leaders, automatically computing CRP for both units and individual Marines based upon MOS and rank (or billet). Linkage of T&R Events to the MCTL, through the core capability METs, has enabled objective assessment of training readiness in the DRRS.
2. DRRS measures and reports on the readiness of military forces and the supporting infrastructure to meet missions and goals assigned by the Secretary of Defense. With unit CRP based on the unit’s training toward its METs, the CRP will provide a more accurate picture of a unit’s readiness. This will give fidelity to future funding requests and factor into the allocation of resources. Additionally, the Ground T&R Program will help to ensure training remains focused on mission accomplishment and that training readiness reporting is tied to units’ METLs.

2002. MARINE CORPS TASK DESCRIPTION. The below is the description of the Marine Corps Tasks assigned to the AAV community.

MCT 1.1.2 Provide Task-Organized Forces. The Marine Corps organizes its operational forces as Marine Corps components and as MAGTFs to provide task-organized, self-sustaining multipurpose forces to the joint force or naval expeditionary force. These uniquely organized Marine Corps forces can respond to a wide range of operational and tactical missions and tasks, providing an unmatched combination of deployment and employment options.

MCT 1.12.1 Conduct Amphibious Operations. To conduct a military operation launched from the sea by an amphibious force, embarked in ships or craft with the primary purpose of introducing a landing force ashore to accomplish the assigned mission. Types of amphibious operations include assaults, withdrawals, demonstrations, raids, and other amphibious operations in a permissive, uncertain, or hostile environment.

MCT 1.4.1.1.2 Conduct Breaching Operations. To employ any means available to break through or secure a passage through an enemy defense, obstacle or fortification. This enables a force to maintain its mobility by removing or reducing natural and man-made obstacles.

MCT 1.6.1 Conduct Offensive Operations. Take the initiative, gain freedom of action to allow swift transition from one action to another and to put the enemy at risk throughout the depth and space of the battlespace. Defeat, destroy or neutralize the enemy force by taking the fight to the enemy in such a way as to achieve victory at least cost.

MCT 1.6.4 Conduct Defensive Operations. Take action to defeat an enemy attack. Buy time, to hold a piece of key terrain, to facilitate other operations, to preoccupy the enemy in one area so friendly forces can attack him in another, or to erode enemy resources at a rapid rate while reinforcing friendly operations.

MCT 5.3.2 Establish Means to Command and Control. To establish and provide controls and procedures for command and tactical movement of forces in a way that permits a commander to move his force quickly, securely, and efficiently. To take into account the size of units and related time and space factors. To pass on multiple routes at a designated speed, organized in serial march units; establish jamming teams and liaison parties; and move tactical command post before main body to synchronize and coordinate movement, etc. Control is established to ensure the commander flexibility to deploy his force as necessary for tactical purposes.

3000. PURPOSE. This chapter contains the Battalion and Company-level Assault Amphibian unit events, and illustrates the relationship between unit competencies METs and unit training (Collective Events). Unit training managers can isolate all training relevant to each MET and devise training to support their competencies as needed. Lastly, this chapter serves as the focal point for Platoon training, detailed in the subsequent chapters.

3001. EVENT CODING. Events in the T&R Manual are depicted with an up to 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

   a. Field one - Each event starts with “AAV” indicating that the event is for units in the AAV Occupational Field.

   b. Field two - This field is alpha characters indicating a functional area. Functional areas used at the Battalion and Company level are:

      CMDC - Command and Control CBTS - Combat Support
      CSS - Combat Service Support AMPH - Amphibious Operations
      TAC - Tactical Operations

   c. Field three - This field provides unit level at which the event is accomplished and numerical sequencing.

3002. ADMINISTRATIVE NOTES

1. Commanders should select which collective events under a MET will be E-Coded for purposes of recording and calculating Combat Readiness Percentages.

2. Each event contains a paragraph that describes internal and external support requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those events that cannot be accomplished at a certain location due to lack of ranges.

3003. COLLECTIVE DESCRIPTION/CORE CAPABILITY
1. **Assault Amphibian Battalion.** The mission of the Assault Amphibian Battalion is to train, maintain, and prepare an Assault Amphibian Battalion capable of conducting amphibious and mechanized operations in order to support the ground combat element with maneuver, fires, force protection, command and control, and logistics. When appropriately resourced, be prepared to train partner nation forces, conduct provisional infantry operations, and conduct route security. The Assault Amphibian Battalion provides the Ground Combat Element with the general support lift, staff expertise, and command and control assets to plan and execute amphibious forcible entry and subsequent mechanized operations ashore. The Assault Amphibian Battalion has units of scalable capability, task organized to support each echelon of the Ground Combat Element from company to regiment. The Battalion is comprised of subordinate Assault Amphibian Companies and a Headquarters and Support company. The Assault Amphibian Battalion augments the Assault Amphibian Company’s organic logistics capability by providing personnel, medical, resupply, and overflow second and third echelon maintenance.

   a. Conducts amphibious operations.
   b. Conducts mechanized operations.
   c. Provides staff and command and control assets to plan and execute mechanized operations.
   d. Conducts combat service support operations.
   e. Conducts mechanized breaching support.
   f. Conducts operations in CBRN environment.

2. **Assault Amphibian Company.** The mission of the Assault Amphibian Company is to train, maintain, and prepare an Assault Amphibian Company capable of conducting amphibious and mechanized operations in order to support the Ground Combat Element with maneuver, fires, force protection, command and control, and logistics. When appropriately resourced, be prepared to train partner nation forces, conduct provisional infantry operations, and conduct route security. The Assault Amphibian Company provides the Ground Combat Element with the general support lift, staff expertise, and command and control assets to plan and execute amphibious forcible entry and subsequent mechanized operations ashore. The Assault Amphibian Company has units of scalable capability, task organized to support echelons of the Ground Combat Element from company to battalion. The Assault Amphibian Company consists of 3 Assault Amphibian Platoons, a Headquarters Platoon, and a Maintenance Platoon or detachment. The company commander functions as a special staff officer to the supported unit in AAV employment in addition to commanding the company.

   a. Conduct amphibious operations.
   b. Conduct mechanized operations.
   c. Conduct offensive operations.
   d. Conduct defensive operations
   e. Conduct operations in a CBRN environment.

3. **Assault Amphibian Headquarters and Service (H&S) Company.** The mission of the Headquarters and Service Company is to provide the Battalion Commander the means to train, maintain, prepare and sustain subordinate units in order to support the Ground Combat Element with maneuver, fires, force protection, command and control, and logistics. Through its subordinate platoons and
sections, the H&S Company provides maintenance, communications, administrative, medical, supply and other service support functions to the AA battalion.

a. Conduct combat service support operations in support of the Assault Amphibian Battalion.
b. Provide higher echelon support of maintenance to the Assault Amphibian Companies.
c. Provide command and control infrastructure for the Assault Amphibian Battalion staff.
d. Conduct rear area security for the Assault Amphibian Battalion Support Area.
e. Conduct operations in NBC environment.
f. Participate in convoy operations.

3005. BATTALION-LEVEL EVENTS

AAV-CMDC-7001: Provide Alert Forces

SUPPORTED MET(S): MCT 1.1.2

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months
DESCRIPTION: An important type of Special Purpose MAGTF is the Air Contingency Force (ACF). An ACF is an on-call, task-organized alert force that is maintained by all three Marine Expeditionary Forces (MEF). It can be dispatched virtually worldwide to respond to a rapidly developing crisis. The ACF is the MEF's force in readiness. It can deploy independently or in conjunction with amphibious forces, MPFs, or other expeditionary forces.

CONDITION: Given a higher headquarters' operation order and commander's guidance.

STANDARD: To deploy in response to a rapidly developing crisis.

EVENT COMPONENTS:
1. Review the concept of operations / operations plan to determine specific transportation requirements
2. Identify TPFDD requirements to higher headquarters
3. Formulate an embarkation plan with level 4 data (weight and dimensions)
4. Forecast lift requirements
5. Provide input regarding Force Deployment Planning and Execution
6. Submit transportation requirements to higher headquarters
7. Disseminate a movement schedule to the appropriate units
8. Supervise embarkation / movement to staging area
9. Support deployment and distribution planning through the use of automated information systems

4000. PURPOSE. This chapter contains all Platoon level Assault Amphibian unit events (5000 Level). Unit training managers can isolate all training relevant to platoons and devise training to support their competencies as needed.

4001. EVENT CODING. Events in the T&R Manual are depicted with a 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

a. Field one - Each event starts with “AAV” indicating that the event is for units in the AAV Occupational Field.

b. Field two - This field is alpha characters indicating a functional area. Functional areas used at the Platoon level are:

   - GNR - Gunnery
   - CBST - Combat Support
   - TAC - Tactical Operations
   - AMPH - Amphibious Operations
   - CSS - Combat Service Support

4002. ADMINISTRATIVE NOTES. Each Event may contain a paragraph that describes internal and external Support Requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the Event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those Events that cannot be accomplished at a certain location due to lack of ranges.

4003. COLLECTIVE DESCRIPTION/CORE CAPABILITY

1. Assault Amphibian Platoon. The mission of the AA platoon is to land the surface assault element of the landing force and their equipment in a single lift from assault shipping by amphibious operations to inland objectives, and to conduct mechanized operations and related combat support in subsequent operations ashore. The AA platoon consists of 12 AAVP7A1 and is organized into four (4) sections of three vehicles. The platoon is lead by the AA
platoon commander who directly advises the infantry company commander on AAV employment.

   a. Provide fire support and maneuverability for supported unit.
   b. Conduct amphibious operations.
   c. Conduct mechanized operations.
   d. Conduct offensive operations.
   e. Conduct defensive operations.
   f. Employ AA platoon fires.
   g. Conduct operations in CBRN-E environment.

2. Assault Amphibian Platoon, Mine Countermeasure. The mission of Mine Countermeasure (MCM) platoon is to provide breaching capability to the breach commander. The AA MCM platoon is composed of 24 AAVP7A1s with crews, with 12 MK 1 Mod O Mine Clearance Systems organized into four sections. The MCM platoon is led by the platoon commander who supports the breach commander.

   a. Conduct breaching operations.
   b. Conduct amphibious operations.
   c. Conduct mechanized operations.
   d. Conduct defensive operations.
   e. Employ AA MCM platoon fires.
   f. Conduct operations in CBRN-E environment.

5000. PURPOSE. This chapter contains all Section and Crew-level Assault Amphibian unit events (4000 and 3000-Levels). Unit training managers can isolate all training relevant to sections and crews and devise training to support their competencies as needed.

5001. EVENT CODING. Events in the T&R Manual are depicted with an up to 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

a. Field one – Each event starts with “AAV” indicating that the event is for units in the AAV Occupational Field.

b. Field two – This field is alpha characters indicating a functional area. Functional areas used at the Section and Crew level are:

   - GNRY – Gunnery
   - VOPS – Vehicle Operations
   - CSS – Combat Service Support
   - TAC – Tactical Operations
   - CMDC – Command and Control
   - CBTS – Combat Support
   - AMPH – Amphibious Operations

   c. Field three – This field provides unit level at which the event is accomplished and numerical sequencing.

5002. ADMINISTRATIVE NOTES. Each Event may contain a paragraph that describes internal and external Support Requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the Event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those Events that cannot be accomplished at a certain location due to lack of ranges.

5003. COLLECTIVE DESCRIPTION/CORE CAPABILITY

1. Assault Amphibian Section. The mission of the Assault Amphibian (AA) section is to provide combat support to the infantry rifle platoon. The AA section consists of three AAV crews and is led by the AA section leader. He exercises tactical control of his AAVs under the command of the AA platoon commander. Additionally, an AA section may be utilized for supporting units such as the 81mm mortar platoon or an engineer platoon.
a. Provide fire support and maneuverability for supported unit.
b. Conduct amphibious operations.
c. Conduct mechanized operations.
d. Conduct offensive operations.
e. Conduct defensive operations.
f. Employ AA section fires.
g. Operate in an NBC environment.

2. Assault Amphibian Section, Command. The mission of the AA command section is to provide battalion and regimental level staffs with a mechanized command center. The AA command section also provides mutual support for the AAVC7A1 vehicle for security and logistical support. The AA command section consists of one AAVP7A1 and one AAVC7A1 vehicle.

a. Establish AAVC7A1 as command post.
b. Conduct amphibious operations.
c. Conduct mechanized operations.
d. Conduct defensive operations.
e. Operate in a CBRN environment.
f. Employ AA command section fires.

3. Assault Amphibian Section, Mobility/Counter-Mobility Platoon. The mission of the AA Mine Countermeasure Section (MCM) is to provide breaching capability to the breach commander. The AA MCM section consists of two AAVP7A1 vehicles and two AAVP7A1 vehicles with Mk 154 kits. The section is further broken down into two teams, each team with one AAVP7A1 and one AAVP7A1 with Mk 154 kit. The MCM section is led by the AA MCM section leader.

a. Conduct breaching operations.
b. Conduct amphibious operations.
c. Conduct mechanized operations.
d. Conduct defensive operations.
e. Operate in a CBRN environment.
f. Employ AA section fires.

4. AAV Crew, AAVP7A1. The mission of the AAVP7A1 crew is to support the reinforced infantry squad within the mission of the AA section. The AAV crew is comprised of three personnel: the vehicle crew chief and two crewmen. The AAV crew operates the AAVP7A1. The crew is led by the vehicle crew chief and operates under the direction of the AA section leader.

a. Operate the AAV on land and in water with vehicles in section.
b. Transport embarked personnel and cargo.
c. Employ the Upgunned Weapons Station.
d. Perform PMCS on vehicle.
e. Operate in a CBRN-E environment.

5. AAV Crew, AAVC7A1. The mission of the AAVC7A1 crew is to support the battalion and regimental level headquarters as a mechanized command post/fire support coordination center. The AAVC7A1 intercom assets provide the embarked troop commander and his staff with the capability to communicate with each other and to remotely operate radio assets from staff positions within the vehicle. The AAVC7A1 weapon is primarily for self-defense. The
AAVC7A1 crew is comprised of three personnel: the vehicle crew chief and two crewmen, and is augmented by a communication technician Marine. The crew is led by the crew chief and operates under the direction of the AA command section leader.

a. Operate the AAVC7A1 on land and in water with vehicles in section.
b. Operate the AAVC7A1 communications equipment.
c. Employ the M240 medium machine gun.
d. Perform PMCS on vehicle.
e. Perform PMCS on communications equipment.
f. Operate in a CBRN-E environment.

6. AAV Crew, MK 1 Mod 0 Mine Clearance System. The mission of the AAVP7A1, with MK 154 LMC Mod 0 kit, crew is to provide breaching capability for the AA Mobility/Counter-Mobility Section. The AAV crew operates the Mk 1 Mod 0 Mine Clearance System. The crew is comprised of three personnel: the vehicle crew chief and two crewmen. The crew is led by the vehicle crew chief and operates under the direction of the AA MCM section leader.

a. Operate the AAV on land and in water with vehicles in section.
b. Employ the MK 1 Mod 0 Mine Clearance System.
c. Employ the Upgunned Weapons Station.
d. Perform PMCS on vehicle.
e. Perform PMCS on MK-154 LMC Mod 0 equipment.
f. Operate in a CBRN-E environment.

6000. PURPOSE. The purpose of 1000-level training is to provide the knowledge and skills required to perform as an Assault Amphibious Vehicle (AAV) Officer. 2000-level events are Core Plus events, with initial training settings of either MOJT or through resident/distance learning PME.

6001. EVENT CODING. Events in the T&R Manual are depicted with a 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

a. Field one - Each event in this chapter begins with “1802” indicating that the event is for AAV Officers.

b. Field two - This field is alpha characters indicating a functional area. Functional areas for AAV Officers are:
   - GNRY – Gunnery
   - CMDC – Command and Control
   - VOPS – Vehicle Operations
   - TAC – Tactical Operation
   - CSS – Combat Service Support
   - AMPH – Amphibious Operations
   - AMPH – Amphibious Operations

c. Field three - This field provides numerical sequencing.

6002. ADMINISTRATIVE NOTES. Each Event may contain a paragraph that describes internal and external Support Requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the Event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those Events that cannot be accomplished at a certain location due to lack of ranges.

6003. PREREQUISITES. The Marine AAV Officer will have completed The Basic School (TBS), Quantico, VA and Assault Amphibian Officer Course, Assault Amphibious School, Camp Pendleton, CA.

6004. BILLET DESCRIPTION/CORE CAPABILITIES

1. CAREER PROGRESSION PHILOSOPHY. The AAV Officer will complete the Assault Amphibian Officer Course, Assault Amphibious School, Camp Pendleton, CA. Upon graduation, the AAV Officer will conduct additional Level 2000 training in an
Assault Amphibian unit in a variety of billets. Level 2 training continues through completion of Career, Intermediate, and Advanced Level Professional Military Education (PME), available through resident, seminar and distance learning courses.

2. **BILLET: Assault Amphibian Platoon Commander.** Responsible for the vehicles and crews in an AA platoon. When he is the senior AA officer assigned to an infantry battalion, he also serves as a special staff officer to the infantry battalion commander. The primary duty of the AA platoon commander is to advise the infantry company commander on the use of AAVs in support of the assigned mission. The AA platoon commander directs the maneuver and fires of his platoon in accordance with the intent of the infantry company commander. The AA platoon commander occupies the weapon station of the AAV that is utilized by the infantry company commander as his command vehicle. During water operations the AA platoon commander maintains control of the tactical movement of the AA unit.

   a. **Core Capabilities**

   (1) Responsible for the training and supervision of platoon personnel in the performance of tasks which support company training objectives.
   (2) Responsible for the welfare and discipline of his platoon.
   (3) Makes operational planning recommendations to the supported unit commander on the employment of AA unit.

SUPPORT REQUIREMENTS:

OTHER SUPPORT REQUIREMENTS: Assault Amphibian Vehicle Turret Trainer (AAV-TT)

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: Simulations will be used as a precursor to live fire training in order to help maximize and enhance the live fire training event.
1803-GNRY-1004: Set Inhibit Zone for the Upgunned Weapons Station

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, inhibit zone aligning tool and reference.

STANDARD: To keep the vehicle and personnel out of the line of fire.

PERFORMANCE STEPS:
1. Prepare the UGWS for setting the inhibit zone
2. Establish the inhibit zone elevation
3. Establish Inhibit Zone 2 azimuths
4. Establish Inhibit Zone 1 azimuths
5. Reset inhibit points if applicable

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: There is a time limit for this task within the MCWP 3-12.2 under the Gunnery Skills Test. The time limit covers multiple tasks that are grouped together in one station. The time limit will not show up in the standards for this task but can be found in the reference 1803-GNRY-1006:

Install/Remove Weapons

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 6 months

MOS Performing: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given machineguns, Upgunned Weapons Station, crew and reference.

STANDARD: Within 20 minutes.

PERFORMANCE STEPS:
1. Install Mk19
2. Install M2
3. Remove Mk 19
4. Remove M2

1803-GNRY-1007: Conduct Minor Boresighting

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 6 months

MOS Performing: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle with crew, machineguns, boresighting kits and reference.

STANDARD: To provide a true sight line adjustment, within 15 minutes.

PERFORMANCE STEPS:
1. Conduct boresight procedures for M36E_
2. Conduct retention procedures

ADMINISTRATIVE INSTRUCTIONS: This task will be performed to standard as part of the Gunnery Skills Test.

1803-GNRY-1008: Load/Unload Weapons

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, ammunition and reference.

STANDARD: To prepare Upgunned Weapons Station to fire and clear weapons of ammunition.

PERFORMANCE STEPS:
1. Load Ammunition into the Mk 19 and M2
2. UnLoad Ammunition from the Mk 19 and M2

REFERENCES:

1803-GNRY-1009: Prepare Fire Plan Sketch

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an AAV Platoon in a defensive position.

STANDARD: To provide overlapping fires and mutual support.

PERFORMANCE STEPS:
1. Combine section fire plan sketches firing data
2. Illustrate Vehicles and Firing Data
3. Illustrate dead space
4. Illustrate terrain

A minimum of five U.S. vehicles and helicopters (mixed; no more than three helicopters per test) will be selected from U.S. armored vehicles and combat helicopters currently in use. 3. All U.S. equipment must be identified correctly to receive a GO rating. 4. This task will be performed to standard as part of the Gunnery Skills Test.

1803-GNRY-1011: Zero the Upgunned Weapons Station

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a Boresighted Assault Amphibious Vehicle, ammunition and stationary target at 500m.

STANDARD: To place center of beaten zone on the target.

PERFORMANCE STEPS:
1. Zero the sight to the Mk 19 machine gun
2. Zero the M2 machine gun to the sight

7000. PURPOSE. The purpose of 1000-level training is to provide the knowledge and skills required to perform as an Assault Amphibious Vehicle (AAV) Crewman. 2000-level events are Core Plus events, with initial training settings of either MOJT or through resident career progression training (Assault Amphibian Unit Leader Course)/distance learning PME.

7001. EVENT CODING. Events in the T&R Manual are depicted with a 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

a. Field one - Each event in this chapter begins with “1833” indicating that the event is for AAV Crewmen.

b. Field two - This field is alpha characters indicating a functional area. Functional areas for AAV Crewmen are:

   GNRY – Gunnery
   VOPS – Vehicle Operations
   CSS – Combat Service Support
   TAC – Tactical Operation
   CMDC – Command and Control
   CBTS – Combat Support
   AMPH – Amphibious Operations

c. Field three - This field provides numerical sequencing.

7002. ADMINISTRATIVE NOTES. Each event may contain a paragraph that describes internal and external Support Requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the Event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those Events that cannot be accomplished at a certain location due to lack of ranges.

7003. PREREQUISITES. The Marine 1833 AAV Crewman will have completed the Assault Amphibian Crewman Course before reporting in at AAV Bn.

7004. BILLET DESCRIPTION/CORE CAPABILITIES

1. CAREER PROGRESSION PHILOSOPHY. The AAV Crewman will complete the Assault Amphibian Crewman Course, Assault Amphibious School, Camp Pendleton, CA.
Upon graduation, the AAV Crewman will conduct additional Level 2000 training in an Assault Amphibian unit in a variety of billets. Level 2 training continues through completion of Career, Intermediate, and Advanced Level Professional Military Education (PME), available through resident, seminar and distance learning courses.

### 7006. 1000-LEVEL EVENTS

**1833-GNRY-1001:** Conduct Preventive Maintenance Checks and Services on Weapons

**EVALUATION-CODED:** NO  
**SUSTAINMENT INTERVAL:** 12 months

**MOS PERFORMING:** 1833

**GRADES:** PVT, PFC, LCPL

**INITIAL TRAINING SETTING:** FORMAL

**CONDITION:** Given Mk 19, M240B, and M2 machineguns and references.

**STANDARD:** To keep equipment in operating condition and ready for its primary Mission.

**PERFORMANCE STEPS:**
1. Clear the machineguns
2. Perform safety check
3. Disassemble the weapon
4. Inspect, clean and lubricate the components
5. Report worn or defective parts
6. Assemble the weapon
7. Perform function check

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: There is a time limit for this task within the MCWP 3-12.2 under the Gunnery Skills Test. The time limit covers multiple tasks that are grouped together in one station. The time limit will not show up in the standards for this task but can be found in the reference.

1833-GNRY-1002: Conductive Preventive Maintenance Checks and Services on Upgunned Weapons Station

EVALUATION-CODED: NO
SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given collateral material and reference.

STANDARD: To keep equipment in operating condition and ready for its primary mission.

PERFORMANCE STEPS:
1. Apply PMCS to turret exterior
2. Apply PMCS to turret interior
3. Lubricate turret components

1833-GNRY-1003: Operate Upgunned Weapons Station (UGWS)

EVALUATION-CODED: NO
SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833
GRADES:  PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT  
INITIAL TRAINING SETTING:  FORMAL  

CONDITION:  Given an Assault Amphibious Vehicle.  

STANDARD:  To ensure readiness of all components.  

PERFORMANCE STEPS:  
1. Complete UGWS pre-operation checklist  
2. Manipulate electrical components  
3. Manipulate manual components

SUPPORT REQUIREMENTS:  

OTHER SUPPORT REQUIREMENTS:  Assault Amphibian Vehicle Turret Trainer (AAV-TT)  

MISCELLANEOUS:  

ADMINISTRATIVE INSTRUCTIONS:  Simulations will be used as a precursor to live training in order to help maximize and enhance the live training event.  

1833-GNRY-1004:  Set Headspace and Adjust Timing  

EVALUATION-CODED:  NO  
SUSTAINMENT INTERVAL:  6 months  

MOS PERFORMING:  1833  

GRADES:  PVT, PFC, LCPL, SGT, SSGT, GYSGT  
INITIAL TRAINING SETTING:  FORMAL  

CONDITION:  Given an M2, collateral equipment and reference.  

STANDARD:  To prepare weapon for firing.  

PERFORMANCE STEPS:  
1. Set headspace  
2. Adjust timing  

REFERENCES:  
1. MCWP 3-12.2 Heavy Brigade Combat Team (HBCT) Gunnery

1833-GNRY-1005: Install/Remove Weapons

EVALUATION-CODED: NO  
SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given machineguns, Upgunned Weapons Station, crew and reference.

STANDARD: Within 20 minutes.

PERFORMANCE STEPS:
1. Install Mk 19
2. Install M2
3. Remove Mk 19
4. Remove M2

1833-GNRY-1006: Assist in Minor Boresighting

EVALUATION-CODED: NO  
SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle with crew, machineguns, boresighting kit and references.

STANDARD: To provide a true sight line adjustment, within 15 minutes.

PERFORMANCE STEPS:
1. Assist with boresight procedures for M36E
2. Assist with retention procedures

1833-GNRY-1007: Load/Unload Weapons

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, crew, and ammunition.

STANDARD: within 20 minutes to prepare Upgunned Weapons Station to fire.

PERFORMANCE STEPS:
1. Load/unload Mk 19
2. Load/unload M2
3. Load/unload M257

1833-GNRY-1008: Zero the Upgunned Weapons Station

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

DESCRIPTION: Live fire gunnery designed to zero the Upgunned Weapons Station.
MOS PERFORMING: 1833
GRADES: PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a Boresighted Assault Amphibious Vehicle, ammunition and stationary target at 500m.

STANDARD: To place center of beaten zone on the target.

PERFORMANCE STEPS:
1. Zero the sight to the Mk 19 machine gun
2. Zero the M2 machine gun to the sight

1833-GNRY-1009: Utilize a Range Card

EVALUATION-CODED: NO
SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833
GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle in a defensive position.
**STANDARD:** To engage targets with the Upgunned Weapons Station.

**PERFORMANCE STEPS:**
1. Orient the Range Card
2. Identify Main Terrain Features
3. Identify Target Reference Point
4. Identify Vehicle Location
5. Identify Sectors of Fire
6. Identify PDF and FPL
7. Identify Dead Space

---

**1833-GNRY-1010:** Recognize threat/friendly vehicles and theater specific threat vehicles

**EVALUATION-CODED:** NO  
**SUSTAINMENT INTERVAL:** 6 months

**MOS PERFORMING:** 1833

**GRADES:** PVT, PFC, LCPL

**INITIAL TRAINING SETTING:** FORMAL

**CONDITION:** Given a classroom present 20 combat vehicles.

**STANDARD:** To name 18 out of 20 Vehicles.

**PERFORMANCE STEPS:**
1. Identify characteristics of the vehicle
2. Identify type of vehicle

**REFERENCES:**
1. ROC-V Recognition of Combat Vehicles

**MISCELLANEOUS:**
ADMINISTRATIVE INSTRUCTIONS: 1. Simulations may be used as a precursor to live training in order to help maximize and enhance the live training event. 2. A minimum of four of these slides must be thermal signatures (if unit is equipped with thermal optics). A minimum of five U.S. vehicles and helicopters (mixed; no more than three helicopters per test) will be selected from U.S. armored vehicles and combat helicopters currently in use. 3. All U.S. equipment must be identified correctly to receive a GO rating. 4. This task will be performed to standard as part of the Gunnery Skills Test.

1833-GNRY-1011: Engage Stationary Target from a Stationary Position

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

DESCRIPTION: Gunnery that demonstrates engagement skills from a stationary position against stationary target(s).

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a loaded Upgunned Weapons Station.

STANDARD: To suppress and destroy targets.

PERFORMANCE STEPS:
1. Employing a gunnery technique.
2. Implementing a method of engagement
3. Using proper fire commands
4. Terminating the engagement

Facility Code 17721 Tank/Fighting Vehicle Multipurpose Range Complex

MISCELLANEOUS:
ADMINISTRATIVE INSTRUCTIONS: Simulations will be used as a precursor to live training in order to help maximize and enhance the live training event. 1. Gunners will fire one practice and one qualification. 2. Ammunition is either TP or HE DP and Ball or API-T (Only TP and Ball on Pop-up targets). 3. Gunners will utilize/validate a range card to engage targets. 4. Short range is 400 – 800m; long range is 800 – 1800m. 5. All steps can be performed in degraded gunnery (non-electric).

1833-GNRY-1012: Conduct Failure to Fire Procedures

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle with weapons installed.

STANDARD: In sequence and in 5 minutes.

PERFORMANCE STEPS:
1. Perform Immediate Action on Mk 19
2. Perform Immediate Action on Mk 19 with a jammed bolt
3. Perform Immediate Action on the M2 machine gun

REFERENCES:

1833-GNRY-1013: Conduct Gunnery Skills Test

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

BILLETS: Driver, Third Crewman, Vehicle Commander
GRADES:  PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING:  FORMAL

CONDITION:  Given an AAV, all associated training devices and references.

STANDARD:  in accordance with ST 3-20.21-1.

PERFORMANCE STEPS:
1. Recognition of Threat Vehicles
2. Identify Ammunition
3. Clear, disassemble, assemble, perform function check, load, and perform immediate action, on MK19 40mm Machinegun
4. Clear, disassemble, assemble, set headsapce and timing, perform function check, load, and perform immediate action, on M2 HB caliber Machine Gun

EVALUATION-CODED:  NO  SUSTAINMENT INTERVAL:  6 months

BILLETs:  Driver, Third Crewman, Vehicle Commander

GRADES:  PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING:  FORMAL

CONDITION:  As crew member, Given an AAV, all associated equipment, and crew.

STANDARD:  To perform all 7 performance tasks.

PERFORMANCE STEPS:
1. Perform crew fire and evacuation drills
2. Perform crew roll over Drills
3. Send, Receive radio reports
4. Send, Receive digital reports
5. Evacuate an injured crewman
6. Boresight an AAV

BILLETS: Vehicle Crewman

GRADES: PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an AAV.

STANDARD: To prepare the M257 Smoke Grenade Launcher for firing.

PERFORMANCE STEPS:
1. Turn the vehicle and turret power OFF
2. Turn the grenade launcher switches OFF
3. Insert the grenades into the M257
4. Rotate 90 degrees
5. Unload the M257 Smoke Grenade Launcher
6. Stow grenades

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL, CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, radio net and reference.

STANDARD: To communicate with crew and other elements.

PERFORMANCE STEPS:
1. Prepare the communications equipment for operations
2. Operate the Combat Vehicle Crewman's (CVC) helmet
3. Operate the vehicle intercom system
4. Operate the audio frequency amplifier
5. Operate the receiver / transmitters  
6. Operate the position location systems  
7. Secure communication equipment from operation

SUPPORT REQUIREMENTS:

RANGE/TRAINING AREA: Facility Code 17420 Maneuver/Training Area, Heavy Forces

1833-CMDC-1004: Conduct Operational Safety

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle.

STANDARD: To ensure the safety of crew and embarked personnel.

PERFORMANCE STEPS:
1. Ensure serviceability of recovery equipment
2. Ensure serviceability of waterborne equipment
3. Secure equipment/cargo items on vehicle
4. Enforce all safety regulations with embarked personnel
5. Verify that all dismounted personnel maintain minimum safe distance from vehicle

RANGE/TRAINING AREA: Facility Code 17420 Maneuver/Training Area, Heavy Forces
1833-CMDC-1005: Participate in tactical formations and movement techniques
EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

DESCRIPTION: This is an 1833 skill that is applicable to all drivers and vehicle commanders.

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL, CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: As a driver on an AAV, given a vehicle commander and a supportable area.

STANDARD: To follow commands and maintain control and mutual support throughout the movement.

PERFORMANCE STEPS:
1. Participate in column formation
2. Participate vee formation
3. Participate in wedge formation
4. Participate in echelon left/right formation
5. Participate in successive bounds
6. Participate in unit on-line formation
7. Participate in bounding overwatch
8. Participate in traveling overwatch

1833-VOPS-1001: Conduct Operational Checks
EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

STANDARD: To complete steps per the references and ensure the AAV is operationally ready.
PERFORMANCE STEPS:
1. Perform pre-operation checks.
2. Perform during operation checks.
3. Perform at-halt operation checks.
4. Perform after operation checks.

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle conducting operations and a load plan.

STANDARD: To ensure personnel and vehicle safety.

PERFORMANCE STEPS:
1. Assist the AAV crew chief with administering the safety brief.
2. Ensure all embarked gear and equipment are properly stowed.
3. Ensure embarked personnel comply with safety requirements/procedures.

1833-VOPS-1003: Start the Engine

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL
INITIAL TRAINING SETTING: FORMAL
CONDITION: Given an Assault Amphibious Vehicle.
STANDARD: To prevent mechanical malfunctions.

PERFORMANCE STEPS:
1. Follow the pre-operation checklist
2. Apply normal conditions starting procedures
3. Apply freezing conditions starting procedures

INITIAL TRAINING SETTING: FORMAL
CONDITION: Given a crew and land operational area.
STANDARD: To negotiate various types of terrain.
PERFORMANCE STEPS:
1. Determine direction of movement
2. Determine locations of terrain, personnel, and other vehicles around AAV
3. Place vehicle in motion
4. Identify vehicle limitations
5. Negotiate obstacles
6. Stop vehicle
7. Stop the engine

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle and the TM 09674A-10/3.

STANDARD: To resolve the probable cause.

PERFORMANCE STEPS:
1. Recognize a malfunction symptom
2. Follow the troubleshooting chart
3. Report all discrepancies to vehicle commander and/or maintenance personnel
4. Assist maintenance personnel in performance of corrective maintenance and services

1833-VOPS-1008: Operate Smoke Generation System

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle and operational area.

STANDARD: To obscure the vehicle.

PERFORMANCE STEPS:
1. Prepare the vehicle for smoke generation use
2. Operate the system
3. Shutdown the system

MOS PERFORMING: 1833
GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a disabled Assault Amphibious Vehicle and required vehicles with crew and equipment.

STANDARD: To move the disabled AAV.

PERFORMANCE STEPS:
1. Prepare disabled vehicle for towing
2. Tow using tow bar
3. Tow using tow cables

1833-VOPS-1010: Operate Driver's Vision Enhancer (DVE)

EVALUATION-CODED: NO          SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle in a low visibility environment.

STANDARD: To drive the AAV while maneuvering at night.

PERFORMANCE STEPS:
1. Conduct DVE pre-operation checks
2. Install driver's unit and commander's display assembly
3. Use driver's unit and commander's display assembly
4. Remove driver's unit and commander's display assembly
5. Maintain DVE

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, collateral material and TM 09674A-10/3C.

STANDARD: To maintain vehicle readiness.

PERFORMANCE STEPS:
1. PMCS the vehicle exterior
2. PMCS the vehicle engine compartment
3. PMCS the vehicle driver and troop commander's station
4. PMCS the vehicle troop compartment
5. PMCS the vehicle while engine is running
6. PMCS and inventory the vehicle SL-3

DESCRIPTION: Assault Amphibious Vehicle Special Mission Kits include: Enhanced Appliqué' Armor Kit, Litter Kit, Winterization Kit and Visor Kit.

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, collateral material and references.

STANDARD: To add to the capabilities of the vehicle.

PERFORMANCE STEPS:
1. Conduct inventory
2. Conduct PMCS
3. Install kit
4. Remove kit

1833-AMPH-1003: Operate the Assault Amphibious Vehicle in Water

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 3 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a crew and amphibious operations area.
STANDARD: To negotiate various bodies of water.

PERFORMANCE STEPS:
1. Ensure water tight integrity
2. Follow land to water procedures
3. Utilize bow plane
4. Employ water driving techniques
5. Follow water to land procedures

1833-AMPH-1004: Conduct Water Tow

EVALUATION-CODED: NO  
SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a disabled AAV in the water, an operational Assault Amphibious Vehicle in the water, crews, and equipment.

STANDARD: To recover the disabled AAV and return it to ship or shore.

PERFORMANCE STEPS:
1. Prepare disabled vehicle for towing
2. Prepare towing vehicle for towing
3. Tow disabled vehicle

1833-AMPH-1006: Egress the AAV

**EVALUATION-CODED:** NO  **SUSTAINMENT INTERVAL:** 4 months

**BILLETS:** Vehicle Crewman

**GRADES:** PVT, PFC, LCPL

**INITIAL TRAINING SETTING:** FORMAL

**CONDITION:** Given a rapidly sinking or submerged AAV.

**STANDARD:** to exit the AAV and reach the surface of the water.

**PERFORMANCE STEPS:**
1. Unfasten seatbelt
2. Unlock assigned hatch
3. Employ life support equipment as required
4. Exit vehicle
5. Gain access to surface

SUPPORT REQUIREMENTS:

OTHER SUPPORT REQUIREMENTS: This task shall be trained using the Submerged Vehicle Egress Trainer (SVET). Egress drills can be conducted on AAV while parked at the ramp or during field exercises, but the training will not be satisfied by any means other than SVET.

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: Reserve training will take place at Initial Location for Mobilization (ILOC) or during two week annual training (AT).

1833-TAC-1001: Camouflage an Assault Amphibious Vehicle

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: PVT, PFC, LCPL

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, crew and camouflage system.

STANDARD: To avoid enemy observation.

PERFORMANCE STEPS:
1. Prepare camouflage system
2. Employ camouflage system
3. Stow camouflage system

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833
GRADES: CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, inhibit zone aligning tool and reference.

STANDARD: To establish safe and effective fields of fire.

PERFORMANCE STEPS:
1. Prepare the UGWS for setting the inhibit zone
2. Establish the inhibit zone elevation
3. Establish Inhibit Zone 2 azimuths
4. Establish Inhibit Zone 1 azimuths
5. Reset inhibit points if applicable

ADMINISTRATIVE INSTRUCTIONS:  There is a time limit for this task within the MCWP 3-12.2 under the Gunnery Skills Test. The time limit covers multiple tasks that are grouped together in one station. The time limit will not show up in the standards for this task but can be found in the reference.

1833-GNRY-2004:  Conduct Minor Boresight Upgunned Weapons Station

EVALUATION-CODED:  NO  SUSTAINMENT INTERVAL:  6 months

MOS PERFORMING:  1833

BILLETS:  Section Leader, Vehicle Commander

GRADES:  CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING:  FORMAL

CONDITION:  Given an Assault Amphibious Vehicle with crew, machineguns, boresight kit and reference.

STANDARD:  To provide a true sight line adjustment, within 15 minutes.

PERFORMANCE STEPS:
1. Conduct boresight procedures for M36E
2. Conduct retention procedures

ADMINISTRATIVE INSTRUCTIONS: This task will be performed to standard as part of the Table I.

1833-GNRY-2005: Develop a Range Card

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle in a defensive position.

STANDARD: To engage targets with the Upgunned Weapons Station.

PERFORMANCE STEPS:
1. Identify Main Terrain Features
2. Identify Target Reference Point
3. Identify Vehicle Location
4. Identify Sectors of Fire
5. Identify PDF and FPL
6. Identify Dead Space
7. Identify Listening/Observation Point position
8. Identify Obstacles

1833-GNRY-2006: Create Fire Plan Sketch

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a defensive position.

STANDARD: To provide overlapping fires and mutual support.

PERFORMANCE STEPS:
1. Combine Vehicle Range Cards
2. Illustrate Vehicles and Firing Data
3. Illustrate dead space
4. Illustrate terrain
5. Annotate orientation data

1833-GNRY-2007: Recognize threat/friendly vehicles and theater specific threat vehicles

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

GRADES: CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a classroom present 20 combat vehicles.

STANDARD: To name 18 out of 20 Vehicles.

PERFORMANCE STEPS:
1. Identify characteristics of the vehicle
2. Identify the type of vehicle
3. Identify the role of the vehicle
4. Identify armament of vehicle
5. Identify the maximum range (threat) of vehicle weapons

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle C7.

STANDARD: To provide security for the vehicle.

PERFORMANCE STEPS:
1. Install pintle mount
2. Secure machine gun mount on pintle
3. Install machine gun on machine gun mount
4. Remove machine gun from machine gun mount
5. Remove machine gun mount from pintle
6. Remove pintle mount

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 6 months
BILLETS: Platoon Sergeant, Section Leader, Vehicle Commander
GRADES: CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle.

STANDARD: To ensure the safety of crew and embarked personnel.

PERFORMANCE STEPS:
1. Conduct mission analysis and assess the situation
2. Develop safety plans
3. Implement safety plans
4. Supervise implementation of safety plans

MOS PERFORMING: 1833

GRADES: CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle C7 variant.

STANDARD: To ensure that the system is ready for the using unit.

PERFORMANCE STEPS:
1. Account for system components
2. Power-up system
3. Operate TOCNET
4. Secure system after operation

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months
MOS PERFORMING: 1833

GRADES: SSGT, GYSgt

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an operation order and an area of operations.

STANDARD: To evaluate enemy capabilities, vulnerabilities and probable courses of action.

PERFORMANCE STEPS:
1. Assist with defining the battlefield environment
2. Assist with describing the Battlefield Effects.
3. Assist in evaluating the threat
4. Assist in determining threat Course of Action
5. Advise the AA Platoon Commander on AAV employment considerations based on IPB products

8000. PURPOSE. This appendix contains all Assault Amphibian Battalion low density MOSs events that are not captured in their parent T&R. These events illustrate the unique tasks that are executed specifically in an AA Battalion by the 2841 MOS.

8001. EVENT CODING. Events in the T&R Manual are depicted with a 12 field alphanumeric system, i.e. XXXX-XXXX-XXXX. This chapter utilizes the following methodology:

a. Field one - Each event starts with “AAV” indicating that the event is for units in the AAV Occupational Field.

b. Field two - This field is alpha characters indicating a functional area. Functional areas used at the Battalion and Company level are:

   CMDC - Command and Control

   c. Field three - This field provides unit level at which the event is accomplished and numerical sequencing.

8002. ADMINISTRATIVE NOTES

1. Commanders should select which collective events under a MET will be E-Coded for purposes of recording and calculating Combat Readiness Percentages.

2. Each event contains a paragraph that describes internal and external support requirements the unit and Marines will need to complete the event. Ranges/Training Areas are described in this section with plain-language description. They are also described using the Range/Facility Codes that identify the type of range and/or training area needed to accomplish the event. Marines can use the codes to find information about available ranges at their geographic location by using the web-based Range/Training Area Management System (see TECOM website). Ultimate use of the Range/Training Area Code is to relate ranges to readiness by identifying those events that cannot be accomplished at a certain location due to lack of ranges.

8004. 2841-LEVEL EVENTS

2841-CMDC-2001: Advise supported unit on AAV C7 Communication System

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 3 months

MOS PERFORMING: 2841

GRADES: PVT, PFC, LCPL, CPL, SGT

INITIAL TRAINING SETTING: MOJT

CONDITION: Given an Assault Amphibious Vehicle C7.

STANDARD: To enhance the supported units proficiency with system.

PERFORMANCE STEPS:
1. Assist with comm. suite configuration
2. Assist supported unit with developing TTPs for C7 operations
3. Assist supported unit with trouble shooting system

REFERENCES:
1. MCWP 3-13 Employment of Amphibious Assault Vehicles (AAVs)
2. TM 08463A-10 Command Communications System, Assault Amphibious Vehicle, Command, Model 7A1 (AAVC7A1)

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: 1. A supported unit's operations/fires element is required to accomplish this task. 2. AAVC7 communication technicians should attend the ground operations specialist course to enhance the AAV unit's ability to advise the supported unit.
After Action Review. A professional discussion of training events conducted after all training to promote learning among training participants. The formality and scope increase with the command level and size of the training evolution. For longer exercises, they should be planned for at predetermined times during an exercise. The results of the AAR shall be recorded on an after action report and forwarded to higher headquarters. The commander and higher headquarters use the results of an AAR to reallocate resources, reprioritize their training plan, and plan for future training.

Assessment. An informal judgment of the unit’s proficiency and resources made by a commander or trainer to gain insight into the unit’s overall condition. It serves as the basis for the midrange plan. Commanders make frequent use of these determinations during the course of the combat readiness cycle in order to adjust, prioritize or modify training events and plans.

Chaining. A process that enables unit leaders to effectively identify subordinate collective events and individual events that support a specific collective event. For example, collective training events at the 4000-level are directly supported by collective events at the 3000-level. When a higher-level event by its nature requires the completion of lower-level events, they are “chained”; sustainment credit is given for all lower level events chained to a higher event.

Collective Event. A clearly defined, discrete, and measurable activity, action, or event (i.e., task) that requires organized team or unit performance and leads to accomplishment of a mission or function. A collective task is derived from unit missions or higher-level collective tasks. Task accomplishment requires performance of procedures composed of supporting collective or individual tasks. A collective task describes the exact performance a group must perform in the field under actual operational conditions. The term “collective” does not necessarily infer that a unit accomplishes the event. A unit, such as a squad or platoon conducting an attack; may accomplish a collective event or, it may be accomplished by an individual to accomplish a unit mission, such as a battalion supply officer completing a reconciliation of the battalion’s CMR. Thus, many collective events will have titles that are the same as individual events; however, the standard and condition will be different because the scope of the collective event is broader.
Collective Training Standards (CTS). Criteria that specify mission and functional area unit proficiency standards for combat, combat support, and combat service support units. They include tasks, conditions, standards, evaluator instruction, and key indicators. CTS are found within collective training events in T&R Manuals.

Combat Readiness Cycle. The combat readiness cycle depicts the relationships within the building block approach to training. The combat readiness cycle progresses from T&R Manual individual core skills training, to the accomplishment of collective training events, and finally, to a unit’s participation in a contingency or actual combat. The combat readiness cycle demonstrates the relationship of core capabilities to unit combat readiness. Individual core skills training and the training of collective events lead to unit proficiency and the ability to accomplish the unit’s stated mission.

Combat Readiness Percentage (CRP). The CRP is a quantitative numerical value used in calculating collective training readiness based on the E-Coded events that support the unit METL. CRP is a concise measure of unit training accomplishments. This numerical value is only a snapshot of training readiness at a specific time. As training is conducted, unit CRP will continuously change.

Condition. The condition describes the training situation or environment under which the training event or task will take place. Expands on the information in the title by identifying when, where and why the event or task will occur and what materials, personnel, equipment, environmental provisions, and safety constraints must be present to perform the event or task in a real-world environment. Commanders can modify the conditions of the event to best prepare their Marines to accomplish the assigned mission (e.g. in a desert environment; in a mountain environment; etc.).

Core Competency. Core competency is the comprehensive measure of a unit’s ability to accomplish its assigned MET. It serves as the foundation of the T&R Program. Core competencies are those unit core capabilities and individual core skills that support the commander’s METL and T/O mission statement. Individual competency is exhibited through demonstration of proficiency in specified core tasks and core plus tasks. Unit proficiency is measured through collective tasks.

Core Capabilities. Core capabilities are the essential functions a unit must be capable of performing during extended contingency/combat operations. Core unit capabilities are based upon mission essential tasks derived from operational plans; doctrine and established tactics; techniques and procedures.

Core Plus Capabilities. Core plus capabilities are advanced capabilities that are environment, mission, or theater specific. Core plus capabilities may entail high-risk, high-cost training for missions that are less likely to be assigned in combat.

Core Plus Skills. Core plus skills are those advanced skills that are environment, mission, rank, or billet specific. 2000-level training is designed to make Marines proficient in core skills in a specific billet or at
a specified rank at the Combat Ready level. 3000-8000-level training produces combat leaders and fully qualified section members at the Combat Qualified level. Marines trained at the Combat Qualified level are those the commanding officer feels are capable of accomplishing unit-level missions and of directing the actions of subordinates. Many core plus tasks are learned via MOJT, while others form the base for curriculum in career level MOS courses taught by the formal school.

**Defense Readiness Reporting System (DRRS).** A comprehensive readiness reporting system that evaluates readiness on the basis of the actual missions and capabilities assigned to the forces. It is a capabilities-based, adaptive, near real-time reporting system for the entire Department of Defense.

**Deferred Event.** A T&R event that a commanding officer may postpone when in his or her judgment, a lack of logistic support, ammo, ranges, or other training assets requires a temporary exemption. CRP cannot be accrued for deferred “E-Coded” events.

**Delinquent Event.** An event becomes delinquent when a unit exceeds the sustainment interval for that particular event. The individual or unit must update the delinquent event by first performing all prerequisite events. When the unit commander deems that performing all prerequisite is unattainable, then the delinquent event will be re-demonstrated under the supervision of the appropriate evaluation authority.

**E-Coded Event.** An “E-Coded” event is a collective T&R event that is a noted indicator of capability or, a noted Collective skill that contributes to the unit’s ability to perform the supported MET. As such, only “E-Coded” events are assigned a CRP value and used to calculate a unit’s CRP.

**Evaluation.** Evaluation is a continuous process that occurs at all echelons, during every phase of training and can be both formal and informal. Evaluations ensure that Marines and units are capable of conducting their combat mission. Evaluation results are used to reallocate resources, reprioritize the training plan, and plan for future training.

**Event (Training).** 1) An event is a significant training occurrence that is identified, expanded and used as a building block and potential milestone for a unit’s training. An event may include formal evaluations. 2) An event within the T&R Program can be an individual training evolution, a collective training evolution or both. Through T&R events, the unit commander ensures that individual Marines and the unit progress from a combat capable status to a Fully Combat Qualified (FCQ) status.

**Event Component.** The major procedures (i.e., actions) that must occur to perform a Collective Event to standard.

**Exercise Commander (EC).** The Commanding General, Marine Expeditionary Force or his appointee will fill this role, unless authority is delegated to the respective commander of the Division, Wing, or FSSG.
Responsibilities and functions of the EC include: 1) designate unit(s) to be evaluated, 2) may designate an exercise director, 3) prescribe exercise objectives and T&R events to be evaluated, 4) coordinate with commands or agencies external to the Marine Corps and adjacent Marine Corps commands, when required.

**Exercise Director (ED).** Designated by the EC to prepare, conduct, and report all evaluation results. Responsibilities and functions of the ED include: 1) Publish a letter of instruction (LOI) that: delineates the T&R events to be evaluated, establishes timeframe of the exercise, lists responsibilities of various elements participating in the exercise, establishes safety requirements/guidelines, and lists coordinating instructions. 2) Designate the TEC and TECG to operate as the central control agency for the exercise. 3) Assign evaluators, to include the senior evaluator, and ensure that those evaluators are properly trained. 4) Develop the general exercise scenario taking into account any objectives/events prescribed by the EC. 5) Arrange for all resources to include: training areas, airspace, aggressor forces, and other required support.

**Marine Corps Ground Training and Readiness (T&R) Program.** The T&R Program is the Marine Corps’ primary tool for planning and conducting training, for planning and conducting training evaluation, and for assessing training readiness. The program will provide the commander with standardized programs of instruction for units within the ground combat, combat support, and combat service support communities. It consolidates the ITS, CTS, METL and other individual and unit training management tools. T&R is a program of standards that systematizes commonly accepted skills, is open to innovative change, and above all, tailors the training effort to the unit’s mission. Further, T&R serves as a training guide and provides commanders an immediate assessment of unit combat readiness by assigning a CRP to key training events. In short, the T&R Program is a building block approach to training that maximizes flexibility and produces the best-trained Marines possible.

**Mission Essential Task(s) MET(s).** A MET is a collective task in which an organization must be proficient in order to accomplish an appropriate portion of its wartime mission(s). MET listings are the foundation for the T&R Manual; all events in the T&R Manual support a MET.

**Mission Essential Task List (METL).** Descriptive training document that provides units a clear, war fighting focused description of collective actions necessary to achieve wartime mission proficiency. The service-level METL, that which is used as the foundation of the T&R Manual, is developed using Marine Corps doctrine, operational plans, T/Os, UJTL, UNTL, and MCTL. For community based T&R Manuals, an occupational field METL is developed to focus the community’s collective training standards. Commanders develop their unit METL from the service-level METL, operational plans, contingency plans, and SOPs.

**Operational Readiness (DOD, NATO).** OR is the capability of a unit/formation, ship, weapon system, or equipment to perform the missions
or functions for which it is organized or designed. May be used in a
general sense or to express a level or degree of readiness.

**Prerequisite Event.** Prerequisites are the academic training and/or T&R
events that must be completed prior to attempting the event.

**Readiness (DOD).** Readiness is the ability of U.S. military forces to fight
and meet the demands of the national military strategy. Readiness is the
synthesis of two distinct but interrelated levels: a) Unit readiness—The
ability to provide capabilities required by combatant commanders to execute
assigned missions. This is derived from the ability of each unit to deliver
the outputs for which it was designed. b) Joint readiness—The combatant
commander’s ability to integrate and synchronize ready combat and support
forces to execute assigned missions.

**Section Skill Tasks.** Section skills are those competencies directly
related to unit functioning. They are group rather than individual in
nature, and require participation by a section (S-1, S-2, S-3, etc).

**Simulation Training.** Simulators provide the additional capability to
develop and hone core and core plus skills. Accordingly, the development
of simulator training events for appropriate T&R syllabi can help maintain
valuable combat resources while reducing training time and cost.
Therefore, in cases where simulator fidelity and capabilities are such that
simulator training closely matches that of actual training events, T&R
Manual developers may include the option of using simulators to accomplish
the training. CRP credit will be earned for E-Coded simulator events based
on assessment of relative training event performance.

**Standard.** A standard is a statement that establishes criteria for how well
a task or learning objective must be performed. The standard specifies how
well, completely, or accurately a process must be performed or product
produced. For higher-level collective events, it describes why the event
is being done and the desired end-state of the event. Standards become
more specific for lower-level events and outline the accuracy, time limits,
sequencing, quality, product, process, restrictions, etc., that indicate
the minimum acceptable level of performance required of the event. At a
minimum, both collective and individual training standards consist of a
task, the condition under which the task is to be performed, and the
evaluation criteria that will be used to verify that the task has been
performed to a satisfactory level.

**Sustainment Training.** Periodic retraining or demonstration of an event
required maintaining the minimum acceptable level of proficiency or
capability required to accomplish a training objective. Sustainment
training goes beyond the entry-level and is designed to maintain or further
develop proficiency in a given set of skills.

**Systems Approach to Training (SAT).** An orderly process for analyzing,
designing, developing, implementing, and evaluating a unit’s training
program to ensure the unit, and the Marines of that unit acquire the
knowledge and skills essential for the successful conduct of the unit’s
wartime missions.
**Training Task.** This describes a direct training activity that pertains to an individual Marine. A task is composed of 3 major components: a description of what is to be done, a condition, and a standard.

**Technical Exercise Controller (TEC).** The TEC is appointed by the ED, and usually comes from his staff or a subordinate command. The TEC is the senior evaluator within the TECG and should be of equal or higher grade than the commander(s) of the unit(s) being evaluated. The TEC is responsible for ensuring that the evaluation is conducted following the instructions contained in this order and MCO 1553.3A. Specific T&R Manuals are used as the source for evaluation criteria.

**Tactical Exercise Control Group (TECG).** A TECG is formed to provide subject matter experts in the functional areas being evaluated. The benefit of establishing a permanent TECG is to have resident, dedicated evaluation authority experience, and knowledgeable in evaluation technique. The responsibilities and functions of the TECG include: 1) developing a detailed exercise scenario to include the objectives and events prescribed by the EC/ED in the exercise LOI; 2) conducting detailed evaluator training prior to the exercise; 3) coordinating and controlling role players and aggressors; 4) compiling the evaluation data submitted by the evaluators and submitting required results to the ED; 5) preparing and conducting a detailed exercise debrief for the evaluated unit(s).

**Training Plan.** Training document that outlines the general plan for the conduct of individual and collective training in an organization for specified periods of time.

**Unit CRP.** Unit CRP is a percentage of the E-Coded collective events that support the unit METL accomplished by the unit. Unit CRP is the average of all MET CRP.

**Unit Evaluation.** All units in the Marine Corps must be evaluated, either formally or informally, to ensure they are capable of conducting their combat mission. Informal evaluations should take place during all training events. The timing of formal evaluations is critical and should, when appropriate, be directly related to the units’ operational deployment cycle. Formal evaluations should take place after the unit has been staffed with the majority of its personnel, has had sufficient time to train to individual and collective standards, and early enough in the training cycle so there is sufficient time to correctly identified weaknesses prior to deployment. All combat units and units’ task organized for combat require formal evaluations prior to operational deployments.

**Unit Training Management (UTM).** Unit training management is the use of the SAT and Marine Corps training principles in a manner that maximizes training results and focuses the training priorities of the unit on its wartime mission. UTM governs the major peacetime training activity of the Marine Corps and applies to all echelons of the Total Force.

**Waived Event.** An event that is waived by a commanding officer when in his or her judgment, previous experience or related performance satisfies the requirement of a particular event.
1. **Manual Management.** A brief description of the role of stakeholders and the process of Manual management is warranted.

   a. **CG TECOM, Marine Air Ground Task Force Training and Education Standards Division (MTESD):**

      (1) Will manage the AAV T&R Manual and supervise associated program of instruction (POI) development, approval, management, and maintenance.

      (2) Will input, update, and manage the T&R events within the Marine Corps Training Information Management System (MCTIMS).

      (3) Will serve as the action agent for all T&R Manual working group, reviews, updates, and electronic distribution.

2. **T&R Changes**

   a. **T&R Reviews.** A T&R review is a forum to routinely review and comprehensively revise the T&R Manual. T&R reviews will normally be conducted via working group and produce a new version (e.g. NAVMC 3500.1) T&R reviews may be held via correspondence with CG TECOM (MTESD) approval. T&R reviews will normally convene on a triennial schedule; however, T&R reviews may be convened as appropriate or when higher headquarters direct.

   b. **T&R changes.** A T&R change is a change to an existing T&R between T&R reviews. T&R changes are normally completed via correspondence and produce formal changes to the existing T&R Manual (e.g. NAVMC 3500.1A"Ch 1").

3. **T&R Review Pre-Working Group Procedures**

   a. **Action**

      (1) **Content Sponsor.** Content sponsors shall coordinate with CG TECOM (MTESD) to establish a T&R working group date and prepare the initial convening message to the appropriate commands employing the MOSs contained in this Manual with an information copy to CMC (DC PP&O). CG TECOM (MTESD) shall release this message 90 days before the proposed working group date. This message shall include the working group convening location and date, announce the purpose, and request interested units to submit agenda items. CG TECOM (MTESD) shall coordinate with the content sponsor to consolidate agenda items and release a working group agenda message to COMMARFORCOM, COMMARFORPAC, COMMARFORRES, COMMARSOC, MEFs, MARDIVs, and all commands employing the MOSs contained in this Manual.

      (2) **Total Force.** Authorized agencies shall nominate voting representatives to CG TECOM (MTESD) via message NLT 45 days prior to the
working group. Units shall submit agenda items to CG TECOM (MTESD) and the content sponsor (Item, Discussion, Recommendation format) via message NLT 45 days prior to the working group.

(3) CG TECOM. CG TECOM (MTESD) shall provide guidance to the content sponsor. CG TECOM (MTESD) shall ensure agenda items are distributed to voting members NLT 30 days prior to the subject working group.

b. Working Group Funding. Organizations shall program funding requirements for working group attendance per MCO P7100.8 (Field Budget Guidance Manual).

4. T&R Review Working Group Procedures

a. All working group attendees shall be familiar with agenda items prior to the working group. Voting members shall staff agenda items and will have established command positions prior to attending a working group. As front-end agenda staffing facilitates the T&R update process, CG TECOM (MTESD) discourages accepting additional agenda items during T&R working group.

b. At the working group, attendees shall review the applicable T&R events and provide change recommendations per standard comment matrix. At a minimum, members of the working group shall complete the following tasks:

(1) Evaluate the events for effectiveness.

(2) Propose changes to the events. Review/validate/modify the following:

(a) Mission statement/METL.
(b) Programs of Instruction.
(c) Content/Phase information.
(d) Content events.
(e) Training resource requirements.
(f) Required T&R matrices/tables.
(g) Content event conversion matrix.
(h) T&R content evaluation forms.

(3) Coordinate content requirements with other communities as required.

c. Working group attendees may recommend a specific position, but it is CG TECOM, COMMARFORCOM, COMMARFORPAC, COMMARFORRES, and COMMARSOC who vote. This procedure ensures fair voting practices.

d. Action

(1) Content Sponsor. The content sponsor shall host the working group and ensure each attendee has access to a draft version of the T&R at the completion of the working group.

(2) CG TECOM. CG TECOM (MTESD) shall provide conference guidance to the content sponsors and facilitate T&R review procedures. CG TECOM (MTESD)
shall ensure individual T&R chapters are developed/updated per the policies contained in this Manual.

(3) CG TECOM, COMMARFORCOM, COMMARFORPAC, COMMARFORRES, and COMMARSOC shall designate one voting member with experience in day-to-day supervision of AAV training programs to each working group. The working group attendees should include representatives from each MEF, MARDIV, and any other appropriate staff officers. CG TECOM invites HQMC to send representatives.

5. Post-Working Group T&R Review Procedures

a. Action

   (1) Content Sponsor. The content sponsor shall provide CG TECOM (MTESD) a smooth, electronic version of the draft T&R chapters within 10 working days of the working group completion. The content sponsor shall coordinate with CG TECOM (MTESD) to prepare and release a working group report message to the MARFORs within 10 working days of working group completion. Working group report messages shall delineate significant change recommendations and request MARFORs concur or non-concur with the draft T&R Manual.

   (2) MARFORs. MARFORCOM, MARFORPAC, MARFORRES, and MARSOC shall consolidate comments from subordinate units and concur or non-concur with justification to CG TECOM via message within 45 days of the working group completion date.

      (a) MARFOR command T&R review working group representatives shall brief their respective commands on post working group results.

      (b) MARFORs should coordinate to resolve post working group contentious issues.

      (c) Failure to respond to post working group deadlines indicates concurrence with T&R content.

   (3) CMC (DC PP&O). CMC shall review the proposed content and concur or non-concur with justification to CG TECOM via message NLT 90 days after working group completion.

   (4) CG TECOM

      (a) CG TECOM (MTESD) shall coordinate with the content sponsor to prepare and release, within 10 working days, a working group report message. CG TECOM shall ensure draft electronic versions are made available to requesting agencies.

      (b) CG TECOM shall attach MARFOR comments and forward the draft document to CMC (DC PP&O), NLT 60 days after working group completion. Unresolved issues shall be forwarded to CMC (DC PP&O) for decision.

      (c) Upon MARFOR and CMC concurrence, CG TECOM shall approve the revised Manual. When the revision is approved by CG TECOM, CG TECOM (MTESD) shall release a message announcing the revision has been approved. CG TECOM
NAVMC 3500.2B
27 Aug 2013

(MTESD) shall coordinate with CMC for publication and distribution as appropriate.

6. **T&R Changes via Correspondence**

   a. Organizations recommending T&R changes shall submit proposed changes in message format via the respective MEF/DIV to CG TECOM (MTESD) and the content sponsor. Correspondence must include rationale for the change.

   b. CG TECOM (MTESD) and the content sponsor shall review and forward the proposed change recommendations to all MEFs/DIVs within 5 working days of receipt of the correspondence.

   c. MEFs/DIVs shall submit their comments and recommendations to CG TECOM (MTESD) and content sponsor within 30 days of the date of the request for comments. All comments and recommendations shall be submitted via message.

   d. CG TECOM (MTESD) and the content sponsor shall consolidate comments and produce a smooth draft of proposed T&R changes (include update of the T&R event conversion matrix if applicable). CG TECOM (MTESD) shall release a T&R change recommendation message to the MARFORs and CMC (DC PP&O) within 45 days of the request for comments.

   e. CMC (DC PP&O) and the MARFORs shall review the proposed T&R change and concur or non-concur with justification to CG TECOM (MTESD) within 30 days of the Manual change recommendation message release. Unresolved issues shall be forwarded to CMC (DC PP&O) for decision. Upon concurrence, CG TECOM (MTESD) shall release a message approving the T&R Manual change.

7. **Applicability.** When a T&R Manual update or change is approved for use, the approved version of the Manual becomes the training standard for all applicable units. Units shall transition to the approved T&R Manual as soon as practical.
AMMUNITION REQUIREMENTS

Ammunition was calculated based on 100% of Table of Organization for individual training events and 100% of Table of Equipment for collective training events. The below chart depicts the total annual ammunition requirement for an AAV battalion and its personnel to train to standard on all events contained in this T&R Manual. Training events which list ammunition but do not require the expenditure of rounds have not been included in the below numbers. Dummy ammunition has been calculated based on an estimate of the total number of rounds required to adequately support the various training events that call for the particular DODIC.

**NOTE:** Ammunition totals should be based on a Battalions Table of Organization for Individual, Crew, and Platoon training and qualification events.

(*) Represents the quantity for each firing vehicle.

Totals are based on 213 Crews firing Crew Qualification once a year (active) and 90 crews firing Crew Qualification (Reserve), and Combat Assault Company (15).

8 Platoons will qualify Platoon Gunnery at each Active Battalion and 3 Platoons will qualify at the Reserves.

Each Section in a Line Platoon in a Line Company (36 Sections) and (8 MCM Sections) will shoot section Gunnery (Active). EXCEPTION 3rd AABN will qualify 4 additional Section in support of UDP.

Each Section in a Line Platoon in a Line Company (24 Sections) in the reserves will qualify every 12 Months.

CAB will conduct Section (24) and Platoon (6) Gunnery for sustainment while on UDP.

40mm TP-T is the only DODIC that can be shot on pop up targets.
Listed in this appendix are applicable simulations available to improve training for individual MOS 1803 and 1833 standards as well as small unit assault amphibian training referenced in this manual.

1. **The AAV-Turret Trainer (AAV-TT)** is a non-deployable, stand-alone interactive simulation training platform. The AAV-TT utilizes surplus AAV Turret and Up-gunned Weapons Station (i.e., M-2 & Mk-19) modified to enable integration with a virtual training environment. In order to provide training of precision gunnery, weapons employment and crew coordination to individuals and crews, the AAV-TT consists of instructor/operator station, driver station, AAV turret, and intercom system. High-fidelity computer generated scenarios enable conduct of Gate-to-Live-Fire (GTLF), in addition to tactical decision making and maneuvering at the platoon level. The AAV-TT incorporates a driver’s station with a 250° field of view screen and vehicle controls, and utilizes tactical CVC helmets to allow crew coordination training between the vehicle commander in the turret, the crewman in the driver’s station and the Instructor/Operator.

2. **Deployable Virtual Training Environment (DVTE)** is a first person skills sustainment trainer that can be used to train Marines from the individual to the battalion staff by using a simulation network with reconfigurable workstations capable of emulating a vast array of training scenarios. DVTE is made up of two components; the first is the Infantry Tool Kit (ITK) which contains several Tactical Decision-making Simulations. The other is the Combined Arms Network (CAN). DVTE training applications trains Marines to approved standards of combat skills and readiness.

3. **Submerged Vehicle Egress Trainer (SVET)** is an underwater escape trainer designed to duplicate the conditions a Marine may face as a crewman or embarked personnel if he or she is trapped in a vehicle upside down and/or under water. The SVET is used to train egress from rollover/submerged ground vehicles reinforcing operational and emergency procedures.

Upgrades made to the current simulation system should be capable of keeping pace with applicable modifications made to the AAV7 family of vehicles in order to replicating the above tasks in as realistic a functional environment (replication of the vehicle) as possible for the vehicle commander stationed in the UGWS turret and the vehicle driver in the driver’s station.

4. TM 08670A/1A Operator's Manual, Machinegun, 7.62mm, M240

MISCELLANEOUS:
ADMINISTRATIVE INSTRUCTIONS: There is a time limit for this task within the MCWP 3-12.2 under the Gunnery Skills Test. The time limit covers multiple tasks that are grouped together in one station. The time limit will not show up in the standards for this task but can be found in the reference.

1803-GNRY-1002: Conduct Preventive Maintenance Checks and Services on Upgunned Weapons Station

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months
MOS PERFORMING: 1803
GRADES:  2NDLT, 1STLT

INITIAL TRAINING SETTING:  FORMAL

CONDITION:  Given collateral material and reference.

STANDARD:  To keep equipment in operating condition and ready for its primary mission.

PERFORMANCE STEPS:
1.  Apply PMCS to turret exterior
2.  Apply PMCS to turret interior
3.  Lubricate turret components

REFERENCES:
1.  TM 10004A-10/1D Upgunned Weapons Station, Assault Amphibious Vehicle

1803-GNRY-1003:  Operate Upgunned Weapons Station (UGWS)

EVALUATION-CODED:  NO  SUSTAINMENT INTERVAL:  12 months

MOS PERFORMING:  1803

GRADES:  2NDLT, 1STLT

INITIAL TRAINING SETTING:  FORMAL

CONDITION:  Given an Assault Amphibious Vehicle.

STANDARD:  To ensure readiness of all components.

PERFORMANCE STEPS:
1.  Complete pre-operation checklist
2.  Manipulate electrical components
3.  Manipulate manual components

REFERENCES:
1.  TM 10004A-10/1D Upgunned Weapons Station, Assault Amphibious Vehicle

SUPPORT REQUIREMENTS:

OTHER SUPPORT REQUIREMENTS:  Assault Amphibian Vehicle Turret Trainer (AAV-TT)

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS:  Simulations will be used as a precursor to live fire training in order to help maximize and enhance the live fire training event.
1803-GNRY-1004: Set Inhibit Zone for the Upgunned Weapons Station

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle, inhibit zone aligning tool and reference.

STANDARD: To keep the vehicle and personnel out of the line of fire.

PERFORMANCE STEPS:
1. Prepare the UGWS for setting the inhibit zone
2. Establish the inhibit zone elevation
3. Establish Inhibit Zone 2 azimuths
4. Establish Inhibit Zone 1 azimuths
5. Reset inhibit points if applicable

REFERENCES:
1. TM 10004A-10/1D Upgunned Weapons Station, Assault Amphibious Vehicle

SUPPORT REQUIREMENTS:

EQUIPMENT: Inhibit Zone Aligning Tool

1803-GNRY-1005: Set Headspace and Adjust Timing

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an M2, and collateral equipment, and reference.

STANDARD: To prepare weapon for firing.

PERFORMANCE STEPS:
1. Set headspace
2. Adjust timing

REFERENCES:
1. MCWP 3-12.2 Heavy Brigade Combat Team (HBCT) Gunnery
2. TM 02498A-10/2 Operator's Manual, Machine Guns, Caliber .50; Browning, M2 Heavy Barrel

1803-GNRY-1006: Install/Remove Weapons

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given machineguns, Upgunned Weapons Station, crew and reference.

STANDARD: Within 20 minutes.

PERFORMANCE STEPS:
1. Install Mk19
2. Install M2
3. Remove Mk19
4. Remove M2

REFERENCES:
1. MCWP 3-12.2 Heavy Brigade Combat Team (HBCT) Gunnery
2. TM 10004A-10/1D Upgunned Weapons Station, Assault Amphibious Vehicle

1803-GNRY-1007: Conduct Minor Boresighting

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle with crew, machineguns, boresighting kits and reference.

STANDARD: To provide a true sight line adjustment, within 15 minutes.

PERFORMANCE STEPS:
1. Conduct boresight procedures for M36E
2. Conduct retention procedures

**1803-GNRY-1009: Prepare Fire Plan Sketch**

**EVALUATION-CODED:** NO  
**SUSTAINMENT INTERVAL:** 12 months

**MOS PERFORMING:** 1803

---
GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an AAV Platoon in a defensive position.

STANDARD: To provide overlapping fires and mutual support.

PERFORMANCE STEPS:
1. Combine section fire plan sketches firing data
2. Illustrate Vehicles and Firing Data
3. Illustrate dead space
4. Illustrate terrain
5. Annotate orientation data

1803-GNRY-1010: Recognize threat/friendly vehicles and theater specific threat vehicles

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a classroom present 20 combat vehicles.

STANDARD: To name 18 out of 20 vehicles.

PERFORMANCE STEPS:
1. Identify characteristics of the vehicle
2. Identify the type of vehicle
3. Identify armament of vehicle
4. Identify maximum range (threat) of vehicle weapons

REFERENCES:
1. ROC-V Recognition of Combat Vehicles

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: 1. Simulations may be used as a precursor to live training in order to help maximize and enhance the live training event. 2. A minimum of four of these slides must be thermal signatures (if unit is equipped with thermal optics). A minimum of five U.S. vehicles and helicopters (mixed; no more than three helicopters per test) will be selected from U.S. armored vehicles and combat helicopters currently in use. 3. All
U.S. equipment must be identified correctly to receive a GO rating. 4. This task will be performed to standard as part of the Gunnery Skills Test.

**1803-GNRY-1011:** Zero the Upgunned Weapons Station

**EVALUATION-CODED:** NO  **SUSTAINMENT INTERVAL:** 12 months

**MOS PERFORMING:** 1803  **GRADES:** 2NDLT, 1STLT

**INITIAL TRAINING SETTING:** FORMAL

**CONDITION:** Given a Boresighted Assault Amphibious Vehicle, ammunition and stationary target at 500m.

**STANDARD:** To place center of beaten zone on the target.

**PERFORMANCE STEPS:**
1. Zero the sight to the Mk 19 machine gun
2. Zero the M2 machine gun to the sight

**1803-GNRY-1012:** Engage Targets
EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

DESCRIPTION: Designed to evaluate the Platoon Commanders ability to engage stationary and moving targets placed in a tactical array from a stationary or moving vehicle (short halt/tactical control point).

MOS PERFORMING: 1803

GRADES: 2NDLT, 1STLT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle with full sized targets.

STANDARD: To score a minimum of 70 points on 70% of the engagements.

PERFORMANCE STEPS:
1. One Defensive Engagement: Day and Night
2. One Offensive Engagement: Day and Night
3. One Short Halt or Traffic Control Point: Day OR Night
4. One Short Range Machine Gun Engagement: Day OR Night
5. One CBRN Engagement: Day and Night

**1833-GNRY-2004:** Conduct Minor Boresight Upgunned Weapons Station

**EVALUATION-CODED:** NO  **SUSTAINMENT INTERVAL:** 6 months

**MOS PERFORMING:** 1833
BILLETS: Section Leader, Vehicle Commander

GRADES: CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle with crew, machineguns, boresight kit and reference.

STANDARD: To provide a true sight line adjustment, within 15 minutes.

PERFORMANCE STEPS:
1. Conduct boresight procedures for M36E_
2. Conduct retention procedures

REFERENCES:

SUPPORT REQUIREMENTS:

RANGE/TRAINING AREA: Facility Code 17660 Tank/Fighting Vehicle Stationary Gunnery Range

MISCELLANEOUS:

ADMINISTRATIVE INSTRUCTIONS: This task will be performed to standard as part of the Table 1.

1833-GNRY-2005: Develop a Range Card

EVALUATION-CODED: NO SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle in a defensive position.

STANDARD: To engage targets with the Upgunned Weapons Station.

PERFORMANCE STEPS:
1. Identify Main Terrain Features
2. Identify Target Reference Point
3. Identify Vehicle Location
4. Identify Sectors of Fire
5. Identify PDF and FPL
6. Identify Dead Space
7. Identify Listening/Observation Point position
8. Identify Obstacles

1833-GNRY-2006: Create Fire Plan Sketch

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a defensive position.

STANDARD: To provide overlapping fires and mutual support.

PERFORMANCE STEPS:
1. Combine Vehicle Range Cards
2. Illustrate Vehicles and Firing Data
3. Illustrate dead space
4. Illustrate terrain
5. Annotate orientation data

1833-GNRY-2007: Recognize threat/friendly vehicles and theater specific threat vehicles

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months
GRADES: CPL, SGT, SSGT, GYSGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given a classroom present 20 combat vehicles.

STANDARD: To name 18 out of 20 Vehicles.

PERFORMANCE STEPS:
1. Identify characteristics of the vehicle
2. Identify the type of vehicle
3. Identify the role of the vehicle
4. Identify armament of vehicle
5. Identify the maximum range (threat) of vehicle weapons

1833-GNRY-2008: Install/Remove M240

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 12 months

MOS PERFORMING: 1833

GRADES: CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle C7.

STANDARD: To provide security for the vehicle.

PERFORMANCE STEPS:
1. Install pintle mount
2. Secure machine gun mount on pintle
3. Install machine gun on machine gun mount
4. Remove machine gun from machine gun mount
5. Remove machine gun mount from pintle
6. Remove pintle mount

EVALUATION-CODED: NO  SUSTAINMENT INTERVAL: 6 months

MOS PERFORMING: 1833

GRADES: CPL, SGT

INITIAL TRAINING SETTING: FORMAL

CONDITION: Given an Assault Amphibious Vehicle C7.

STANDARD: To suppress the target.

PERFORMANCE STEPS:
1. Prepare weapon for firing
2. Load the M240
3. Set estimated range
4. Aim in on target
5. Execute fire commands
6. Change barrel
7. Troubleshoot M240

All crews must have passed the GST and GT I within the previous three months (6 months for Reserve component).

**AAV-GNRY-4003:** Conduct Gun Table IX

**SUPPORTED MET(S):**
MCT 1.1.2
MCT 1.6.1
MCT 1.6.4

**EVALUATION-CODED:** YES  **SUSTAINMENT INTERVAL:** 12 months

**DESCRIPTION:** Gun Table IX is designed to evaluate the section's ability to execute collective tasks in a tactical live fire environment.

**CONDITION:** Given an AAV maneuver element section, allocated training ammunition, full-sized or scaled targets and Operation Order (OPORD).

**STANDARD:** To pass with a rating of Needs Practice (P) for all tactical scenarios, and achieve minimum of 50 percent target destruction as determined by the commanders METT-TSL.

**EVENT COMPONENTS:**
1. Conduct offensive operations as a section
2. Conduct defensive operations as a section
